

RESMED

VPAP™ Auto

Quiet comfort. More compliance.

The VPAP™ Auto is a fully-integrated auto-adjusting bilevel device designed to address noncompliant OSA patient needs. Based on the award-winning S9™ platform, the VPAP Auto includes optional wireless monitoring, central sleep apnea (CSA) detection and optional integrated oximetry. It also features a Sleep Quality Indicator, which allows patients to view their therapy progress on a daily basis.

Together with ResMed's Enhanced Easy-Breathe technology and Climate Control humidification system, the VPAP Auto delivers quiet comfort to a wide range of patients, from noncompliant CPAP users to those requiring additional ventilatory support.

Quiet comfort for improved compliance

The VPAP Auto's auto-adjusting VAuto mode combines with the Easy-Breathe pressure delivery to synchronize with the patient's normal respiration, making breathing feel more natural and comfortable. These additional features maximize therapeutic efficacy and promote long-term compliance:

- Enhanced AutoSet™ algorithm continually monitors breathing
- Simple menu settings and color LCD display are intuitive for both patients and clinicians
- Seamless integration with optional H5i™ heated humidifier with Climate Control
- Enhanced Vsync™ technology compensates for leak and provides superior patient-ventilator synchrony
- TiControl™ (Ti Max/Min) feature accommodates individual respiratory conditions

Maximum comfort with Climate Control

ResMed's H5i heated humidifier offers advanced humidification with Climate Control, which automatically maintains temperature and humidity levels as conditions change throughout the night (and from season to season). ClimateLine™ tubing supports higher bilevel pressures and delivers a constant, comfortable temperature at the mask to reduce rainout.

New motor technology—now quieter than ever

The VPAP Auto features sophisticated motor technology with the Enhanced Easy-Breathe motor. Because axial airflow is distributed evenly throughout the motor, conducted noise transferred through the mask to the patient is significantly reduced when compared to previous devices, making it easier to integrate into the patient's (and bed partner's) lifestyle.

Data management

The VPAP Auto offers a range of data management options to help you monitor patient progress:

- 30 sessions of detailed data (eg, flattening index, snore, minute ventilation and oximetry) on SD card
- Seven sessions of high resolution data (flow and pressure) on SD card
- 365 sessions of compliance and summary data (eg, summary, efficacy and usage data, including central apnea statistics) on Sleep Report, device and SD card

Compliance and summary data are easily transferred from the S9 wireless module for daily remote monitoring and from the SD card on the VPAP Auto.
