Wingate The Evaluation Center Western Michigan University MI USA Educational evaluation encompasses a wide array of activities including student assessment measurement testing program evaluation school personnel evaluation school accreditation and curriculum evaluation It occurs at all levels of education systems from the individual student evaluations carried out by classroom teachers to evaluations of schools and districts to district wide program evaluations to national assessments to cross national comparisons of student achievement As in any area of scholarship and practice the field is constantly evolving as a result of advances in theory methodology and technology increasing globalization emerging needs and pressures and cross fertilization from other disciplines The beginning of a new century would seem an appropriate time to provide a portrait of the current state of the theory and practice of educational evaluation across the globe It is the purpose of this handbook to attempt to do this to sketch the international landscape of educational evaluation its conceptualizations practice

methodology and background and the functions it serves The book s 43 chapters grouped in 10 sections provide detailed accounts of major components of the educational evaluation enterprise Together they provide a panoramic view of an evolving field

The Problem of Formulating Design Problems Juan Felipe Ruiz Muñoz, 2020-11-23 It is common for a design team to be handed a problem to solve for others The handing over is normally referred to as a briefing process and the documentation of the starting point and what is to be done is known as a brief It is known that the way we frame and understand a problem influences what paths we see to potential solutions The aim of this thesis is to understand what makes a good design brief and to do so in order to create an empirically informed and theoretically underpinned typology of design briefs and the kind of search processes they are disposed to induce Different bodies of literature have tried to grasp how design solves problems in order to understand designer s behavior and ultimately facilitate or improve it Distinctions can and have been made between different kinds of problem formulations as well as different problem solving approaches This thesis aims to integrate two previously distinct literatures search process from the organizational perspective developed by James G March Herbert A Simon Richard Cyert and others and Design and the Design Process from the perspectives of authors such as Donald Schön Kees Dorst and Nigel Cross among others to propose a typology of design briefs in order to ultimately facilitate problem formulation and subsequently facilitate the design process The simple and immediate answer to the question of what makes a good design brief is that depends It depends on the design process to be followed if there is one it depends on the kind of goals that should be achieved the time available and it also depends on how much and what is known about the problem and potential solutions Based on this four ideal types of design briefs are articulated including the expected associated search behavior and challenges of design teams

Det är vanligt att ett designteam får ett problem att lösa t andra verlmånad kallas normalt en briefing process och dokumentationen av utgångspunkten och vad som ska göras kallas ett design brief Det är viktigt att det stött vi ramar in och förstär ett problem påverkar vilka vägar vi ser till potentiella lösningar Syftet med denna avhandling är att förstär vad som gör ett bra design brief och att göra det för att skapa en empiriskt informerad och teoretiskt underbyggd typologi av design brief och vilken typ av sökprocesser de uppmuntrar Olika litteratur har försökt förstär hur design löser problem för att förstär designerns beteende och i slutändan underlätta eller förbättra det Skillnader kan och har gjorts mellan olika typer av problemformuleringar och olika problemlösningsmetoder Denna avhandling syftar till att integrera två tidigare distinkta litteraturområden sökprocessen ur det organisatoriska perspektivet som utvecklats av James G March Herbert A Simon Richard Cyert och andra samt Design och designprocessen ur perspektiv av författare som Donald Schön Kees Dorst och Nigel Cross bland andra för att föreslå en typologi av design brief för att underlätta problemformulering och därefter underlätta designprocessen Det enkla och omedelbara svaret på frågan om vad som gör ett bra design brief är det beror på Det beror på designprocessen som ska följas om det finns en det beror på vilken typ av mål som ska uppnås den tillgängliga tiden och det beror också på hur mycket och vad som är känt om problemet och potentiella lösningar Baserat på detta
