D. Walker,D. Christopher Brooks,Kem Saichaie,Christina I. Petersen,2023-07-03 While Active Learning Classrooms or ALCs offer rich new environments for learning they present many new challenges to faculty because among other things

they eliminate the room's central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed. The importance of learning how to use these classrooms well and to capitalize on their special features is paramount. The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls. This book provides an introduction to ALCs briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based practical guidance on how to use these unfamiliar spaces effectively. Among the questions this book addresses are: How can instructors mitigate the apparent lack of a central focal point in the space? What types of learning activities work well in the ALCs and take advantage of the affordances of the room? How can teachers address familiar classroom management challenges in these unfamiliar spaces? If assessment and rapid feedback are critical in active learning, how do they work in a room filled with circular tables and no central focus point? How do instructors balance group learning with the needs of the larger class? How can students be held accountable when many will necessarily have their backs facing the instructor? How can instructors evaluate the effectiveness of their teaching in these spaces? This book is intended for faculty preparing to teach in or already working in this new classroom environment for administrators planning to create ALCs or experimenting with provisionally designed rooms and for faculty developers helping teachers transition to using these new spaces.

International Day of Persons with Disabilities - Children's Disabilities Olaf Kraus de Camargo, Thorsten Langer, Nihad A. Almasri, 2024-10-29. The International Day of Persons with Disabilities (IDPD) serves to globally promote an understanding of disability issues and mobilize support for the dignity, rights, and well-being of persons with disabilities. The theme of the most recent United Nations Day was transformative solutions for inclusive development: the role of innovation in fuelling an accessible and equitable world. It is in this spirit that *Frontiers in Public Health* is launching a new article collection inspired by this UN day with a specific focus on children with disabilities and how innovative public health solutions to support them can contribute to making the world a more equitable and prosperous world for all.

Oconee River User's Guide Joe Cook, 2019-04-01. From its small headwaters in Hall County, Georgia, the North Oconee winds nearly seventy miles tumbling over granite outcroppings at Hurricane Shoals and on to Athens, where it meets the Middle Oconee. From there, the Oconee courses 220 miles through east central Georgia to meet the Ocmulgee convergence near Lumber City, forming the Altamaha River, which flows to the Atlantic Ocean. As the Oconee's importance as a recreational amenity has grown over the years, the University of Georgia, students and instructors, the Altamaha Riverkeeper, Georgia River Network, Upper Oconee Watershed Network, and the North Oconee River Greenway have worked together to create a plan for water trails and recreational trails along the river as it flows through Athens. In the *Oconee River User's Guide*, both novice and experienced water sports enthusiasts will find all the information required to enjoy the river, including detailed maps, put-in and take-out suggestions, fishing and camping locations, mile-by-mile points of interest, and an illustrated

guide to the animals and plants commonly seen in and around the river Daytrippers will enjoy Joe Cook's fascinating description of the cultural and natural heritage of this richly diverse waterway The Oconee River is home to seventy four species of fish including the Altamaha shiner found only in the Altamaha River basin as well as thirty seven species of salamanders and frogs and forty three species of reptiles including the American alligator found in the lower Oconee downstream of Milledgeville FEATURES an introduction and overview of the river chapters describing each river section with detailed maps and notes on river access and points of interest a compact natural history guide featuring species of interest found along Georgia's rivers notes on safety and boating etiquette a fishing primer notes on organizations working to protect the river
