Webb, 2024-08-20 South Africa's higher education sector is rooted in the country's divided past A significant State driven restructuring from around 1997 to 2005 resulted in what is largely the current configuration of public universities But just over two decades later for a variety of reasons the higher education sector in South Africa appears beset with numerous challenges Nelson Mandela University is one of the public universities that emerged from the restructuring process The university is in an ongoing state of evolution of becoming It developed out

of the amalgamation of the University of Port Elizabeth Port Elizabeth Technikon and incorporation of the Port Elizabeth campus of Vista University as Nelson Mandela Metropolitan University in 2005 In 2017 it was renamed Nelson Mandela University after the world renowned statesman rather than the metropolitan area in which the university is primarily located The renaming was conceptualised as more than a marketing opportunity to rebrand the university but as an opportunity to reorientate the university to reposition Nelson Mandela University as an engaged and socially embedded university in the service of society striving to be the academic expression of the values and ethos of its iconic namesake Endeavouring to be something greater and different from the norm imbues its strategy public statements and practices The determination to achieve Mandela University serves or is intended to serve as both an organising principle and a lodestar A cross section of writers from different backgrounds situates Nelson Mandela University within the contemporary historical moment from which it emerged and examines its subsequent evolution While Nelson Mandela University has performed the usual work expected of any university it has also sought to turn the university outwards to achieve a higher purpose framing itself as a values based university on a journey to become something else In *Achieving Nelson Mandela University* the university attempts to give an account of itself The book is an intellectual and scholarly reflection on where the university has come from and where it is seeking to go

Cloete, Peter Maassen, 2015-03-01 The dominant global discourse in higher education now focuses on world class universities inevitably located predominantly in North America Europe and increasingly East Asia The rest of the world including Africa is left to play catch up But that discourse should focus rather on the tensions even contradictions between excellence and engagement with which all universities must grapple Here the African experience has much to offer the high participation and generously resourced systems of the so called developed world This book offers a critical review of that experience and so makes a major contribution to our understanding of higher education **Reflections of South African University**

**Leaders: 1981 to 2014** Council on Higher Education, 2016-03-17 Much has been written about the ever growing demands on university leadership worldwide in the face of increasingly complex changes and challenges from within the academy and beyond However as we are reminded by Johan Muller in the Introduction to this book there are particular features of time and place that also throw up unique problems It is precisely time and place that make this set of reflections by university leaders quite remarkable and distinguishes it from the many biographies to be found in the literature on higher education leadership In the main this collection spans two decades the 1990s and 2000s of unprecedented levels of change in South African higher education Leaders in universities as well as those responsible for higher education policy in the government and associated statutory bodies had no neat script to work off nor manuals or prescripts of good leadership or practice Instead there was palpable excitement about collectively imagining and nurturing a new post apartheid higher education system which would contribute to the social and economic development needs of the country the deepening of democracy and which would also be globally relevant Most reflections touch on the coalface of leadership which is the face to face interactional dimension dealing with staff with students with council chairs What comes through clearly is the importance of what are sometimes called people skills In these accounts this is not simply presented as a human relations aptitude for a

number of reasons first of which is the special nature of universities and their occupants More than one points out the special challenge of managing the talented people that are academics and their inbuilt distaste for bureaucracy their reluctance to be managed or told what to do The message here is consistently one of needing to be completely open with academics the importance of maintaining the distinction between collegial and executive management avoiding managerialism and the critical importance of winning and holding their trust The inspiration for this collection arose in late 2013 in the Council on Higher Education's CHE Monitoring and Evaluation Directorate the directorate responsible for conducting research on the higher education landscape and monitoring the state of the sector They noted that conditions besetting universities had grown increasingly complex both globally but more especially locally and the question arose how had this altered the challenges to university leadership over the period between the new political dispensation and the second decade of the new millennium More particularly how had leaders with a proven track record of visionary and strong leadership during this period faced these challenges How did they see the main changes that needed dealing with What challenges did these changes pose and how were they successfully overcome What did they think looking back were the main constituents of successful leadership and management What wisdom could be distilled for posterity The Directorate decided to invite a range of vice chancellors and senior academic leaders who had completed their terms of office to contribute to a project that set out to gather such reflections and compile them into a publication

Universities and Economic Development in Africa Nico Cloete, Tracy Bailey, 2011 Universities and economic development in Africa presents the syntheses and key findings of eight African countries and universities The analysis and discussions presented in the book draw the following three main conclusions 1 There is a lack of clarity and agreement pact about a development model and the role of higher education in development at both national and institutional levels There is however an increasing awareness particularly at government level of the importance of universities in the global context of the knowledge economy 2 Research production at the eight African universities is not strong enough to enable them to build on their traditional undergraduate teaching roles and make a sustained contribution to development via new knowledge production A number of universities have manageable student staff ratios and adequately qualified staff but inadequate funds for staff to engage in research In addition the incentive regimes do not support knowledge production 3 In none of the countries in the sample is there a coordinated effort between government external stakeholders and the university to systematically strengthen the contribution that the university can make to development While at each of the universities

there are exemplary development projects that connect strongly to external stakeholders and strengthen the academic core the challenge is how to increase the number of these projects The project on which this report is based forms part of a larger study on Higher Education and Economic Development in Africa undertaken by the Higher Education Research and Advocacy Network in Africa HERANA HERANA is coordinated by the Centre for Higher Education Transformation in South Africa Back cover

**Non-racialism in South Africa** Allan Zinn,2016-08-14 At the time of his death in August 2012 Neville Alexander was undoubtedly one of South Africa s foremost proponents of the philosophy of non racialism He had devoted his life to fighting against the evils of racism sexism and economic injustice He understood how these social realities not only divided but also ranked human beings in terms of human worth and value He saw how these realities diminished the whole society both the perpetrators and victims And so he gave over his life as a scholar and a political activist to challenging these realities This volume brings together the reflections of a group of activists and scholars on the significance of Neville Alexander to the cause of freedom and justice in South Africa The reflections are essentially the keynote speeches and the responses to them that were made at a conference in Alexander s honour held at the Centre for Non Racialism and Democracy at the Nelson Mandela Metropolitan University in July 2013
