November 2010 Paper 3 A Level Economicszimsec:

Poor Numbers Morten Jerven, 2013-01-24 One of the most urgent challenges in African economic development is to devise a strategy for improving statistical capacity. Reliable statistics including estimates of economic growth rates and per capita income are basic to the operation of governments in developing countries and vital to nongovernmental organizations and other entities that provide financial aid to them. Rich countries and international financial institutions such as the World Bank allocate their development resources on the basis of such data. The paucity of accurate statistics is not merely a technical problem; it has a massive impact on the welfare of citizens in developing countries. Where do these statistics originate? How accurate are they? **Poor Numbers** is the first analysis of the production and use of African economic development statistics. Morten Jerven's research shows how the statistical capacities of sub-Saharan African economies have fallen into disarray. The numbers substantially misstate the actual state of affairs. As a result, scarce resources are misapplied. Development policy does not deliver the benefits expected. Policymakers' attempts to improve the lot of the citizenry are frustrated. Donors have no accurate sense of the impact of the aid they supply. Jerven's findings from sub-Saharan Africa have far-reaching implications for aid and development policy. As Jerven notes, the current catchphrase in the development community is evidence-based policy, and scholars are applying increasingly sophisticated econometric methods, but no statistical techniques can substitute for partial and unreliable data.

From Antagonism to Re-engagement Kamidza, Richard, 2017-07-19 The book interrogates the European Union-EU Zimbabwe Economic Partnership Agreement (EPA) negotiations covering trade in goods, trade-related rules and development cooperation. The negotiations coincided with EU's motives as the dominant development partner and Zimbabwe's state stakeholder fault lines, creating dilemmas in the pursuit of a fair EPA outcome. As a result, the economically weak Zimbabwe signed and ratified an asymmetrical interim EPA (iEPA) with an economically powerful EU in 2009 and 2012 respectively. Meanwhile, direct bilateral re-engagement, which eluded the Government of National Unity (GNU), became real following ZANU-PF's landslide victory on 31 July 2013 that sufficiently altered the power balance to trigger the process between the former nemesis in support of iEPA domestication and social and economic development. ZANU-PF government stopped blaming the EU and other western nations for the country's continued economic underperformance, signaling a softening approach on its part. Similarly, the EU and its member states softened its perception on ZANU-PF leadership, leading to resumption and intensification of re-engagement despite failure to implement the Global Political Agreement-related constitutional and democratic reforms agreed by GNU. This re-engagement was firmly endorsed when the EU and Zimbabwe signed an agreement in July 2015 to normalise bilateral relations and start cooperation.

Slum Tourism Fabian Frenzel, Ko Koens, Malte Steinbrink, 2012-06-14 Slum tourism is a globalizing trend and a controversial form of tourism. Impoverished urban areas have always enticed the popular imagination, considered to be places of otherness, moral decay, deviant liberty or authenticity. Slumming has a long tradition in the Global North, for example in

Victorian London when the upper classes toured the East End What is new however is its development dynamics and its rapidly spreading popularity across the globe Township tourism and favela tourism have currently reached mass tourism characteristics in South Africa and in Rio de Janeiro Brazil In other countries of the Global South slum tourism now also occurs and providers see huge growth potential While the morally controversial practice of slum tourism has raised much attention and opinionated debates in the media for several years academic research has only recently started addressing it as a global phenomenon This edition provides the first systematic overview of the field and the diverse issues connected to slum tourism This multidisciplinary collection is unique both in its conceptual and empirical breadth Its chapters indicate that global slumming is not merely a controversial and challenging topic in itself but also offers an apt lens through which to discuss core concepts in critical tourism studies in a global perspective in particular poverty power and ethics Building on research by prolific researchers from ten different countries the book provides a comprehensive and unique insight in the current empirical practical and theoretical knowledge on the subject It takes a thorough and critical review of issues associated with slum tourism asking why slums are visited whether they should be visited how they are represented who is benefiting from it and in what way It offers new insights to tourism s role in poverty alleviation and urban regeneration power relations in contact zones and tourism s cultural and political implications Drawing on research from four continents and seven different countries and from multidisciplinary perspectives this ground breaking volume will be valuable reading for students researchers and academics interested in this contemporary form of tourism

