Product Portfolio Management and Corporate Performance in the Banking Sector Gerald Vinten,2005 **The Routledge Companion to Management Buyouts** Mike Wright, Kevin Amess, Nick Bacon, Donald Siegel, 2018-09-03

Management Buyouts MBOs first came to prominence in the US during the early 1980s and have subsequently become a global phenomenon and a highly significant transaction within the corporate restructuring landscape Although much recent attention has focused on private equity PE backed buyouts these are only a subset of the total MBO market The Routledge Companion to Management Buyouts takes a much broader definition reviewing the current state of research and theory and where further developments are likely to occur and incorporating PE and non PE backed buyouts as well as variations such as management buy ins and management employee buyouts It goes beyond the purely financial perspective exploring the many different aspects of management buyouts and incorporating related disciplines including strategy organizational change and HRM providing the first truly comprehensive authoritative resource on the topic Expertly edited and drawing on international scholarship this unique volume will be an invaluable sourcebook on MBOs for researchers and advanced students as well as those interested in the broader areas of corporate restructuring and ownership change *Reputation Formation in Early Bank Note Markets* Gary B. Gorton, 1998 Two hypotheses concerning firms issuing debt for the first time are tested The first is that new firms debt will be discounted more heavily by lenders compared to firms that have credit histories but are otherwise identical and that this excess discount declines over time as lenders observe defaults The declining interest rate corresponds to the formation of a 'quot reputation quot a valuable asset that provides an incentive for firms not to choose risky projects The second hypothesis is that prior to the establishment of a reputation new firms issuing debt are monitored more intensely The sample studied consists of new banks issuing bank notes for the first time during the American Free Banking Era 1838-60 The presence of a reputation effect in note prices is confirmed the notes of new banks are discounted more heavily than the notes of banks with credit histories Note holders are then motivated to monitor new banks because the excess discount provides an incentive for the notes of new banks to be redeemed As lenders learn that new banks can redeem their notes the discount declines as predicted for surviving banks The precision of learning increases during the period because of technological improvements in

information transmission namely the introduction of the telegraph and the railroad The results explain why the pre Civil War system of private money issuance by banks was not plagued by problems of overissuance quot wildcat bankingquot

Investment Banking Alan D. Morrison, William J. Wilhelm Jr., 2008-09-11 Investment Banking Institutions Politics and Law provides an economic rationale for the dominant role of investment banks in the capital markets and uses it to explain both the historical evolution of the investment banking industry and also recent changes to its organization Although investment decisions rely upon price relevant information it is impossible to establish property rights over it and hence is very hard to coordinate its exchange The authors argue that investment banks help to resolve this problem by managing information marketplaces within which extra legal institutions support the production and dissemination of information that is important to investors Reputations and relationships are more important in fulfilling this role than financial capital The authors substantiate their theory with reference to the industry's evolution during the last three centuries They show how investment banking networks were formed and identify the informal contracts that they supported This historical development points to tensions between the relational contracting of investment banks and the regulatory impulses of the State thus providing some explanation for the periodic large scale State intervention in the operation of capital markets Their theory also provides a technological explanation for the massive restructuring of the capital markets in recent decades which the authors argue can be used to think about the likely future direction of the investment banking industry
