System 500 Fire Alarm Control Panel

Section: Conventional Fire Alarm Control Panels

GENERAL

The NOTIFIER System 500 fire alarm control panel is a medium-sized system designed for maximum flexibility and ease of installation. The microprocessor control and modular construction enable users to configure the system to meet precise requirements. Field programmability simplifies initial installation and allows quick updates to meet future needs.

The center of the system is the Central Processor Unit (CPU-500) module which monitors and controls one or two additional user-selected modules. The System 500 may be configured as a 4, 8, 12, or 16-zone system. In addition, up to eight control points may be added, creating a maximum capacity of 48 points (16 zones and 12 output circuits).

Internal communications are accomplished over a high-speed serial data bus. Each module on the bus is automatically addressed, supervised and controlled by the CPU-500.

FEATURES

- Walk Test feature for single-person test of the system. Includes special zone-change audible indication and zone trouble indication.
- Minute Time, Temporal Code, or Steady selectable per indicating circuit or control relay.
- Alarm verification, programmable per zone, with automatic discrimination between smoke detectors and dry-contact initiating devices.
- Field-programmable with multiple passwords and a special programming key to ensure the integrity of field program information.
- Releasing service option with selectable time delays, abort circuit, and manual release.
- Multiple-hazard releasing option. Four cross-zone circuits.
- Pre-signal option with selectable time delays and manual evacuation control. Includes positive alarm sequence option per NFPA standards.
- Two-stage alert/evacuation option meets Canadian and U.S. requirements.
- All initiating and notification circuits are power-limited for use with limited-energy cable.
- Resound of subsequent alarms, troubles, or supervisory signals, each with a distinct local audible indication.
- Each notification zone may be programmed for normal, waterflow, or supervisory operation.

- Field-programmable supervisory complies with NFPA standards requiring distinction between supervisory condition and open-circuit trouble conditions.
- Map any output circuit to any input circuit in nonvolatile program memory.
- Enable/Disable per circuit from front panel switches.
- Small size permits semi-flush mounting between 16" (40.64 cm) center wall studs.
- Filtered notification circuit power.
- Integrator charger for 7.0 AH to 17 AH battery options. **Note:** Use SD-17 when over 12 A.H. batteries.
- Ground fault detection and battery supervision.
