Vardy, 1998-10-01 **The Crisis in Global Ethics and the Future of Global Governance** Peter Burdon, Klaus Bosselmann, Kirsten Engel, 2019 p p1 margin 0 0px 0 0px 0 0px 0 0px font 10 0px Arial This thought provoking book stimulates dialogue and action on the role of global ethics in the governance of individual societies and the international order Such inquiry is imperative given the extraordinary challenges that face the world today Leading figures in environmental ethics philosophy and law approach questions surrounding global ethics and governance from a range of cultural and philosophical perspectives Theology on a Defiant Earth Jonathan Cole, Peter Walker, 2022-11-01 Humanity operates like a force of nature capable of affecting the destiny of the Earth System This epochal shift profoundly alters the relationship between humankind and the Earth presenting the conscious thinking human animal with an unprecedented dilemma As human power has grown over the Earth so has the power of nature to extinguish human life The emergence of the Anthropocene has settled any question of the place of human beings in the world we stand inescapably at its center The outstanding question which forms the impetus and focus for this book remains What kind of human being stands at the center of the world And what is the nature of that world Unlike the scientific fact of human centeredness this is a moral question a question that brings theology within the scope of reflection on the critical failures of human irresponsibility Much of Christian theology has so far flunked the test of engaging the reality of the Anthropocene The authors of these original essays begin with the premise that it is time to push harder at the questions the Anthropocene poses for people of faith

Ignoring Nature No More Marc Bekoff, 2013-06-01 For far too long humans have been ignoring nature As the most dominant overproducing overconsuming big brained big footed arrogant and invasive species ever known we are wrecking the planet at an unprecedented rate And while science is important to our understanding of the impact we have on our environment it alone does not hold the answers to the current crisis nor does it get people to act In Ignoring Nature No More

Marc Bekoff and a host of renowned contributors argue that we need a new mind set about nature one that centers on empathy compassion and being proactive This collection of diverse essays is the first book devoted to compassionate conservation a growing global movement that translates discussions and concerns about the well being of individuals species populations and ecosystems into action Written by leading scholars in a host of disciplines including biology psychology sociology social work economics political science and philosophy as well as by locals doing fieldwork in their own countries the essays combine the most creative aspects of the current science of animal conservation with analyses of important psychological and sociocultural issues that encourage or vex stewardship The contributors tackle topics including the costs and benefits of conservation behavioral biology media coverage of animal welfare conservation psychology and scales of conservation from the local to the global Taken together the essays make a strong case for why we must replace our habits of domination and exploitation with compassionate conservation if we are to make the world a better place for nonhuman and human animals alike

The Nutshell Technique Jill Chamberlain, 2016-03-01 Veteran script consultant Jill Chamberlain discovered in her work that an astounding 99 percent of first time screenwriters don't know how to tell a story These writers may know how to format a script write snappy dialogue and set a scene They may have interesting characters and perhaps some clever plot devices But invariably while they may have the kernel of a good idea for a screenplay they fail to tell a story What the 99 percent do instead is present a situation In order to explain the difference Chamberlain created the Nutshell Technique a method whereby writers identify eight dynamic interconnected elements that are required to successfully tell a story Now for the first time Chamberlain presents her unique method in book form with *The Nutshell Technique Crack the Secret of Successful Screenwriting* Using easy to follow diagrams nutshells she thoroughly explains how the Nutshell Technique can make or break a film script Chamberlain takes readers step by step through thirty classic and contemporary movies showing how such dissimilar screenplays as *Casablanca* *Chinatown* *Pulp Fiction* *The Usual Suspects* *Little Miss Sunshine* *Juno* *Silver Linings Playbook* and *Argo* all have the same system working behind the scenes and she teaches readers exactly how to apply these principles to their own screenwriting Learn the Nutshell Technique and you'll discover how to turn a mere situation into a truly compelling screenplay story

Climate Change Ethics and the Non-Human World Brian G. Henning, Zack Walsh, 2020-02-25 This book examines from different perspectives the moral significance of non human members of the biotic community and their omission from climate ethics literature The complexity of life in an age of rapid climate change demands the development of moral frameworks that recognize and respect the dignity and agency of both human and non human organisms Despite decades of careful work in non anthropocentric approaches to environmental ethics recent anthologies on climate ethics have largely omitted non anthropocentric approaches This multidisciplinary volume of international scholars tackles this lacuna by presenting novel work on non anthropocentric approaches to climate ethics Written in an accessible style the text incorporates sentiocentric biocentric and ecocentric perspectives on climate

change With diverse perspectives from both leading and emerging scholars of environmental ethics geography religious studies conservation ecology and environmental studies this book will offer a valuable reading for students and scholars of these fields

A God Who Cares? Ernst Conradie, 2025-02-26 This monograph may be read as a constructive supplement to Volume 4 of the series entitled *An Earthed Faith Telling the Story amid the Anthropocene* Volume 4 of this series is on the Christian doctrine of providence and is entitled *Making Room for the Story to Continue* In addition to an extended introduction on the state of the debate in the field this monograph includes three constructive essays on the doctrine of providence employing the traditional Reformed distinction between *conservatio gubernatio* and *concursus* as aspects of God's providence as well as a concluding essay provocatively entitled *Who Cares a Damn* The argument of this contribution may be captured in the following way

