Solomon, 2017-09-08 In the first decade of the twenty first century a new wave of thinking has emerged from tech billionaires that may shape the way private capital gets invested to tackle social problems These entrepreneurs broke the business mold in the 1980s and 1990s and are now trying to break the traditional pattern of philanthropy pioneered by Andrew Carnegie and John D Rockefeller Sr some one hundred years ago Combining billions of dollars of their personal capital with new ideas cutting edge businesslike techniques media and marketing savvy the tech benefactors profiled in this book are attacking some of the globe's most intractable societal problems In trying to make a difference in the world these new philanthropists

dubbed philanthrocapitalists by the author seek to break down traditional barriers dividing business, charity and government. As a result of the rapid wealth creation in recent years, the world now boasts 1,125 billionaires, many of whom are self-made, according to the Forbes 2008 list, including Bill Gates, Pierre Omidyar, Jeffrey Skoll, Stephen Case, Sergey Brin, Larry Page and more. Their massive wealth has created new philanthropic challenges. Imaginative giving by the new billionaires is beginning to transform philanthropy in terms of timing, involvement, strategy and tactics. How this development impacts society as a whole is the subject of Lewis Solomon's book. As the author notes, the traditional categories of business and philanthropy may no longer serve to meet the challenge of social problems. In the twenty-first century, the tools and resources used to solve societal problems will be far more varied and mixed than previously. We now see interesting partnerships and new ways of thinking. The divide between profit and social good will narrow. If successful in using their money in innovative ways, government or for-profit business could scale up the catalytic efforts of the new philanthropists. This volume is a proactive, innovative guide to a new era, not just a new technique of monetary support. **Prizing Debate** Anna Auguscik, 2017-06-15

This book offers a study of the literary marketplace in the early 2000s. Focusing on the Man Booker Prize and its impact on a novel's media attention, Anna Auguscik analyses the mechanisms by which the Prize both recognises books that trigger debates and itself becomes the object of such debates. Based on case studies of six novels by Aravind Adiga, Margaret Atwood, Sebastian Barry, Mark Haddon, DBC Pierre, Zadie Smith and their attention profiles, this work describes the Booker as a problem-driven attention-generating mechanism, the influence of which can only be understood in relation to other participants in literary interaction. **Organs for Sale** Ryan Gillespie, 2020-12-07

**Organs for Sale** is a study of the bioethical question of how to increase human organ supply. But it is also an inquiry into public moral deliberation and the relationship between economic worth and the value systems of a society. Looking closely at human organ procurement debates, the author offers a critique of neoliberalism in bioethics and asks what kind of society we truly want. While society has shown concern over debates surrounding organ procurement, a better understanding of the rhetoric of advocates and philosophical underpinnings of the debate might indeed improve our public moral deliberation in general and organ policy more specifically. Examining public arguments, this book uses a range of source material from medical journals to congressional hearings to newspaper op-eds to provide the most up-to-date and thorough analysis of the topic. **Organs for Sale** posits that deciding together on the limits of markets and on what is and ought to be for sale sheds light on the moral fibre of our society and what it needs to thrive. **Questioning Architectural Judgment** Steven A. Moore, Barbara B. Wilson, 2013-07-24

The book shines light on the problem of judgment, particularly in the realm of architectural technics and the codes that regulate it. The struggle to define sustainability and thus judge architecture through such lenses is but one dimension of the contemporary problem of judgment. By providing the reader with an inherently interdisciplinary study of a particular discipline, architecture, it brings to the topic lenses that challenge the too frequently unexamined assumptions of the discipline. By situating

