As a pupil societal worker, I was required to finish a Child observation over a period of six hebdomads. In order to fix I had to make up one's mind the kid and household I wanted to detect, on this juncture I decided I would detect a kid from a assorted race back land of age 0-12 months. The kid I observed was 12 months from a individual parent household and had three older siblings, the observation took topographic point at her place after I acquired consent from the female parent I started my undertaking. It was indispensable to understand what observation was and I determined that it is an informed manner of sing or looking at something that raises consciousness and increases apprehension.

At the start of the observation I felt really uncomfortable being in unfamiliar district, I felt that it was unjust for me to subject this household to my ain values, rules and bias. Although I felt that my chosen environment in which to detect was the right one, I had great concerns of my deficiency of experience and how the household would react to me as an foreigner in their lives. I was besides really dying about how this procedure would impact me as a parent and my parenting accomplishments or deficiency of it was an intense minute. I questioned whether my function as an perceiver was truly necessary but I had to acquire apprehension of what observation was and meant to me. Trevithick (2012, pg: 169) stated "œ that we learn a batch by detecting others and as such learn what is being transmitted through tone of voice, volume, modulation, position and gestures. "œ

Parent Child Observation Report

As I observed the kid I realised that I learnt a great trade non merely as an perceiver but as a female parent and contemplation on my ain childhood, upbringing and old occupation function. There was a great trade of idea about the emotional impact of the observation on myself as the perceiver. First I learnt the importance of observation, I realised that it was really indispensable to watch and listen than to talk because a great trade is achieved by watching, listening and being soundless. Baldwin (1994, pg 83) stated through observation one is "œ hearing and valuing the voice of the ascertained "œ, and I believed that without words being said there was a connexion between the kid and I. (ability to stay degage to suspend opinion and chorus from engagement, being cognizant of feelings and attitudes evoked, non originating interaction, Precise entering which distinguishes what really happened from what reading.

Second I learnt that observation is a accomplishment that is learnt and acquired with preparation and pattern. Before this undertaking as a household support worker I was required to detect peop

questionnaire data on attitudes beliefs and self reported behavior of school children in Motala n 1 277 and control areas n 2 198 The average response rate was 72.8% Results and discussion There was a significant upward trend in helmet use in all categories of bicyclists from 1988 to 2002 Helmet wearing increased from 20% to 35% among children 10 years riding bikes in their leisure time from 5% to 33% among school children and from 2% to 14% in adults Total average helmet use rose from 4% to 17% However during the last five years of the study period 1998 2002 there was no upward trend in helmet wearing for any of the categories of bicyclists If the historic trend in helmet use continues the average wearing rate will be about 30% by the year 2010 The Motala helmet law was dogged by several problems mainly during the initiation phase and some of them led to poor rooting of the law in the schools and indistinct roles and responsibilities of the municipal actors Despite that the law initially led to a significant increase in helmet wearing among the primary target group school children from a pre law level of 65% to about 76% six months post law whereas thereafter the wearing rate gradually decreased and was at the pre law level 2 years after the law was adopted Nonetheless a weak but significant effect on adult bicyclists remained the pre law level of about 2% rose to about 8% at the end of the study period Only about 10% of bicyclists on bike paths in Motala wore helmets 2 years post law The questionnaire study showed one significant effect on school children in Motala two years post law namely a stronger intention to ride bicycles if a national compulsory helmet law was introduced There was however no significant long term influence on children's attitudes or beliefs about helmet wearing which agrees with the results of the observational study General conclusions It is indeed necessary to increase bicycle helmet wearing in Sweden Both the current average rate of helmet use and the rate predicted for the near future are far from the goal of 80% that was officially proposed by several years ago Previous research has shown that to achieve substantial and sustained bicycle helmet use it is necessary to use helmet promotion in combination with a national helmet law that is compulsory and applies to all bicyclists The present evaluation of the non compulsory local helmet law in Motala indicated that this type of initiative is not a powerful alternative to a mandatory national helmet law Nevertheless much has been learned from the initiation and implementation of this local action
