SUPERMICROMETER™

MODEL B

■ Fully-Clamp Controlled Head

The microinch/0.025mm control system requires only one reference standard. The head, which has a 1000:1 ratio, allows accurate 0.0001 inch/0.0025mm control, ensuring consistently accurate readings during the measuring cycle.

■ Independently Adjustable Indentation

1.5 adjustable pressure indentations are available from 1 to 40 grams. This independent adjustment for loading allows different loads to be used in different test systems for accurate, consistent readings. The microinch/0.025mm control provides high reliability and optimum performance.

■ Customizable Measurement Applications

The rotating measuring system uses a range of customised gauges and are calibrated to ensure repeatable and reproducible results.

■ Measuring Table

Adjustable gauge measurement is supported by a rotating table which is positioned at the part to be measured to accommodate any material. Many features enhance the measurement environment.

■ Differential Reading System

Capable of the microinch and 0.025mm direct measurements from 0 to 1000 microns, the model also has an instrument calibration scale for use in determining the deviation from setting position.

■ Study Station

Provides the tool for high resolution, accurate measurements for comparison purposes. The tool allows accurate calibration capability to the measuring position.