architecture within a broader cultural field and using case studies to dissect the issues discussed the book emphasizes that it is not simply a matter of designing better more efficient or more stringent codes to guide place making but a matter of reconstructing the boundaries of the systems to be coded The authors are winners of the EDRA Place Research Award 2014 for their work on the Green Alley Demonstration Project used in the book **New Public Leadership** Douglas F. Morgan, Marcus D. Ingle, Craig W. Shinn, 2018-09-03 Most leadership literature stems from and focuses on the private sector emphasizing personal qualities that bind leaders and followers to a shared purpose As the authors of New Public Leadership argue if these shared purposes do not build trust and legitimacy in public institutions such traditional leadership tropes fall short of the standard demanded by contemporary public servants For twenty years the authors have been developing a leadership education and training framework specifically designed to encourage public service professionals to lead from where they sit This book presents that comprehensive integrated and practical leadership framework grounded in the uniqueness of public legal missions culture history and values The authors explore three key elements of leadership success 1 an understanding of our public service context including the history the values and the institutions that comprise our leadership setting 2 a set of tools designed to help leaders initiate collective action in wicked challenge settings and 3 tools to support sound judgment enabling leaders to do the right thing in the right circumstances for the right reasons The authors further provide readers with a basic understanding of democratic institutions encouraging them to work within and across multiple vertical and horizontal systems of authority The book is organized into four sections each of which is accompanied by a Master Case that provides the reader with an opportunity to apply the principles and leadership tools discussed in the text to practice To further reinforce the practice centered approach to leadership knowledge and skills the authors have developed an accompanying EMERGE Leadership Handbook complete with exercises available online Written specifically with the practicing public manager in mind this book arms public servants with a large repertoire of leadership skills designed to accommodate changing public values and conflicting priorities at all levels of our public organizations

Salman Rushdie in the Cultural Marketplace Ana Cristina Mendes, 2016-03-23 Taking up the roles that Salman Rushdie himself has assumed as a cultural broker gatekeeper and mediator in various spheres of public production Ana Cristina Mendes situates his work in terms of the contemporary production circulation and consumption of postcolonial texts within the workings of the cultural industries Mendes pays particular attention to Rushdie as a public performer across various creative platforms not only as a novelist and short story writer but also as a public intellectual reviewer and film critic Mendes argues that how a postcolonial author becomes personally and professionally enmeshed in the dealings of the cultural industries is of particular relevance at a time when the market is strictly regulated by a few multinational corporations She contends that marginality should not be construed exclusively as a basis for understanding Rushdie's work since a critical grounding in marginality will predictably involve a reproduction of the traditional postcolonial binaries of

oppressor oppressed and colonizer colonized that the writer subverts Rather she seeks to expand existing interpretations of Rushdie's work itineraries and frameworks in order to take into account the actual conditions of postcolonial cultural production and circulation within a marketplace that is global in both orientation and effects Saul Bellow Mark Connelly, 2016-03-29 A three time National Book Award for Fiction winner Saul Bellow 1915-2005 is one of the most highly regarded American authors to emerge since World War II His 60 year career produced 14 novels and novellas two volumes of nonfiction short story collections plays and a book of collected letters His 1953 breakthrough novel *The Adventures of Augie March* was followed by *Seize the Day* 1956 *Herzog* 1964 and *Mr Sammler's Planet* 1970 His *Humboldt's Gift* won a Pulitzer Prize in 1976 and contributed to his receiving the Nobel Prize for Literature that year This literary companion provides more than 200 entries about his works literary characters events and persons in his life Also included are an introduction and overview of Bellow's life statements made by him during interviews suggestions for writing and further study and an extensive bibliography **The New York Times Magazine**, 2010 **Follow the Money** Sarah Reckhow, 2013-01-17 Some of the nation's wealthiest philanthropies including the Bill and Melinda Gates Foundation the Walton Family Foundation and the Broad Foundation have invested hundreds of millions of dollars in education reform With vast wealth and a political agenda these foundations have helped to reshape the reform landscape in urban education In *Follow the Money* Sarah Reckhow shows where and how foundation investment in education is occurring and presents in depth analysis of the effects of these investments within the two largest urban districts in the United States New York City and Los Angeles In New York City centralized political control and the use of private resources have enabled rapid implementation of reform proposals Yet this potent combination of top down authority and outside funding also poses serious questions about transparency responsiveness and democratic accountability in New York Furthermore the sustainability of reform policies is closely linked to the political fortunes of the current mayor and his chosen school leader While the media has highlighted the efforts of drastic reformers and dominating leaders such as Joel Klein in New York City and Michelle Rhee in Washington D C a slower but possibly more transformative set of reforms have been taking place in Los Angeles These reforms were also funded and shaped by major foundations but they work from the bottom up through charter school operators managing networks of schools This strategy has built grassroots political momentum and demand for reform in Los Angeles that is unmatched in New York City and other districts with mayoral control Reckhow's study of Los Angeles's education system shows how democratically responsive urban school reform could occur pairing foundation investment with broad grassroots involvement Bringing a sharp analytical eye and a wealth of evidence to one of the most politicized issues of our day *Follow the Money* will reshape our thinking about educational reform in America **Journal of the House of Representatives of the United States** United States. Congress. House, 2009 Some vols include supplemental journals of such proceedings of the sessions as during the time they were depending were ordered to be kept secret and respecting which the injunction of