- 1 That God's providence is best understood in terms of the deeply held Christian conviction that God cares for every creature and not in terms of Greek assumptions around a pervading rational world order
- 2 That *conservatio* and *gubernatio* have found rough secular equivalents in global debates on sustainability mitigation and adaptation in the context of climate change
- 3 That *conservatio* and *gubernatio* are typically in tension with each other when it comes to the question whether God maintains order in nature and society or whether God transforms unjust orders the call for ecojustice
- 4 That *concursus* is not only an implication of *conservatio* and *gubernatio* but also captures the heart of the problem posed by the advent of the Anthropocene namely that some humans have become a geological force of nature while God's agency has become sidelined or usurped by the Promethean quest to become divine

In each of these essays a highly constructive contribution is offered that advances the debate in eco theology by placing providence in the context of the shift from the Holocene to the Anthropocene The method adopted is a constructive argument based on a critical review of the available literature This monograph is scholarly and is addressed to other scholars in the fields of eco theology systematic theology and Reformed theology

The Oxford Handbook of Environmental Ethics Stephen Mark Gardiner, Allen Thompson, 2017 We live during a crucial period of human history on Earth Anthropogenic environmental changes are occurring on global scales at unprecedented rates Despite a long history of environmental intervention never before has the collective impact of human behaviors threatened all of the major bio systems on the planet Decisions we make today will have significant consequences for the basic conditions of all life into the indefinite future What should we do How should we behave In what ways ought we organize and respond The future of the world as we know it depends on our actions today A cutting edge introduction to environmental ethics in a time of dramatic global environmental change this collection contains forty five newly commissioned articles with contributions from well established experts and emerging voices in the field Chapters are arranged in topical sections social contexts history science economics law and the Anthropocene who or what is of value humanity conscious animals living individuals and wild nature the nature of value truth and goodness practical reasons hermeneutics phenomenology and aesthetics how things ought to matter consequences duty and obligation

character traits caring for others and the sacred essential concepts responsibility justice gender rights ecological space risk and precaution citizenship future generations and sustainability key issues pollution population energy food water mass extinction technology and ecosystem management climate change mitigation adaptation diplomacy and geoengineering and social change conflict pragmatism sacrifice and action Each chapter explains the role played by central theories ideas issues and concepts in contemporary environmental ethics and their relevance for the challenges of the future

Rewilding Our Hearts Marc Bekoff, 2014-10-20 In wildlife conservation rewilding refers to restoring habitats and creating corridors between preserved lands to allow declining populations to rebound Marc Bekoff one of the world's leading animal experts and activists here applies rewilding to human attitudes *Rewilding Our Hearts* invites readers to do the essential work of becoming reenchanted with the world acting from the inside out and dissolving false boundaries to truly connect with both nature and themselves

Spectrality and Survivance Marija Grech, 2022-05-16 The notion of the Anthropocene is founded on the premise that traces of human activity on the earth will remain legible in the geological strata for millions of years to come showing evidence of an anthropogenic signature inscribed in the rock by the human species *Spectrality and Survivance* shows how embedded in this understanding of the Anthropocene is a speculative and specular gesture that transforms the notion of the future into an anthropocentric reflection of the present prohibiting any true engagement with the possibility of a non anthropocentric and post anthropocenic world In this volume Marija Grech develops an alternative conceptual paradigm from which to think the Anthropocene beyond any limited notion of human language human thought human systems of meaning or even a human world Grech considers how the geological trace of the Anthropocene might be said to survive outside of the possibility of any human readership and how the very survival of the human in and beyond the Anthropocene might necessitate such thought

After the Death of Nature Kenneth Worthy, Elizabeth Allison, Whitney Bauman, 2018-11-09 Carolyn Merchant's foundational 1980 book *The Death of Nature: Women, Ecology and the Scientific Revolution* established her as a pioneering researcher of human nature relations Her subsequent groundbreaking writing in a dozen books and over one hundred peer reviewed articles have only fortified her position as one of the most influential scholars of the environment This book examines and builds upon her decades long legacy of innovative environmental thought and her critical responses to modern mechanistic and patriarchal conceptions of nature and women as well as her systematic taxonomies of environmental thought and action Seventeen scholars and activists assess praise criticize and extend Merchant's work to arrive at a better and more complete understanding of the human place in nature today and the potential for healthier and more just relations with nature and among people in the future Their contributions offer personal observations of Merchant's influence on the teaching research and careers of other environmentalists

A Philosophical Journey into the Anthropocene Agostino Cera, 2023-01-09 *A Philosophical Journey into the Anthropocene: Discovering Terra Incognita* presents the Anthropocene not only as a geological epoch but rather as the potential meta-critique of our age and

the most faithful expression of the current zeitgeist Insofar as the Anthropocene establishes that the human agency as technological omni power represents a global geophysical force capable of altering the destiny of the Earth system the coming of this new epoch shows that technology now embodies the subject of both history and nature In this totalized form technology achieves the status of an integral epochal phenomenon the new environment for human life Agostino Cera argues that the technisches Zeitalter age of technology outlined by twentieth century philosophical thought is fully realized in the Anthropocene and that a more appropriate name for this planetary framework is therefore Technocene The book develops along four basic directions epistemological ontological anthropological and ethical It argues that the Anthropocene is something radically new a terra incognita or an epistemic hyperobject with a geo historical barycenter giving rise to an unprecedented form of reification of nature pet ification of nature an unexpected version of anthropocentrism Aidosean Prometheanism and an unpredictable ethical paradox paradox of omni responsibility
