Kahn, Mayoor Mohan, 2020-12-28 This practical book introduces readers to the essential business aspects of innovation and new product planning The product planning process is discussed across two broad themes product development and product management Importantly the book emphasizes the 21st century strategic and creative mindset necessary to drive business innovation activities in a concise yet comprehensive manner The book delves into the front end of innovation and formal product development activities examining the topics of opportunity identification concept generation and evaluation technical development product design testing launch strategies product management life cycle management brand management and vital elements for international success There are stand alone notes that serve to apprise readers on related topics such as the use of agile product development methodologies the formation of business entities and recommended best practices for new product development The book excels at providing relevant examples and applied tools that augment the concepts to offer valuable connections to real world product planning efforts This book is particularly useful as a guide to learning the fundamental concepts and strategies associated with innovation and new product planning Among student audiences upper level undergraduate and first year graduate students are likely to benefit as the book embraces its position to serve as a primer on product development and management **Business Forecasting** Michael Gilliland, Len Tashman, Udo Sglavo, 2016-01-05 A comprehensive collection of the field s most provocative influential new

work Business Forecasting compiles some of the field's important and influential literature into a single comprehensive reference for forecast modeling and process improvement. It is packed with provocative ideas from forecasting researchers and practitioners on topics including accuracy metrics benchmarking modeling of problem data and overcoming dysfunctional behaviors. Its coverage includes often overlooked issues at the forefront of research such as uncertainty randomness and forecastability as well as emerging areas like data mining for forecasting. The articles present critical analysis of current practices and consideration of new ideas. With a mix of formal rigorous pieces and brief introductory chapters the book provides practitioners with a comprehensive examination of the current state of the business forecasting field. Forecasting performance is ultimately limited by the forecastability of the data. Yet failing to recognize this many organizations continue to squander resources pursuing unachievable levels of accuracy. This book provides a wealth of ideas for improving all aspects of the process including the avoidance of wasted efforts that fail to improve or even harm forecast accuracy. Analyzes the most prominent issues in business forecasting. Investigates emerging approaches and new methods of analysis. Combines forecasts to improve accuracy. Utilizes Forecast Value Added to identify process inefficiency. The business environment is evolving and forecasting methods must evolve alongside it. This compilation delivers an array of new tools and research that can enable more efficient processes and more accurate results. Business Forecasting provides an expert's eye view of the field's latest developments to help you achieve your desired business outcomes.

Networks for a Sustainable World Luis M. Camarinha-Matos, Xavier Boucher, Hamideh Afsarmanesh, 2010-09-21 Collaborative Networks for a Sustainable World Aiming to reach a sustainable world calls for a wider collaboration among multiple stakeholders from different origins as the changes needed for sustainability exceed the capacity and capability of any individual actor In recent years there has been a growing awareness both in the political sphere and in civil society including the business sectors on the importance of sustainability Therefore this is an important and timely research issue not

only in terms of systems design but also as an effort to borrow and integrate contributions from different disciplines when designing and organizing those systems. The discipline of collaborative networks, especially which has already emerged in many application sectors, shall play a key role in the implementation of effective sustainability strategies. PRO VE 2010 focused on sharing knowledge and experiences as well as identifying directions for further research and development in this area. The conference discussed models, infrastructures, support tools, and governance principles developed for collaborative networks as important resources to support multi-stakeholder sustainable developments. Furthermore, the challenges of this theme open new research directions for CNs. PRO VE 2010 held in St. **Current Methods of Construction Design** Štefan

Medvecký, Slavomír Hrček, Róbert Kohár, František Brumerčík, Viera Konstantová, 2019-12-17. This conference proceeding presents contributions to the 59th International Conference of Machine Design ICMD 2018 organized by the University of Ilona Faculty of Mechanical Engineering, Department of Design and Mechanical Elements. Discussing innovative solutions applied in engineering, the latest research and developments, and guidance on improving the quality of university teaching, it covers a range of topics including machine design and optimization, engineering analysis, tribology, and nanotechnology, additive technologies, hydraulics and fluid mechanisms, modern materials and technology, biomechanics, biomimicry, and innovation.
