Repositories for Print Pentti Vattulainen, Steve O'Connor, 2018-03-05 Repositories for low use books have long existed for the larger cultural institutions across the globe Libraries have long been strong developers of off site storage This need has evolved for libraries because of their continuous collection of print materials as a record of the intellectual and cultural output of different cultures Libraries have had this role described neatly and executed as a clear professional role This new book will primarily examine two aspects of this role Firstly the organisational and technological responses to this evolving role will be explored and secondly the wide breadth of strategic responses to challenges of digital will be detailed In this authors to this edited volume will describe their work for libraries but increasingly for Galleries Archives and Museums The papers are drawn from Europe United Kingdom the United States and Australasia The organisational models discussed in the book provide clear illustration of imaginative responses to the plight of the individual institutional library New organisational models are shaping the way in which business can be done in times of change The pressures today on all cultural institutions are similar and so there is a new convergence of similar need and similar solutions This book is an acknowledgment that there are a wide variety of strategic organisational and technological responses to the retention of cultural objects whether they be books art records or other cultural objects It is illustrative of the power of good lateral thinking and planning by professionals of the power of international networks and of convergence in response to need The book will be an edited with a future perspective by Pentti Vattulainen and Steve O Connor who have had significant experience in this area internationally

Discoverability in Digital Repositories Liz Woolcott, Ali Shiri, 2023-04-04 While most discoverability evaluation studies in the Library and Information Science field discuss the intersection of discovery layers and library systems this book looks specifically at digital repositories examining discoverability from the lenses of system structure user searches and external discovery avenues Discoverability the ease with which information can be found by a user is the cornerstone of all successful digital information platforms Yet most digital repository practitioners and

researchers lack a holistic and comprehensive understanding of how and where discoverability happens This book brings together current understandings of user needs and behaviors and poses them alongside a deeper examination of digital repositories around the theme of discoverability It examines discoverability in digital repositories from both user and system perspectives by exploring how users access content including their search patterns and habits need for digital content effects of outreach or integration with Wikipedia and other web based tools and how systems support or prevent discoverability through the structure or quality of metadata system interfaces exposure to search engines or lack thereof and integration with library discovery tools Discoverability in Digital Repositories will be particularly useful to digital repository managers practitioners and researchers metadata librarians systems librarians and user studies usability and user experience librarians Additionally and perhaps most prominently this book is composed with the emerging practitioner in mind Instructors and students in Library and Information Science and Information Management programs will benefit from this book that specifically addresses discoverability in digital repository systems and services

Reference Services for Archives and Manuscripts Laura B Cohen, 2012-11-12 Like their librarian colleagues reference archivists mediate between the user and the source material However given the nature of archival materials and of their holding repositories unique issues arise While such matters as provenance and original order and access and security continue to be vital underpinnings of their work a myriad of other issues comes into play as reference archivists attempt to balance the competing demands of donors researchers the public and the press From the creation and dissemination of finding aids for electronic resources to the implementation of marketing strategies to increase support and strengthen service Reference Services for Archives and Manuscripts shows you how to thrive in the changing world of archival reference Intended to foster an appreciation of the issues both within and beyond the field of archives Reference Services for Archives and Manuscripts reveals that today's archivist is straddling the world of the traditional with the world of the new The book establishes its value as it guides you through new concerns such as how to

take advantage of technological developments in appraisal accession and preservation address copyright privacy and funding issues for electronic resources mount archival cataloging records on local and wide area databases create a publicly available site on the Internet improve in house access tools professional abilities and the caliber of public service address security issues and respond to theft Reference Services for Archives and Manuscripts also helps you by preparing you for changes in the relationship between archivist and researcher that will inevitably occur with further changes in technology Other vital issues discussed are improved access for unserved and underserved groups a revision in ethical codes and the ability of archivists to become more customer centered