India Today Stuart Corbridge, John Harriss, Craig Jeffrey, 2013-04-03 Twenty years ago India was still generally thought of as an archetypal developing country home to the largest number of poor people of any country in the world and beset by problems of low economic growth casteism and violent religious conflict Now India is being feted as an economic power house which might well become the second largest economy in the world before the middle of this century Its democratic traditions moreover remain broadly intact How and why has this historic transformation come about And what are its implications for the people of India for Indian society and politics These are the big questions addressed in this book by three scholars who have lived and researched in different parts of India during the period of this great transformation Each of the 13 chapters seeks to answer a particular question When and why did India take off How did a weak state promote audacious reform Is government in India becoming more responsive and to whom Does India have a civil society Does caste still matter Why is India threatened by a Maoist insurgency In addressing these and other pressing questions the authors take full account of vibrant new scholarship that has emerged over the past decade or so both from Indian writers and India specialists and from social scientists who have studied India in a comparative context India Today is a comprehensive and compelling text for students of South Asia political economy development and comparative politics as well as anyone interested in the future of the world s largest democracy

Economics and HIV Deborah Johnston, 2013-05-29 This book explains how and why economics has

been applied to a terrible pandemic using a range of examples mostly drawn from the region most affected sub Saharan Africa Part I shows that microeconomic approaches have found fertile ground in a public health approach that blames individual choices for HIV transmission Despite their attractiveness however these approaches fail to explain contemporary patterns of HIV prevalence illustrating the importance of factors that are excluded from the standard micro economic approach Part II of the book looks at our problems in understanding the economic impact of AIDS and explains why economists cannot agree if epidemic disease is a good or bad thing for economic development In both sections of the book the potential for alternative approaches is shown and the book ends by arguing that a political economy approach can bring meaningful insights to our understanding of the spread and impact of HIV AIDS The Rise of the Value-Added Tax Kathryn James, 2015-04-30 This book explores one of the most significant trends in the evolution of global tax systems by asking how within less than half a century the value added tax VAT has risen from relative obscurity to become one of the world s most dominant revenue instruments Despite its significance very little is known about why so many countries have adopted the VAT and in particular why different countries adopt the types of VAT that they do The popular mythology provides that the merits of the VAT have underpinned its global spread however this book contends that much scholarship confuses the question of why the VAT has risen to dominance with the issue of what makes a good VAT This book combines policy and legal analysis to propose a new way of understanding the rise of this important revenue instrument so as to better reflect the realities of the VATs that are actually implemented Agricultural, Biosystems, and Biological Engineering Education Umezuruike Linus Opara, 2024-09-30 Agricultural engineering developed as an engineering discipline underpinned by physics applies scientific principles knowledge and technological innovations in the agricultural and food industries During the last century there was exponential growth in engineering developments which has improved human wellbeing and radically changed how humans interact with each other and our planet Among these Agricultural Mechanization is ranked among the top 10 in a list of 20 Top Engineering Achievements of the last century that have had the greatest impact on the quality of life While many success stories abound the problems of low appeal among students identity crises and limited job opportunities in many climes continue to trouble the discipline s future in many parts of the world Yet agriculture and agricultural engineering remain fundamental to assuring food and nutrition security for a growing global population Agricultural Biosystems and Biological Engineering Education provides the first comprehensive global review and synthesis of different agricultural biosystems and biological engineering education approaches including a detailed exposition of current practices from different regions Key Features Describes novel approaches to curriculum design and reform Outlines current and emerging epistemology and pedagogies in ABBE education Provides a framework to grow agricultural engineering in Africa and other developing regions Highlights the role of ABBE education in the context of the SDGs Presented in 3 parts and containing 42 chapters this book covers the historical evolution of agricultural engineering

education and discusses the emergence of biological and biosystems engineering education It will appeal to engineers and other professionals education planners and administrators and policy makers in agriculture and other biological industries Chapters 4 11 19 32 and 41 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

