

Classify each triangle as *equilateral*, *isosceles*, or *scalene*.

3. $\triangle ABD$

equilateral

4. $\triangle BED$

Isosceles

For the triangle, find x and the measure of each side.

5. $\triangle LMN$ is an isosceles triangle, with $LM = LN$, $LM = 3x - 2$, $LN = 2x + 1$, and $MN = 5x - 2$.

$$3x - 2 = 2x + 1$$

$$x = 3$$

4.2 - Triangle Angle Sum (180 rule)

Find each measure.

6. $m\angle 1$

$$180 - 101 - 76 = 104$$

7. $m\angle 4$

$$180 - (65 + 70) = 45$$

8. $m\angle 3$

$$180 - 115 = 65$$

9. $m\angle 2$

$$36 + 65 = 101$$

79

4.3 Congruent Triangles

Show that the triangles are congruent by identifying all congruent corresponding parts. Then write a congruence statement for the triangles.

10.

$$\overline{MN} \cong \overline{PN}$$

$$\overline{NL} \cong \overline{NQ}$$

$$\overline{LN} \cong \overline{QN}$$

$$\angle M \cong \angle P$$

$$\angle L \cong \angle Q$$

$$\angle MNL \cong \angle PNQ$$

$$\triangle MNL \cong \triangle PNQ$$

4.4 - 4.5 Congruence Shortcuts

Identify the postulate or shortcut that can be used to prove the triangles are congruent.

Learning and Teaching Mathematics—Weaving the Nexus of Values, Attitudes and Beliefs Tasos Barkatsas, 2025-10-02
This collection represents two decades of dedicated and rigorous empirical research spanning across multiple dimensions of mathematics education Through a theoretical approach that highlights the significance of analytical depth in the research process the studies included in this book explore significant themes in Mathematics Education that span across mathematics learning student attitudes toward mathematics beliefs engagement values motivation gender differences technology integration and effective pedagogical strategies over the past two decades The scope of this work makes a substantial contribution to the ongoing discourse on best practices in mathematics teaching equity in mathematics education and the evolving and significant role of inclusive mathematics education in the 21st century and beyond One of the key strengths of this collection can be found in its simultaneous focus on local and global perspectives Nexus Network Journal 14,3 Kim Williams, 2014-03-07 The Winter 2012 vol 14 no 3 issue of the Nexus Network Journal features seven original papers dedicated to the theme Digital Fabrication Digital fabrication is changing architecture in fundamental ways in every phase from concept to artifact Projects growing out of research in digital fabrication are dependent on software that is entirely surface oriented in its underlying mathematics Decisions made during design prototyping fabrication and assembly rely on codes scripts parameters operating systems and software creating the need for teams with multidisciplinary expertise and different skills from IT to architecture design material engineering and mathematics among others The papers grew out of a Lisbon symposium hosted by the ISCTE Instituto Universitario de Lisboa entitled Digital Fabrication A State of the Art The issue is completed with four other research papers which address different mathematical instruments applied to architecture including geometric tracing systems proportional systems descriptive geometry and correspondence analysis The issue concludes with a book review **Nexus Network Journal 10,2** Kim Williams, 2008-12-16 This volume features a collection of papers dedicated to Canons of Form Making in honor of the 500th anniversary of the birth of architect Andrea Palladio 1508-1580 Theorist as well as practitioner Palladio's architecture was based on well defined canons that he had gleaned from studying the treatises as well as the remains of architecture from antiquity Palladio himself left to posterity not only his large corpus of built works but his *Quattro libri d'architettura* Three of the papers in this issue are specifically about Palladio and his work The other papers deal with canons of form making ancient and contemporary Nexus Network Journal 8,1, 2006-07-14 From ancient to modern architects have looked for fundamental underlying principles of geometry and proportion on which to found their designs Such principles not only provide an order for the formal elements they ground the architecture in timeless values and provide an order for the formal elements they ground the architecture in timeless values and provide a source of cultural meaning This book illustrates the use of fundamental principles of geometry and proportion in two ancient cultures the Bronze Age and the Roman Age as well as in twentieth century North America Rethinking

