You must have: Ruler graduated in centimetres and millimetres, protractor, pair of compasses, pen, HB pencil, eraser, calculator, Formulae Sheet (enclosed). Tracing paper may be used.									
									Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
– there may be more space than you need.
- You must **show all your working**.
- Diagrams are **NOT** accurately drawn, unless otherwise indicated.
- **Calculators may be used.**
- If your calculator does not have a π button, take the value of π to be 3.142 unless the question instructs otherwise.

Information

- The total mark for this paper is 80.
- The marks for **each** question are shown in brackets
– use this as a guide as to how much time to spend on each question.

Advice

- Read each question **carefully** before you start to answer it.
- Try to **answer every question**.
- Check your answers if you have time at the end.
- Good luck with your examination.

Power and Energy Richard Kong, 2015-05-06 Power and Energy contains 86 selected papers from the International Conference on Power and Energy CPE 2014 Shanghai China 29 30 November 2014 and presents a wide range of topics Energy management planning and policy making Energy technologies and environment Energy prospects Conventional and renewable power generation Power system man

High Performance Computing Systems. Performance Modeling, Benchmarking, and Simulation Stephen A. Jarvis, Steven A. Wright, Simon D. Hammond, 2015-04-20 This book constitutes the thoroughly refereed proceedings of the 5th International Workshop PMBS 2014 in New Orleans LA USA in November 2014 The 12 full and 2 short papers presented in this volume were carefully reviewed and selected from 53 submissions The papers cover topics on performance benchmarking and optimization performance analysis and prediction and power energy and checkpointing

Mathematical and Statistical Modeling for Emerging and Re-emerging Infectious Diseases Gerardo Chowell, James M. Hyman, 2016-07-27 The contributions by epidemic modeling experts describe how mathematical models and statistical forecasting are created to capture the most important aspects of an emerging epidemic Readers will discover a broad range of approaches to address questions such as Can we control Ebola via ring vaccination strategies How quickly should we detect Ebola cases to ensure epidemic control What is the likelihood that an Ebola epidemic in West Africa leads to secondary outbreaks in other parts of the world When does it matter to incorporate the role of disease induced mortality on epidemic models What is the role of behavior changes on Ebola dynamics How can we better understand the control of cholera or Ebola using optimal control theory How should a population be structured in order to mimic the transmission dynamics of diseases such as chlamydia Ebola or cholera How can we objectively determine the end of an epidemic How can we use metapopulation models to understand the role of movement restrictions and migration patterns on the spread of infectious diseases How can we capture the impact of household transmission using compartmental epidemic models How could behavior dependent vaccination affect the dynamical outcomes of epidemic models The derivation and analysis of the mathematical models addressing these questions provides a wide ranging overview of the new approaches being created to better forecast and mitigate emerging epidemics This book will be of interest to researchers in the field of mathematical epidemiology as well as public health workers

Models and Estimation of Genetic Effects José M Álvarez-Castro, Rong-Cai Yang, 2015-04-17 Ronald Fisher needed to develop elaborate models of genetic effects in order to set the foundations of Quantitative Genetics in his 1918 paper The correlation between relatives on the supposition of Mendelian inheritance Since then many significant implementations have been made to model genetic effects However at the verge of one century after Fisher's kick off models of genetic effects keep on being discussed and implemented Indeed the relatively recent advent of QTL analyses challenged the state of the art of this field by providing researchers the opportunity to obtain and analyze estimates of genetic effects from real data In this context the development of this field was not exempt of some

polemics like the debate about the convenience of the functional and the statistical epistasis approaches This research topic is meant to provide recent developments in models and estimation of genetic effects and to enrich the discussion about how and why models of genetic effects must be further developed and applied The articles in this Research Topic shall thus extend refine and or provide a refresh look at Fisher s original models of genetic effects and their application to genetic effects estimation and to improve our understanding of evolutionary processes and breeding programs Informatics, Networking and Intelligent Computing Jiaxing Zhang,2015-05-06 This proceedings volume contains selected papers presented at the 2014 International Conference on Informatics Networking and Intelligent Computing held in Shenzhen China Contributions cover the latest developments and advances in the field of Informatics Networking and Intelligent Computing

Neural Masses and Fields: Modelling the Dynamics of Brain Activity Karl Friston, 2015-05-25

Biophysical modelling of brain activity has a long and illustrious history and has recently profited from technological advances that furnish neuroimaging data at an unprecedented spatiotemporal resolution

