Sharma Chakravarthy, Qingchun Jiang, 2009-04-09 In recent years a new class of applications has come to the forefront primarily due to the advancement in our ability to collect data from multitudes of devices and process them efficiently These include homeland security applications sensor pervasive computing applications various kinds of monitoring applications and even traditional applications belonging to financial computer network management and telecommunication domains These applications need to process data continuously and as long as data is available from one or more sources The sequence of data items continuously generated by sources is termed a data stream Because of the possible never ending nature of a data stream the amount of data to be processed is likely to be unbounded In addition timely detection of interesting changes or patterns or aggregations over incoming data is critical for many of these applications Furthermore the data arrival rates may fluctuate over a period of time and may be bursty at times For most of these applications Quality of Service or QoS requirements such as response time memory usage and throughput are extremely important These application requirements make it infeasible to simply load the incoming data streams into a persistent store and process them efficiently using currently available database management techniques      **CAAD futures 1997** Richard Junge, 2012-12-06 Since the establishment of the CAAD futures Foundation in 1985 CAAD experts from all over the world meet every two years to present and at the same time document the state of art of research in Computer Aided Architectural Design The history of CAAD futures started in the Netherlands at the Technical Universities of Eindhoven and Delft where the CAAD futures Foundation came into being Then CAAD futures crossed the oceans for the first time the third CAAD futures in 1989 was held at Harvard University Next stations in the evolution were in 1991 Swiss Federal Institute of Technology the ETC Zurich In 1993 the conference was organized by Carnegie Mellon University Pittsburgh and in 1995 by National University Singapore CAAD futures 1995 marked the world wide nature by organizing it for the first time in Asia Proceedings of CAAD futures held biannually provide a complete review of the state of research in Computer Aided Architectural Design      Principles of Polymer Systems, Sixth Edition Ferdinand Rodriguez, Claude Cohen, Christopher K.
