

# School Uniform: Correlation between Wearing Uniforms and Academic Performance

 Exclusively available on IvyPanda

## Introduction

Earlier researches have indicated that there is a strong positive correlation between wearing of uniforms and academic performance. Furthermore the use of uniforms has had a control on social behavior. Decency is of the essence for any scholar or even worker. The issue of putting on a uniform in the different spheres of life cannot be underrated, it should instead be taken with due importance.

Different countries in the world have their own standardized mode of dressing depending on their cultures, religion or social class. For any successful learning institution, the selection criterion for a uniform is an aspect that should be taken with great consideration. The combination of colors for example, may affect the students' comfort as well as the public view and perception of the institution (Daugherty 392)

The issue of cost should also be put in to check. This is because in many third world countries like Lesotho, it was found that school drop out rate is very high due to the fact that many families cannot afford the high price of uniforms. Other countries have no regard for school uniforms due to their past history. A good example is Italy where children were forced to wear uniforms in and out of school during the Second World War.

## Behavior and School Uniforms

Dropping out and breaking laws tend to be the common responses for students who have negative experiences in school. Schools are supposed to offer a constructive, positive, secure and safe environment for learning. Students should feel protected enough to discover, explore and build up their scholarly and social competencies.

## **Research Paper On School Uniforms:**

*The School Uniform Movement and What It Tells Us about American Education* David L. Brunsma, 2004-06-25 This book represents the most thorough exposition on our present understanding of the impetuses debates legalities and effectiveness of school uniform policies that have rapidly entered the discourse of school reform in the United States In it David Brunsma provides an antidote to the ungrounded anecdotal components that define the contemporary conversation regarding policies of standardized dress in American K 12 districts and schools

*The Challenges of Mandating School Uniforms in the Public Schools* Todd A. DeMitchell, Richard Fossey, 2015-07-08 School uniform policies often associated with private schools are increasingly being adopted in public schools but not without controversy The often asserted reasons for mandating uniforms include improved student behavior better attendance less competition over clothing and improved student learning because students would not be distracted by who was wearing what and could focus on their studies Wishful thinking or empirically tested hypotheses However opponents assert that a mandated uniform seeks to homogenize the students violates their free speech rights and does not solve the problems the policy is intended to remedy

*The Challenges of Mandating School Uniforms in the Public Schools* Free Speech Research and Policy explores the policy rationale the constitutional rights of students and the research on the impact of school uniforms Educators parents and policymakers will find this book and its companion *Student Dress Codes and the First Amendment Legal Challenges and Policy Issues* a must read when considering student attire issues

**School Uniforms. Research Brief** Karen Walker, 2007 Does clothing make the person or does the person make the clothing How does what attire a student wears to school affect their academic achievement In 1996 President Clinton cited examples of school violence and discipline issues that might have been avoided had the students been wearing uniforms School uniforms Prevention or suppression In his 1998 State of the Union address he mentioned the positive impact uniforms had made in the Long Beach Unified School District which has a highly diverse ethnic and socioeconomic population that is also the third largest district in California When students have continuous negative experiences in school dropping out and delinquency tend to be the common responses The role of schools is to provide a positive safe and secure learning environment where students feel protected enough to explore and develop their intellectual and social competencies Hard evidence that proves the wearing of uniforms provides a direct link to better academic achievement is not conclusive however there is evidence that supports there are fewer discipline problems referrals and violence as well as higher attendance rates since the implementation of a uniform policy What appears to have been overlooked in the data analysis is the effect of other programs that are often being implemented at the same time as the uniform policy and may also have a direct impact on the discipline and attendance issues There are many arguments for and against school uniform policies The pros and cons of school uniform are listed in this paper Contains 14 online resources

**Uniforms in Public Schools** David L. Brunsma, 2006 This book provides an antidote to the ungrounded anecdotal

components that define the contemporary conversation regarding policies of standardized dress in American K 12 districts and schools The contributing authors draw upon years of educational teaching and administrative experience and research directed at objectively and empirically understanding the issue of school uniform policies at two focal levels of schooling elementary and middle *Research Report* University of South Africa. Brunsma,2002 The debate surrounding the effectiveness of school uniform policies as well as discussions concerning when and how to implement them is rooted in anecdote This review summarizes anecdotal literature on which the current debate is based and critically reviews the empirical literature including theoretical underpinnings findings and suggestions The anecdote based literature relies on attitudes personal experience and hearsay ignoring available research Empirical literature includes small scale studies of effects such as case studies of schools that implemented mandatory school uniform policies and large scale studies that compare nationally representative samples of students enrolled in schools implementing uniform policies with students enrolled in schools not implementing such policies on a variety of outcomes Many methods used are flawed because different factors are not accounted for such as design of uniform policies in different schools studies and racial and socioeconomic status Still results of qualitative studies lay the groundwork for creating theories on uniform policy effectiveness and defining related issues requiring further research These results will direct policymakers away from conjecture emotion anecdotes and assumptions One suggestion is that a uniform policy be part of a larger comprehensive plan that focuses on students
