ARO: Architecture Research Office Stephen Cassell, Adam Yarinsky, Architecture Research Office, 2003-02-28 The process of investigation analysis and testing makes Architecture Research Office ARO as much a laboratory as a design firm For Stephen Cassell Adam Yarinsky and their team the starting point of each commission is not the development of an abstract idea for the project but an intensive hands on occupation with a project s conditions with its physical economic and social contexts This practical approach to making architecture to shrinking the distance between thinking and building is much evident in their work which manages to be simultaneously thoughtful and sensual The seven projects featured in this the first monograph on the work of this firm range from self directed research ARO s paper wall project to private living spaces the SoHo Loft to commercial interiors the Qiora Store and Spa to the popular U S Armed Services Recruiting Station in Times Square to the stunning Colorado House in Telluride All of these projects challenge design conventions while delighting the senses with their unusual materials careful detailing and unexpected spatial discoveries With essays by Stan Allen Philip Nobel Guy Nordenson and Sarah Whiting BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Women, Practice, Architecture Naomi Stead, 2016-01-08 The image of the architect is undeniably gendered While the male architect might be celebrated as the ideal man in Hollywood romantic comedies blessed with practicality and creativity in equal measure to impeccable taste and an enviable lifestyle the image of the woman architect is not so clear cut While women have been practicing and excelling in architecture for more than a hundred years their professional identity as constructed in the media is complex and sometimes contradictory This book explores the working lives and aspirations of women in architectural practice but more than this it explores how popular media newspapers magazines and websites serve to define and describe who a woman architect should be what she should look like and how she should behave Looking further into the way that professional characteristics are reinforced through awards like the Pritzker Prize the book demonstrates how idealised characteristics such as sensitivity and vision are seen to be neither entirely masculine nor feminine but instead a complex hybrid owing much to historic concepts of genius Drawing on history sociology media analysis and feminist theories of architectural practice the book will be of interest to all of those who seek to better understand the image and identity of the architect This book was published as a double special issue of Architectural Theory Review