How Governments Borrow Ben Cormier, 2024-02-01 How Governments Borrow reveals how annual borrowing decisions are informed by domestic politics The book traces the annual fiscal policymaking process in Emerging Markets EM to show how a government's partisan policy preferences are a primary determinant of annual external borrowing decisions and thus patterns of debt accumulation That sovereign debt composition has partisan political roots provides insights for scholars in political science international relations economics sociology and public administration that work on sovereign debt Sovereign debt composition enhances or limits the capacity of an EM government to contribute to social and economic development Many EMs depend on foreign currency debt How much external debt an EM government owes the cost of that debt the maturity of that debt and the conditions attached to that debt all determine the political and economic opportunities and risks associated with a government's borrowings EMs borrow from different sources each year leading them to build different sovereign debt structures over time Some prioritize cheap yet conditional official credit which constrains policy autonomy but enhances debt sustainability Others prioritize comparatively expensive bond markets which enhances policy autonomy but brings more expensive repayment obligations on to national balance sheets As countries accumulate debt the borrowing choices they make come to have important effects on fiscal space debt sustainability and development

The Public Debt Problem P. Lemieux, 2013-01-06 The European public debt problem was in the making long before the 2007 2009 recession as budget deficits had become endemic A similar crisis is now developing in America where the same fundamental causes have been at work The Public Debt Problem analyzes the situation of public debts in America and reviews official forecasts for the federal government The author carefully explains the main concepts budget deficit public debt etc and analytical tools discounting government accounting Treasury securities bonds yields etc necessary to understand the issues

Natural Resource Conflicts and Sustainable Development E. Gunilla Almered Olsson, Pernille Gooch, 2019-04-12 Providing both a theoretical background and practical examples of natural resource conflict this volume explores the pressures on natural resources leading to scarcity and conflict It is shown that the causes and driving forces behind natural resource conflicts are diverse complex and often interlinked including global economic growth exploding consumption poor governance poverty unequal access to resources and power The different interpretations of nature culture and the role of humans in the ecosystem are often at the centre of the conflict Natural resource conflicts range from armed conflicts to conflicts of interest between stakeholders in the North as well as in the South The varying driving forces behind such disputes at different levels and scales are critically analysed and approaches to facilitate and enforce mediation

transformation and collaboration at these levels and scales are presented and discussed In order to transform existing resource conflicts as well as to decrease the risk of future conflicts approaches that enhance and enforce collaboration for sustainable development at global regional national and local levels are reviewed and sustainable pathways suggested A range of global examples is presented including water resources fisheries forests human wildlife conflicts urban environments and the consequences of climate change It will be a valuable text for advanced students of natural resource management environment and development studies and peace and conflict management The book will also be of interest to practitioners in the field of natural resource management

Handbook of Energy Law in the Low-Carbon Transition Giuseppe Bellantuono, Lee Godden, Hanri Mostert, Hannah Wiseman, Hao Zhang, 2023-05-22 The low carbon transition is ongoing everywhere This Handbook written by a group of senior and junior scholars from six continents and nineteen countries explores the legal pathways of decarbonisation in the energy sector What emerges is a composite picture There are many roadblocks but also a lot of legal innovation The volume distils the legal knowledge which should help move forward the transition Questions addressed include the differences between the decarbonization strategies of developed and developing countries the pace of the transition the management of multi level governance systems the pros and cons of different policy instruments the planning of low carbon infrastructures the roles and meanings of energy justice The Handbook can be drawn upon by legal scholars to compare decarbonisation pathways in several jurisdictions Non legal scholars can find information to be included in transition theories and decarbonization scenarios Policymakers can discover contextual factors that should be taken into account when deciding how to support the transition

Debates in Primary Education Virginia Bower, 2020-10-19 This powerful text encourages both pre service and established teachers as well as teacher educators to engage with contemporary debates in primary education Promoting a critical approach the chapters explore a wide range of key themes including the importance of values in primary education and the imperative for a curriculum which embraces the whole range of available subjects At the same time the chapters are underpinned by a belief that children should be at the heart of all the decisions we make and that primary education should inspire a love of learning for life The book aims to support practitioners to make informed judgements and feel confident to argue their point of view with deeper theoretical knowledge and understanding thus increasing teacher agency and confidence in responding to complex educational and social dilemmas such as literacy levels and rising mental health concerns Chapters encompass both the macro aspects of primary education and more specialised debates on key topics such as reading mathematics languages early years education and the use of technology With annotated further reading and reflective questions this key text is essential reading for all those wanting to develop a better understanding of the issues that shape their practice including student teachers at both undergraduate and postgraduate level practising teachers engaged in continuing professional development and teacher educators

