Prague, I See a City... Daniela Hodrova, 2015 French edition first published in Paris in 1991 as *Visite priv ee Prague* Czech edition published in Prague in 1992 as *M esto vid im* Title page verso City Halls and Civic Materialism Swati Chattopadhyay, Jeremy White, 2014-03-14 The town hall or city hall as a place of local governance is historically related to the founding of cities in medieval Europe As the space of representative civic authority it aimed to set the terms of public space and engagement with the citizenry In subsequent centuries as the idea and built form travelled beyond Europe to become an established institution across the globe the parameters of civic representation changed and the town hall was forced to negotiate new notions of urbanism and public space *City Halls and Civic Materialism Towards a Global History of Urban Public Space* utilizes the town hall in its global historical incarnations as bases to probe these changing ideas of urban public space The essays in this volume provide an analysis of the architecture iconography and spatial relations that constitute the town hall to explore its historical ability to accommodate the public in different political and social contexts in Europe Asia Australia Africa and the Americas as the relation between citizens and civic authority had to be revisited with the universal franchise under fascism after the devastation of the world wars decolonization and most recently with the neo liberal restructuring of cities As a global phenomenon the town hall challenges the idea that nationalism imperialism democracy the idea of citizenship concepts that frame the relation between the individual and the body politic travel the globe in modular forms or in predictable trajectories from the West to East North to South Collectively the essays argue that if the town hall has historically been connected with the articulation of bourgeois civil society then the town hall as a global spatial type architectural space urban monument and space of governance holds a mirror to the promise and limits of civil society

The City and the Railway in the World from the Nineteenth Century to the Present Ralf Roth, Paul Van Heesvelde, 2022-07-18 This volume explores the relationship between cities and railways over three centuries Despite their nearly 200 year existence *The City and the Railway in the World* shows that urban railways are still politically and historically important to the modern world Since its inception cities have played a significant role in the railway system cities were among the main reasons for building such efficient but lavish and costly modes of transport for persons goods and information They also influenced the technological appearance of railways as these have had to meet particular demands for transport in urban areas In 25 essays this volume demonstrates that the relationship between the city and the railway is one of the most publicly debated themes in the context of daily lives in growing urban settings as well as in the second urbanisation of the global South with migration from rural to urban landscapes The volume s broad geographical range includes discussions of railway networks railway stations and urban rails in countries such as India Japan England Belgium Romania Nigeria the USA and Mexico *The City and the Railway in the World* will be a useful tool for scholars interested in the history of transport travel and urban change **DK Eyewitness Travel Guide Prague** DK Travel, 2017-09-19 Explore

Urban Societies in East-Central Europe, 1500-1700 Jaroslav Miller, 2016-02-11 Whilst much has been written about early modern urban history the majority of this work has focussed on Western Europe with relatively little available in English on towns and cities in the former communist East However in recent years urban scholars have increasingly looked to a much more inclusive picture of Europe that compares and contrasts development across the whole continent Dealing primarily with Bohemia Hungary and the Polish Lithuanian Commonwealth this book provides an insight into a number of key issues concerning the economic social and demographic trends in early modern East Central European urban history Taking a supra national perspective across a long time span it examines the effects of migration Reformation state building and economic change on the transformation of medieval urban communities into early modern societies Drawing on a wealth of primary sources particularly the registers of new citizens kept by many towns and cities a fascinating picture of urban development and social structure is reconstructed that not only tells us much about East Central Europe but adds to our knowledge of the whole continent
