Naming Standards

Overview of Naming Standards

This section provides you with information you need to define all your database and form objects. It provides naming standards and header information for all your objects and files.

The naming standards are grouped into the following sections:

- Database objects (T302934T458266.htm#d_devnamedb)
- Form objects (T302934T458266.htm#d_devnameforms)
- File standards (T302934T458266.htm#d_filestand)
- PL/SQL Packages and Procedures (T302934T458266.htm#d_nsq2Dplsql)
- Reserved Words (T302934T458266.htm#d_nsq2Dresword)

Naming Standards and Definitions

In general, make names meaningful and brief. Do not use generic, all-purpose phrases like "COMMON", "MISC", "OTHER", or "UTILITY" in the name.

Database Objects

In addition to specific naming conventions for particular objects, all database objects should be named without using any special characters. Database object names should use only ASCII letters, numbers, and underscores, and they should always begin with a letter. Note that database object names are case-insensitive, so "Name" would be the same as "NAME".

Include header information when you create your objects. The header should include the following documentation

- Name
- Purpose