Gender and Identity around the World Chuck Stewart, 2020-11-09 This book

provides an indispensable resource for high school and college students interested in the history and current status of gender identity formation and maintenance and how it impacts LGBTQ rights throughout the world. *Gender and Identity around the World* explores a variety of gender and LGBTQ experiences and issues in countries from all the world's regions. Guided by more than 50 recognized academic experts, readers will examine how gender and LGBTQ identities are developed, fought for, perceived, and policed in countries as diverse as France, Brazil, Russia, Jordan, Iraq, and China. Each chapter opens with a general introduction to a country or group of countries and flows into a discussion of gender and identity in terms of culture, education, family life, health, and wellness, law, work, and activism in that region of the world. A section on contemporary issues specific to the country or group of countries follows this discussion. **Rural Development Abstracts**, 2010 **Strategies**

for the Global Economic System for 2030 Elena G. Popkova, Artem I. Krivtsov, Aleksei V. Bogoviz, 2021-07-19. Against the background of continuing crises in the world's economy, the question of what future awaits it in the third decade of the 21st century has become urgent. According to the paradigm model of long waves, the next global economic crisis is expected to transpire somewhere around 2030. This book defines the basic conditions for the development of the modern global economy, analyzing future scenarios for its long-term development and providing applied recommendations for the practical implementation of the optimal scenario. The book first explores the conceptual vision of the future and the priorities for the strategic development of the global economic system until 2030. It then formulates the requirements for entrepreneurship to achieve the priorities of the strategic development of the global economic system, including long-term industry solutions for entrepreneurship and markets. Third, it outlines the guidelines for state regulation of the global economic system in the interest of achieving the priorities of its strategic development in the period up to 2030. **Forests Are Gold** Pamela D.

McElwee, 2016-04-01. *Forests Are Gold* examines the management of Vietnam's forests in the tumultuous twentieth century, from French colonialism to the recent transition to market-oriented economics as the country united, prospered, and transformed people and landscapes. Forest policy has rarely been about ecology or conservation for nature's sake but about managing citizens and society, a process Pamela McElwee terms environmental rule. Untangling and understanding these practices and networks of rule illuminates not just thorny issues of environmental change but also the birth of Vietnam itself.

Borderless Africa Francis Mangeni, Andrew Mold, 2024-04-18. The African Continental Free Trade Area established in 2018 represented a monumental step forward for Africa in terms of meeting longstanding aspirations for greater economic and political integration. But it has nonetheless been met with scepticism in some quarters both within the continent and beyond. *Borderless Africa* makes the case for the AfCFTA in an accessible and compelling way without shying away from technical and academic debates. Francis Mangeni and Andrew Mold take us on a journey through the different dimensions and implications of the AfCFTA, the largest free trade zone in the world, starting with its underlying economic rationale. Pointing to the numerous historical examples of successful regional integration, they argue that the African continent will

need to take on board such lessons as the agreement is implemented They discuss too the more controversial elements of the AfCFTA including the freedom of movement protocol contending that this should not be seen as an optional extra but as an intrinsic part of the accord Also exploring the role of external partners in the construction of an economically stronger more united Africa this fascinating study reveals how the AfCFTA is contributing to sustainable development across the continent

Diverse Spaces of Childhood and Youth Ruth Evans, Louise Holt, 2016-04-08 *Diverse Spaces of Childhood and Youth* focuses on the diverse spaces and discourses of children and youth globally The chapters explore the influence of gender age and other socio cultural differences such as race ethnicity and migration trajectories on the everyday lives of children and youth in a range of international contexts These include the diverse urban environments of Istanbul Copenhagen Helsinki Toronto London and Bratislava and the contrasting rural settings of Ghana and England The analyses of children s young people s parents and professionals experiences and discourses provide critical insights into how gender and other socio cultural differences intersect The importance of everyday practices and performances in the formation of children s and young people s identities is revealed through for example friendships and everyday sociality mobilities and movements across space in both rural and urban environments The volume shows how discourses of childhood particularly those associated with risk intersect with difference The recognition of young people s agency and participation is central to many of the chapters whilst also raising methodological questions about how discourses of childhood and youth are researched Overall the book provides an original contribution to geographies of children youth and families and research on diversity and difference in global contexts This book was published as a special issue of *Children s Geographies*