secrecy was afterwards taken off by the order of the House      **American Public Service** Sheila Suess Kennedy, David Schultz, 2011-08-25 Questions of ethics in public administration are increasingly in the news where commentators seem too often detached from the sources of those ethics and their application to current political conflicts American Public Service Constitutional and Ethical Foundations examines public administration ethics as contextualized by constitutional legal and political values within the United States Through case studies hypothetical examples and an easy to read discussion format the authors explore what these values mean for specific duties of government managers and for the resolution of many contemporary issues confronting public sector officials Key Features Describes the philosophical underpinnings of the Constitution and the Bill of Rights Identifies the values that anchor and define what government and public administrators should do Indicates where these values fit into a framework for moral decision making in the public sector and how they apply to discussions of current controversies in public administration Written by authors with rich experience as both lawyers and academics in public administration programs      **Chicago Portraits** June Skinner Sawyers, 2012-03-31 The famous the infamous and the unjustly forgotten all receive their due in this biographical dictionary of the people who have made Chicago one of the world's great cities Here are the life stories provided in short entertaining capsules of Chicago's cultural giants as well as the industrialists architects and politicians who literally gave shape to the city Jane Addams Al Capone Willie Dixon Harriet Monroe Louis Sullivan Bill Veeck Harold Washington and new additions Saul Bellow Harry Caray Del Close Ann Landers Walter Payton Koko Taylor and Studs Terkel Chicago Portraits tells you why their names are inseparable from the city they called home      **Feudal America** Vladimir Shlapentokh, Joshua Woods, 2011-01-17 Do Americans live in a liberal capitalist society where evenhanded competition rules the day or a society in which big money private security and personal relations determine key social outcomes Vladimir Shlapentokh and Joshua Woods argue that the answer to these questions cannot be found among the conventional models used to describe the nation Offering a new analytical tool the authors present a provocative explanation of the nature of contemporary society by comparing its essential characteristics to those of medieval European societies Their feudal model emphasizes five elements the weakness of the state and its inability to protect its territory guarantee the security of its citizens and enforce laws conflicts and collusions between and within organizations that involve corruption and other forms of illegal or semilegal actions the dominance of personal relations in political and economic life the prevalence of an elitist ideology and the use of private agents and organizations for the provision of safety and security Feudal America urges readers to suspend their forward thinking and futurist orientations question linear notions of social and historical progression and look for explanations of contemporary social problems in medieval European history      *Born on Third Base* Chuck Collins, 2016-09-23 A call to action for America's wealthy and a warning shot across the bows of their yachts if they fail to act Born on Third Base offers a clear and compelling case for why the privileged and powerful must act to reverse widening inequality of income wealth and political power in America Robert

B Reich former US Secretary of Labor author of Saving Capitalism An essential piece of reading for anyone concerned by the increasing wealth inequality made worse by the global pandemic and political partisanship The growing wealth inequality continues to dominate headlines The divide between the haves and have nots in America is increasingly political and tensions are rising On one side the wealthy wield power and advantage keeping the system operating in their favor all while retreating into enclaves that separate them further and further from the poor and working class On the other side those who find it increasingly difficult to keep up or get ahead are desperate and frustrated waging a rhetorical war against the rich and letting anger and resentment keep us from seeing new potential solutions But can we suspend both class wars long enough to consider a new way forward Is it really good for anyone that most of society's wealth is pooling at the very top of the wealth ladder Does anyone including the one percent really want to live in a society plagued by economic apartheid It is time to think differently says longtime inequality expert and activist Chuck Collins Born into the one percent Collins gave away his inheritance at 26 and spent the next three decades mobilizing against inequality He uses his perspective from both sides of the divide to deliver a new narrative Collins calls for a ceasefire and invites the wealthy to come back home investing themselves and their wealth in struggling communities And he asks the non wealthy to build alliances with the one percent and others at the top of the wealth ladder Stories told along the way explore the roots of advantage show how taxpayers subsidize the wealthy and reveal how charity used incorrectly can actually reinforce extreme inequality Readers meet pioneers who are crossing the divide to work together in new ways including residents in the author's own Boston area neighborhood who have launched some of the most interesting community transition efforts in the nation In the end Collins's national and local solutions not only challenge inequality but also respond to climate change and offer an unexpected fresh take on one of our most intransigent problems
