Environmental Psychology Mirilia Bonnes,Gianfranco Secchiaroli,1995-06-22 This textbook provides a clear and comprehensive introduction to the rapidly expanding field of

environmental psychology The authors start with a review of the history of environmental psychology highlighting its interdisciplinary nature They trace its roots in architecture ecology and geography and examine the continuing relationship of these subjects to the psychological tradition The book then moves through key contemporary lines of research in the field contrasting models from perception and cognition such as those of Gibson and Brunswick with major social psychological approaches as represented by Lewin Barker and others The book concludes with an analysis of the most promising areas of research and practice

Experiencing New Worlds Jürg Wassmann, Katharina Stockhaus, 2007 The many different localities of the Pacific region have a long history of transformation under both pre and post colonial conditions More recently rates of local transformation have increased tremendously under post colonial regimes The forces of globalization which rapidly distribute commodities images and political and moral concepts across the region have presented Pacific populations with an unprecedented need and opportunity to fashion new and expanded understandings of their cultural and individual identities This volume the first in a new series examines the forces of globalization at different levels as they manifest themselves and operate across cultural cognitive and biographical dimensions of human life in the Pacific While posing familiar questions it offers new answers through the integration of cultural and psychological methods The contributors draw on practice theory cognitive science and the anthropology of space and place while exploring the key analytical rubrics of human agency memory and landscape

An Architecture of Place Randall S. Lindstrom, 2024-06-25 Challenging mainstream architecture's understandings of place this book offers an illuminating clarification that allows the idea's centrality in all aspects of everyday design thinking to be rediscovered or considered for the first time Rigorous but not dense practical but not trivialising the book unfolds on three fronts First it clearly frames the pertinent aspects of topology the philosophy of place importantly differentiating two concepts that architecture regularly conflates place and space Second it rejects the ubiquitous notion that architecture makes place and instead reasons that place is what makes architecture and the built environment possible that place calls for and to architecture and that architecture is thus invited to listen and respond Finally it turns to the matter of designing responses that result not just in more places of architecture demanding little of design nor merely in architecture with some sense of place demanding little more but rising above those responses that constitute an architecture of place demanding the greatest vigilance but offering the utmost freedom Opening up a term regarded as so common that its meaning is seldom considered the author reveals the actual depth and richness of place its innateness to architecture and its essentiality to practitioners clients educators and students including those in all spatial disciplines

Schatzki,2010-04-12 This book shows that a concept of activity timespace drawn from the work of Martin Heidegger provides new insights into the nature of activity society and history Although the book is a work of theory it has significant implications for the determination and course not just of activity but of sociohistorical change as well Drawing on empirical examples the book argues 1 that timespace is a key component of the overall space and time of social life 2 that interwoven timespaces form an essential infrastructure of important social phenomena such as power coordinated actions social organizations and social systems and 3 that history encompasses constellations of indeterminate temporalspatial events The latter conception of history in turn yields a propitious account of how the past exists in the present In addition because the concept of activity timespace highlights the teleological character of human action the book contains an extensive defense of the teleological character of such allegedly ateleological forms of activity as emotional and ceremonial actions Since finally the book s ideas about timespace and activity as an indeterminate event derive from an interpretation of Heidegger the work furthers understanding of the relevance of his thought for social and historical theory The book combines textual interpretation theoretical argumentation and empirical substantiation Many of its empirical examples are taken from the Blue Grass Horse Country around Lexington Kentucky
