Federal Register, 2000-07-07 *Historical Studies in the Physical Sciences* Russell McCormach, 1982 Toward a Livable World Leo Szilard, 1987 Leo Szilard conceived of the possibility of nuclear fission sustained by a chain reaction years before it was achieved in the laboratory He was also one of the initiators of the atomic bomb project in the United States Yet he dedicated his final years to the causes of understanding and sustaining life The eminent physicist became a biologist and a vital force calling for the control of nuclear and other weapons This book documents Szilard's energetic attempts to influence public policy on arms control and disarmament issues both through open political processes and statements and through behind-the-scenes contacts with Washington power sources and a remarkable exercise in personal diplomacy with Nikita Khrushchev Many of the issues Szilard deals with in this valuable record of the years 1947-1963 are still crucial today His opposition to antiballistic missile systems his proposal for a Washington-Moscow hot line his work on the Pugwash conferences that brought together scientists from the East and the West his pivotal role in the creation of the Council for a Livable World his advocacy of a nuclear policy of no first use and restricted retaliation and his support of minimum deterrence in place of an overwhelming counterforce capability all these matters are as important in the 1980s as they were in the 1950s and 1960s Helen S Hawkins and G Allen Greb are affiliated with the Institute on Global Conflict and Cooperation University of California San Diego The late Gertrud Weiss Szilard also served as coeditor of the first two volumes of her husband's work *The Collected Works of Leo Szilard: Scientific Papers* and *Leo Szilard: His Version of the Facts* Barton J Bernstein is professor in the Department of History Stanford University

Face: Selected Correspondence Of Sidney Coleman Aaron Sidney Wright,Diana Coleman,David Kaiser,2022-08-18

Sidney Coleman 1937 2007 was a renowned theoretical physicist who taught for more than forty years at Harvard University He contributed critical work on quantum field theory high energy particle physics and cosmology He was also a remarkably effective teacher who introduced generations of physicists to quantum field theory mentoring several leading members in the field His sense of humor and wit became legendary This selection of his previously unpublished correspondence illuminates changes in theoretical physics and in academic life over the course of Coleman s illustrious career The letters show the depth of Coleman s activities and interests including science fiction space travel and the US counter culture The volume also includes Coleman s legendary lecture Quantum Mechanics in Your Face *NASA Technical Memorandum* ,1991

Recollections of "Tucson Operations" M.A. Gordon,2006-03-30 A personal account of the evolution of millimeter wave astronomy at the US National Radio Astronomy Observatory The author recounts the behind the scenes activities of the staff from the beginnings at Kitt Peak to the closing of the Tucson offices **Dental Science in a New Age** Ruth Roy Harris,1989 *Treaties in Force* ,1996 **Nuclear Power** National Research Council,Division on Engineering and Physical Sciences,Commission on Engineering and Technical Systems,Energy Engineering Board,Committee on Future Nuclear Power Development,1992-02-01 The construction of nuclear power plants in the United States is stopping as regulators reactor manufacturers and operators sort out a host of technical and institutional problems This volume summarizes the status of nuclear power analyzes the obstacles to resumption of construction of nuclear plants and describes and evaluates the technological alternatives for safer more economical reactors Topics covered include Institutional issues including regulatory practices at the federal and state levels the growing trends toward greater competition in the generation of electricity and nuclear and nonnuclear generation options Critical evaluation of advanced reactors covering attributes such as cost construction time safety development status and fuel cycles Finally three alternative federal research and development programs are presented *Freedom's Laboratory* Audra J. Wolfe,2020-08-04 The Cold War ended long ago but the language of science and freedom continues to shape public debates over the relationship between science and politics in the United States Scientists like to proclaim that science knows no borders Scientific researchers follow the evidence where it leads their conclusions free of prejudice or ideology But is that really the case In Freedom s Laboratory Audra J Wolfe shows how these ideas were tested to their limits in the high stakes propaganda battles of the Cold War Wolfe examines the role that scientists in concert with administrators and policymakers played in American cultural diplomacy after World War II During this period the engines of US propaganda promoted a vision of science that highlighted empiricism objectivity a commitment to pure research and internationalism Working both overtly and covertly wittingly and unwittingly with governmental and private organizations scientists attempted to decide what exactly they meant when they referred to scientific freedom or the US ideology More frequently however they defined American science merely as the opposite of Communist science

Uncovering many startling episodes of the close relationship between the US government and private scientific groups Freedom s Laboratory is the first work to explore science s link to US propaganda and psychological warfare campaigns during the Cold War Closing in the present day with a discussion of the 2017 March for Science and the prospects for science and science diplomacy in the Trump era the book demonstrates the continued hold of Cold War thinking on ideas about science and politics in the United States **Chemical News and Journal of Physical Science** ,1895 Chemical News and Journal of Industrial Science ,1923 **Deadly Cultures** Mark Wheelis,2006-01-30 Deadly Cultures offers an historical analysis of biological weapons since 1945 and addresses three central issues why states have continued or begun programs for acquiring biological weapons why states have terminated such programs and how states have demonstrated that they have truly terminated their biological weapons programs **The Chemical News and Journal of Industrial Science** ,1923 **Telegraphic Journal and Monthly Illustrated Review of Electrical Science** ,1923 **The Chemical News and Journal of Physical Science** ,1895 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1971 First multi year cumulation covers six years 1965 70 Journal of Education ,1914 *The Journal of Education* ,1895
