Power LED status

The power LED lights when the system is on. The color and status of the LED changes depending on the remaining battery charge.

NOTE: If you run out of remaining battery while playing a game, you must replay the game from your last saved location. If the power LED turns red, save your game and charge the system.

If you put the system into Sleep Mode while the power LED is a steady blue light, the LED will slowly brighten and darken.

Battery endurance

The battery endurance times are estimates. They will vary depending on factors such as the software being played, the amount of data received by wireless communication, and the ambient temperature. Using the battery features may also reduce the battery endurance times shown below.

Approximate play times:

Nintendo DSi software - 3-5 hours

Nintendo DS software - 5-8 hours

The screen brightness setting affects the battery endurance time. The factory setting is 3 - for more information on adjusting screen brightness, see page 26.

NOTE: Power-saving mode will increase the battery endurance by automatically adjusting the screen brightness and color based on what is being displayed at the time. For more information on power-saving mode, see page 26.

- If you put the system in Sleep Mode when not using it, you can reduce power consumption while still being able to send and receive information from StreetPass and SpotPass via the wireless communication features. If the system is fully charged and put into Sleep Mode, the system's battery endurance time in Sleep Mode is roughly 1 day.
- The power LED slowly brightens and darkens while the system is in Sleep Mode. **NOTE:** Depending on the software you are using, sometimes during the system will not cause the system to enter Sleep Mode. In these cases, the power LED will remain steadily lit. (For example, when listening to music with Nintendo DSi Sound.)

Who Are You? Alex Custodio, 2020-10-13 Celebrate Nintendo's Game Boy Advance in this video game history that traces the handheld's network of hardware and software afterlives In 2002 Nintendo of America launched an international marketing campaign for the Game Boy Advance that revolved around the slogan Who Are You asking potential buyers which Nintendo character game or even device they identified with and attempting to sell a new product by exploiting players nostalgic connections to earlier ones Today nearly 2 decades after its release and despite the development of newer and more powerful systems Nintendo's Game Boy Advance lives on through a community that continues to hack modify emulate make break remake redesign trade use love and play with the platform In Who Are You Alex Custodio considers each component of this network hardware software peripheral or practice to illuminate the platform's unique features as a computational system and a cultural artifact You'll learn about The evolution of Nintendo's handhelds and consoles and how they embed nostalgia into the hardware Nintendo's expansion of the Game Boy Advance platform through interoperability Physical and affective engagement with the Game Boy Advance Portability private space and social interaction The platformization of nostalgia Fan generated content including homebrew hacking and hardware modding And much more

Although the Game Boy Advance is neither the most powerful nor the most popular of Nintendo's handhelds Custodio argues it is the platform that most fundamentally embodies Nintendo's reliance on the aesthetics and materiality of nostalgia
