

HOW TO INCLUDE RESEARCH EXPERIENCE ON A RESUME

RESEARCH

Resume Worded, New York, NY

Graduate Research Assistant
December 2021 - Present

- Researched and edited two articles and one book chapter on prenatal substance abuse, policy implication of Human Genome Project.
- Awarded "Total Quality Award" in recognition of consistent high standards of quality work for research excellence (only 3 awarded in class of 500).
- Led screening and recruitment of over 100 participants to study; liaised with laboratory personnel and site coordinators to ensure study was completed on time with 100% success.

1. Section title

You can either add your research experience into your work experience section, into a dedicated research section, or in an additional information section. In this example, we created a dedicated research section.

2. Mention awards for your research

If the high quality of your work has been acknowledged by an award, early promotion, or similar outside recognition, include it!

3. Use 'research-focused' action verbs

Use action verbs like "Researched" or "Sourced" which clearly emphasize research skills. In some cases (like in this example), you can list publications in your bullet points itself.

4. Use numbers

If research is part of the job description, make sure you include at least one bullet point highlighting how you've used those skills in the past. Including metrics, like the number of articles or participants, contextualizes your accomplishments and helps them stand out.

5. Institution name

Typically, you should include the name of the company where you conducted research. You can omit this if you performed independent research, or if the research was not substantial and you want to keep it short.

6. Other parts of your resume

You can also include your research experience to your resume's summary, projects or "Additional Information" sections. Keep mention of your research short in these other sections.
