This manual contains protocols and guidance documents assembled by the authors during many years of clinical experience in nephrology Many are not evidence based but we have found them useful and hope that others will do likewise The recommendations were made on the basis of clinical trials wherever possible In the absence of relevant clinical trials we used evidence available or our personal experience Our aim was to provide a manual for the treatment of the most frequent kidney

diseases or disorders related to the practice of Nephrology The information may be of use to nephrologists general internists general practitioners or medical students The Urban Astronomer's Guide Rod Mollise,2006-12-22 Most amateur astronomers yearn to observe more frequently Many of them however live in urban and highly developed suburban areas that are heavily light polluted Due to this light pollution they are under the impression that deep sky objects nebulae galaxies star clusters are either invisible or not worth viewing from home This book describes the many objects that can be seen in a bright urban sky and shows the city or suburban astronomer how to observe object after object season after season This book covers the why how and what of astronomy under light polluted skies The prospective city based observer is told why to observe from home there are hundreds of spectacular objects to be seen from the average urban site how to observe the city sky telescopes accessories and moderns techniques and what to observe About 50% of the book is devoted to describing tours of the sky with physical and observational descriptions at the eyepiece drawings and photographs *How to Use a Computerized Telescope* Michael A. Covington,2002-09-26 How to Use a Computerized Telescope is the first handbook that describes how to get your computerized telescope up and running and how to embark on a program of observation It explains in detail how the sky moves how your telescope tracks it and how to get the most out of any computerized telescope Packed full of practical advice and tips for troubleshooting it translates the manufacturers technical jargon into easy to follow step by step instructions and includes many of the author s tried and tested observing techniques **Choosing and Using a New CAT** Rod Mollise,2020-05-22 Catadioptric telescopes CATs such as the Schmidt Cassegrains remain popular among amateur astronomers for their ability to reveal thousands of beautiful deep space wonders Additionally their computer assisted capabilities allow them to automatically point to and track celestial objects making astronomy accessible to more people than ever before However selecting the right one and learning how to use it can be difficult for stargazers both old and new That s where this book comes in The first edition published in 2009 has remained the standard reference for mastering these popular instruments This revised edition brings the material completely up to date with several extensively rewritten chapters covering the most recent developments in telescope and camera equipment as well as computer software Through the author s 45 years of experience with catadioptric telescopes readers will learn to decide which catadioptric telescope is right for them to choose a specific make and model and finally to use the telescope in the field Covered in other chapters are Solar System and deep sky observations astrophotography and computer control of CATs and troubleshooting and maintaining your equipment If you dream of owning a telescope or are frustrated by the telescope you already own this is the book for you Spectroscopy: The Key to the Stars Keith Robinson,2007-08-15 While most amateur astronomers know about the red shift have a general idea of the way that the emission and absorption lines in stellar spectra provide an insight into the atomic processes of the star it is unusual to find someone who has any kind of detailed knowledge The reason isn t lack on interest far from it but is because all the books currently available are pitched at professional astronomers and

degree students and are to say the least difficult to read This is the first non technical book on this subject written specifically for practical amateur astronomers It includes all the science necessary for a qualitative understanding of stellar spectra but avoids a mathematical treatment which would alienate many of its intended readers Any amateur astronomer who carries out or who is interested in observational spectroscopy and who wants a non technical account of the physical processes which determine the intensity and profile morphology of lines in stellar spectra will find this is the only book written specially for him And of course armchair astronomers who simply want to understand the physical processes which shape lines in stellar spectra will find this book equally fascinating

A User's Guide to the Meade LXD55 and LXD75 Telescopes Martin Peston, 2010-04-28 I have owned telescopes for over 25 years since I was a young lad I purchased an LXD55 AR 6 Refractor in 2002 and was one of the first to own one in the UK I am also a proud owner of an LXD75 SC 8 Armed with these two very different telescopes I have spent many hours searching the skies for interesting objects using Meade's Autostar Goto facility My motivation to write a book about the LXD Goto telescope series first came from comments about an LXD55 AR 6 Refractor review that was published on the LXD55 com website From then on I have had regular emails from people asking technical questions about the telescope and which model is best suited for them Whilst attending Star parties in the UK I found that many LXD owners would struggle to use them even at a basic level especially if they have never owned or used an equatorially mounted Goto telescope before Since the first LXD55 models came out in early 2002 owners have struggled to find useful information to help them use the telescopes to the best advantage There have been mixed reactions about its quality and performance Hence this book is directed towards those who are new to Goto and the LXD telescope