Neuronal modelling is a very active area of research with applications ranging from the characterization of neurobiological and cognitive processes to constructing artificial brains in silico and building brain machine interface and neuroprosthetic devices

Biophysical modelling has always benefited from interdisciplinary interactions between different and seemingly distant fields ranging from mathematics and engineering to linguistics and psychology

This Research Topic aims to promote such interactions by promoting papers that contribute to a deeper understanding of neural activity as measured by fMRI or electrophysiology

In general mean field models of neural activity can be divided into two classes neural mass and neural field models

The main difference between these classes is that field models prescribe how a quantity characterizing neural activity such as average depolarization of a neural population evolves over both space and time as opposed to mass models which characterize activity over time only by assuming that all neurons in a population are located at approximately the same point

This Research Topic focuses on both classes of models and considers several aspects and their relative merits that span from synapses to the whole brain comparisons of their predictions with EEG and MEG spectra of spontaneous brain activity evoked responses seizures and fitting data to infer brain states and map physiological parameters

Complex Problem Solving Beyond the Psychometric Approach Wolfgang Schoppek, Joachim Funke, Magda Osman, Annette Kluge, 2018-09-28

Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena

In abroad sense CPS encompasses learning decision making and acting in complex and dynamic situations

Moreover solutions to problems that people face in such situations are often generated in teams or groups

This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions

This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e g minimal complex system tests which is a view taken by the psychometric community

The proposed approach taken here is that because CPS is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other

Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holist approach to investigating and theorizing about these abilities

The collection of articles

encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS DDM and CDC This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another what learning conditions result in transferable knowledge and skills and how these features can be trained

Engineering Emergence Larry B. Rainey, Mo Jamshidi, 2018-09-03 This book examines the nature of emergence in context of man made i e engineered systems in general and system of systems engineering applications specifically It investigates emergence to interrogate or explore the domain space from a modeling and simulation perspective to facilitate understanding detection classification prediction control and visualization of the phenomenon Written by leading international experts the text is the first to address emergence from an engineering perspective System engineering has a long and proud tradition of establishing the integrative view of systems The field however has not always embraced and assimilated well the lessons and implications from research on complex adaptive systems As the editors note there have been no texts on Engineering Emergence Principles and Applications It is therefore especially useful to have this new edited book that pulls together so many of the key elements ranging from the theoretical to the practical and tapping into advances in methods tools and ways to study system complexity Drs Rainey and Jamshidi are to be congratulated both for their vision of the book and their success in recruiting contributors with so much to say Most notable however is that this is a book with engineering at its core It uses modeling and simulation as the language in which to express principles and insights in ways that include tight thinking and rigor despite dealing with notably untidy and often surprising phenomena Paul K Davis RAND and Frederick S Pardee RAND Graduate School The first chapter is an introduction and overview to the text The book provides 12 chapters that have a theoretical foundation for this subject Includes 7 specific example chapters of how various modeling and simulation paradigms techniques can be used to investigate emergence in an engineering context to facilitate understanding detection classification prediction control and visualization of emergent behavior The final chapter offers lessons learned and the proposed way ahead for this discipline

The Economics of Artificial Intelligence Ajay Agrawal, Joshua Gans, Avi Goldfarb, 2019-05-22 Advances in artificial intelligence AI highlight the potential of this technology to affect productivity growth inequality market power innovation and employment This volume seeks to set the agenda for economic research on the impact of AI It covers four broad themes AI as a general purpose technology the relationships between AI growth jobs and inequality regulatory responses to changes

brought on by AI and the effects of AI on the way economic research is conducted It explores the economic influence of machine learning the branch of computational statistics that has driven much of the recent excitement around AI as well as the economic impact of robotics and automation and the potential economic consequences of a still hypothetical artificial general intelligence The volume provides frameworks for understanding the economic impact of AI and identifies a number of open research questions Contributors Daron Acemoglu Massachusetts Institute of Technology Philippe Aghion Coll ge de France Ajay Agrawal University of Toronto Susan Athey Stanford University James Bessen Boston University School of Law Erik Brynjolfsson MIT Sloan School of Management Colin F Camerer California Institute of Technology Judith Chevalier Yale School of Management Iain M Cockburn Boston University Tyler Cowen George Mason University Jason Furman Harvard Kennedy School Patrick Francois University of British Columbia Alberto Galasso University of Toronto Joshua Gans University of Toronto Avi Goldfarb University of Toronto Austan Goolsbee University of Chicago Booth School of Business Rebecca Henderson Harvard Business School Ginger Zhe Jin University of Maryland Benjamin F Jones Northwestern University Charles I Jones Stanford University Daniel Kahneman Princeton University Anton Korinek Johns Hopkins University Mara Lederman University of Toronto Hong Luo Harvard Business School John McHale National University of Ireland Paul R Milgrom Stanford University Matthew Mitchell University of Toronto Alexander Oettl Georgia Institute of Technology Andrea Prat Columbia Business School Manav Raj New York University Pascual Restrepo Boston University Daniel Rock MIT Sloan School of Management Jeffrey D Sachs Columbia University Robert Seamans New York University Scott Stern MIT Sloan School of Management Betsey Stevenson University of Michigan Joseph E Stiglitz Columbia University Chad Syverson University of Chicago Booth School of Business Matt Taddy University of Chicago Booth School of Business Steven Tadelis University of California Berkeley Manuel Trajtenberg Tel Aviv University Daniel Treffer University of Toronto Catherine Tucker MIT Sloan School of Management Hal Varian University of California Berkeley

