The Nonfiction Now Lesson Bank, Grades 4-8 Nancy

Akhavan, 2014-02-04 What exactly makes The Nonfiction NOW Lesson Bank such a stand out? If you consider the amount of instructional support that alone is substantial enough to transform your teaching. But Nancy Akhavan happens to be an educator who has performed many roles over her career so she divests in this book just about everything in her professional vault. A whole new vision of teaching nonfiction. 50 powerhouse lessons. A bank of short informational texts. Dozens of student practice activities. Graphic organizers for taming textbooks. Unlike so many books, this one will live its life in actual use. Dog-eared, sticky noted, and loved. *Learner-Centered Teaching Activities for Environmental and Sustainability Studies* Loren B.

Byrne, 2016-03-21 Learner-centered teaching is a pedagogical approach that emphasizes the roles of students as participants in and drivers of their own learning. Learner-centered teaching activities go beyond traditional lecturing by helping students construct their own understanding of information, develop skills via hands-on engagement, and encourage personal reflection through metacognitive tasks. In addition, learner-centered classroom approaches may challenge students' preconceived notions and expand their thinking by confronting them with thought-provoking statements, tasks, or scenarios that cause them to pay closer attention and cognitively see a topic from new perspectives. Many types of pedagogy fall under the umbrella of learner-centered teaching, including laboratory work, group discussions, service, and project-based learning, and student-led research, among others. Unfortunately, it is often not possible to use some of these valuable methods in all course situations given constraints of money, space, instructor expertise, class meeting, and instructor preparation time, and the availability of prepared lesson plans and material. Thus, a major challenge for many instructors is how to integrate learner-centered activities widely into their courses. The broad goal of this volume is to help advance environmental education practices that help increase students' environmental literacy. Having a diverse collection of learner-centered teaching activities is especially useful for helping students develop their environmental literacy because such approaches can help them connect more personally with the material, thus increasing the chances for altering the affective and behavioral dimensions of their environmental literacy. This volume differentiates itself from others by providing a unique and diverse collection of classroom activities that can help students develop their knowledge, skills, and personal views about many contemporary environmental and sustainability issues. Everyday STEAM for the Early Childhood Classroom Margaret Loring Merrill, 2023-10-18

Everyday STEAM for the Early Childhood Classroom offers a rich, rewarding pathway for early childhood educators integrating the arts into STEM instruction across ages 0-8. Science, technology, engineering, and math are mainstays of early childhood curricula, but young learners can have even more engaging experiences in these subjects with the inclusion of the arts. In this comprehensive resource, early childhood educators will learn key principles for the effective teaching of STEAM in their classrooms and be guided to leverage their existing knowledge and strengths toward meaningful learning.