Learning in an Age of Digital Fluency Maggi Savin-Baden, 2015-03-05 This is a book that I am going to have to own and will work to find contexts in which to recommend. It cuts obliquely through so many important domains of evidence and scholarship that it cannot but be a valuable stimulus. Hamish Macleod, University of Edinburgh. Digital connectivity is a phenomenon of the 21st century and while many have debated its impact on society, few have researched the relationship between the changes taking place and the actual impact on learning. *Rethinking Learning in an Age of Digital Fluency* examines what kind of impact an increasingly connected environment is having on learning and what kind of culture it is creating within learning settings. Engagement with digital media and navigating through digital spaces with ease is something that many young people appear to do well, although the tangible benefits of this are unclear. This book therefore will present an overview of current research and practice in the area of digital tethering whilst examining how it could be used to harness new learning and engagement practices that are fit for the modern age. Questions that the book also addresses include: Is being digital tethered a new learning nexus? Are social networking sites spaces for co-production of knowledge and spaces of inclusive learning? Are students who are digitally tethered creating new learning maps and pedagogies? Does digital tethering enable students to use digital media to create new learning spaces? This is fascinating and at times controversial text that engages with numerous aspects of digital learning amongst undergraduate students, including mobile learning, individual and collaborative learning, viral networking, self-publication and identity dissemination. It will be of enormous interest to researchers and students in education and educational psychology.

Foundations of Augmented Cognition Dylan D. Schmorow, Cali M. Fidopiastis, 2013-06-12 This book constitutes the refereed proceedings of the 5th International Conference on Augmented Cognition (AC 2013) held as part of the 15th International Conference on Human Computer Interaction (HCI 2013) held in Las Vegas, USA, in July 2013, jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCI 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 81 contributions was carefully reviewed and selected for inclusion in the AC proceedings. The papers are organized in the following topical sections: augmented cognition in training and education; team cognition; brain activity measurement; understanding and modeling cognition; cognitive load; stress and fatigue; applications of augmented cognition.

Russian Fractals in Indigenous Artifacts Abdul Karim Bangura, Leonid A. Zhigun, 2025-06-22 This book is the first comprehensive work on Russian Fractals in indigenous artifacts. While existing works focus on universal phenomena such as liquid crystal or finance, none explore the intersection between Fractals and Russia. *Russian Fractals in Indigenous Artifacts* therefore investigates how indigenous Russian cultures have a wonderful Fractal heritage that was originally tied to socially

just and ecologically sustainable social practices including those of indigenous northern groups such as the Yakut Fractal designs originally allowed unalienated value both human and nonhuman to be visible thereby enabling just and sustainable living This book also examines how the tsarist elite encouraged the creation of unique creative masterpieces developing and strengthening traditional crafts and art of indigenous people hence Fabergé or imperial architecture Today the challenge for contemporary Russia is to reestablish the relationship between the social and ecological sustainability of indigenous cultures and practices for which we can now provide modeling and analysis Lay attempts at this have only limited success as they have based the attempts on a purely religious basis which recognizes the ecological aspects but often succumbs to authoritarian nationalism However the freely accession of indigenous peoples to Russia for the sake of national liberation has had a positive effect on enriching them with spirituality and creativity by Fractal artifacts through friendly exchanges with one another In Russian Fractals in Indigenous Artifacts Bangura and Zhigun express why there is a need for a forward thinking Fractal renaissance in Russia bringing together contemporary computational and scientific analyses with these ecologically and socially sustainable traditions

The Digital Cast of Being Michael Eldred, 2013-05-02 We live today surrounded by countless digital gadgets and navigate through cyberspace as if it were the most natural thing in the world This digital cast of being however comes from a long history of philosophical and mathematical thinking in which the Western will to productive power over movement has attained its consummation This study traces the digital dissolution of beings from the Pythagoreans Plato and Aristotle's ontology via Cartesian mathematical science through to our digitized economy and telecommunications With an appendix reinterpreting quantum mechanical indeterminacy phenomenologically

The Early Modern Global South in Print Sandra Young, 2016-03-23 Early modern geographers and compilers of travel narratives drew on a lexicon derived from cartography s seemingly unchanging coordinates to explain human diversity Sandra Young s inquiry into the partisan knowledge practices of early modernity brings to light the emergence of the early modern global south Young proposes a new set of terms with which to understand the racialized imaginary inscribed in the scholarly texts that presented the peoples of the south as objects of an inquiring gaze from the north Through maps images and even textual formatting equivalences were established between new worlds many of them long known to European explorers she argues in terms that made explicit the divide between north and south This book takes seriously the role of form in shaping meaning and its ideological consequences Young examines in turn the representational methodologies or artes deployed in mapping the whole world illustrating creating charts for navigation noting down observations collecting and cataloguing curiosities reporting events formatting materials and editing and translating old sources By tracking these methodologies in the lines of beauty and evidence on the page we can see how early modern producers of knowledge were able to attribute alterity to the southern climes of an increasingly complex world while securing their own place within it