Applied Mechanics Reviews ,1974 **Mathematical and Control Applications in Agriculture and Horticulture** W. Day,Yasushi Hashimoto,2014-07-04 This title provides a general overview of recent developments and research into types of systems and their uses in the agricultural and horticultural industry 64 papers are included containing both theoretical models and applied examples for greenhouse systems harvesting technology and plant factory systems *The Economics of Oil* S.W. Carmalt,2016-12-26 This book examines the ways that oil economics will impact the rapidly changing global economy and the oil industry itself over the coming decades The predictions of peak oil were both right and wrong Oil production has been constrained in relation to demand for the past decade with a resulting four fold increase in the oil price slowing the entire global economy High oil prices have encouraged a small increase in oil production and mostly from the short lived fracking revolution but enough to be able to claim that peak oil was a false prophecy The high oil price has also engendered massive exploration investments but remaining hydrocarbon stocks generally offer poor returns in energy the energy return on

investment or EROI and financial terms and no longer replace the reserves being produced As a result the economically powerful oil companies are under great pressure both financially and politically as oil remains the backbone of the global economy Development scenarios and political pressure for growth as a means of solving economic woes both require more net energy which is the amount of energy available after energy and thus financial inputs required for new sources to come on line are deducted In today s economy more energy usually means more oil Although a barrel of oil from any source may look the same tight oil and oil from tar sands require much higher prices to be profitable for the producer these expensive sources have very different economic implications from the conventional oil supplies that underpinned economic growth for most of the 20th century The role of oil in the global economy is not easily changed Since currently installed infrastructure assumes oil a change implies more than just substitution of an energy source The speed with which such basic structural changes can be made is also constrained and ultimately themselves dependent on fossil fuel inputs It remains unclear how this scenario will evolve and that uncertainty adds additional economic pressure to the investment decisions that must be made Drill baby drill and new pipeline projects may be attractive politically but projections of economic and associated oil production growth based on past performance are clearly untenable **Dynamic Data-Driven**

Environmental Systems Science Sai Ravela, Adrian Sandu, 2015-11-26 This book constitutes the refereed proceedings of the First International Conference on Dynamic Data Driven Environmental Systems Science DyDESS 2014 held in Cambridge MA USA in November 2014 The 24 revised full papers and 7 short papers were carefully reviewed and selected from 62 submissions and cover topics on sensing imaging and retrieval for the oceans atmosphere space land earth and planets that is informed by the environmental context algorithms for modeling and simulation downscaling model reduction data assimilation uncertainty quantification and statistical learning methodologies for planning and control sampling and adaptive observation and efficient coupling of these algorithms into information gathering and observing system designs and applications of methodology to environmental estimation analysis and prediction including climate natural hazards oceans cryosphere atmosphere land space earth and planets *Big Data for the Greater Good* Ali Emrouznejad, Vincent

Nov 2014 Higher Predicted Paper Modified Maths Introduction

In the digital age, access to information has become easier than ever before. The ability to download Nov 2014 Higher Predicted Paper Modified Maths has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Nov 2014 Higher Predicted Paper Modified Maths has opened up a world of possibilities. Downloading Nov 2014 Higher Predicted Paper Modified Maths provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Nov 2014 Higher Predicted Paper Modified Maths has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Nov 2014 Higher Predicted Paper Modified Maths. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Nov 2014 Higher Predicted Paper Modified Maths. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is

advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Nov 2014 Higher Predicted Paper Modified Maths, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Nov 2014 Higher Predicted Paper Modified Maths has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

FAQs About Nov 2014 Higher Predicted Paper Modified Maths Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility.
