Subject Guide to Books in Print , 1991 *Operating Systems Programming* Stephen J. Hartley, 1995 *Operating Systems Programming* is designed to give students experience writing programs in a concurrent programming language Specifically it shows how to use the SR concurrent programming language to write programs that use semaphores monitors message passing remote procedure calls and the rendezvous for an operating systems course The language can also be used for parallel computing in a shared memory multiprocessor or a distributed memory cluster environment The pedagogical orientation of the text helps students understand concepts more clearly it describes the SR language presents some examples of SR programs and provides numerous programming assignments in the form of open student laboratories *Operating Systems Programming* is ideal for undergraduate and graduate students enrolled in concurrent programming and operating systems courses **Forthcoming Books** Rose Arny, 2001-06 **Euro-Par 2000 Parallel Processing** Arndt Bode, Thomas Ludwig, Wolfgang Karl, Roland Wismüller, 2003-06-26 Euro Par the European Conference on Parallel Computing is an

international conference series dedicated to the promotion and advancement of all aspects of parallel computing The major themes can be divided into the broad categories of hardware software algorithms and applications for parallel computing The objective of Euro Par is to provide a forum within which to promote the development of parallel computing both as an industrial technique and an academic discipline extending the frontier of both the state of the art and the state of the practice This is particularly important at a time when parallel computing is undergoing strong and sustained development and experiencing real industrial take up The main audience for and participants of Euro Par are seen as researchers in academic departments government laboratories and industrial organisations Euro Par's objective is to become the primary choice of such professionals for the presentation of new results in their specific areas Euro Par is also interested in applications that demonstrate the effectiveness of the main Euro Par themes Euro Par now has its own Internet domain with a permanent Web site where the history of the conference series is described <http://www.euro-par.org> The Euro Par conference series is sponsored by the Association of Computer Machinery and the International Federation of Information Processing

Proceedings of the 1987 International Conference on Parallel Processing Sartaj Sahni, 1987 Interest in the field of parallel processing has soared in this decade Response to the annual conference held at Pheasant Run is clear proof in the early 1980s just over 100 papers were submitted each year in 1987 over 400 papers were considered Such heightened interest is both gratifying and challenging in that the increasingly demanding applications in science medicine and industry that result from these studies are dependent upon the parallel systems as computing resources The studies in this volume describe recent advances in all aspects of parallel distributed logic circuits impact of VLSI to parallel processor architecture various concurrent distributed parallel pipeline or multiple processor architectures processor memory interconnections computer networks distributed databases reliability and fault tolerance modeling and simulation techniques performance measurements operating systems languages algorithms mathematical analysis and various application studies A rigorous standard governed the paper selection process in an effort to insure that the proceedings reflect the state of the art in parallel processing theory design and applications Of vital interest to researchers engineers scientists programmers systems analysts managers and other interested in the design and application of parallel distributed processors and processing
