Planet Of Slums:

Planet of Slums Mike Davis, 2006 Celebrated urban theorist lifts the lid on the effects of a global explosion of disenfranchised slum dwellers According to the United Nations more than one billion people now live in the slums of the cities of the South In this brilliant and ambitious book Mike Davis explores the future of a radically unequal and explosively unstable urban world From the sprawling barricadas of Lima to the garbage hills of Manila urbanization has been disconnected from industrialization even economic growth Davis portrays a vast humanity warehoused in shantytowns and exiled from the formal world economy He argues that the rise of this informal urban proletariat is a wholly original development unforeseen by either classical Marxism or neoliberal theory Are the great slums as a terrified Victorian middle class once imagined volcanoes waiting to erupt Davis provides the first global overview of the diverse religious ethnic and political movements competing for the souls of the new urban poor He surveys Hindu fundamentalism in Bombay the Islamist resistance in Casablanca and Cairo street gangs in Cape Town and San Salvador Pentecostalism in Kinshasa and Rio de Janeiro and revolutionary populism in Caracas and La Paz Planet of Slums ends with a provocative meditation on the war on terrorism as an incipient world war between the American empire and the slum poor *Planet of Slums* Mike Davis, 2017

Body Parts on Planet Slum Lisa Beljuli Brown, 2011-10-01 Based on a year's research from within a Brazilian slum this study follows a series of unemployed women who watch up to six hours of telenovelas a day often in the midst of arduous physical labour in the home The women suffer in relation to their bodies but simultaneously invest in a masochistic glorification of suffering that links their lives to the soap operas revealing disturbing valuations of the female body that traverse reality and fiction Through its exploration of this daily integration of real suffering and fictional glamour and wealth Body Parts on Planet Slum reveals how fantasy and social exclusion can together induce a form of psychological survivalism enabling these women to reconfigure the central features of their existence their suffering pleasure sexuality and embodiment

The Invisible Houses Gonzalo Lizarralde, 2014-10-30 Winner of the ACSA AIA Housing Design Education Award There is an increased interest among architects urban specialists and design professionals to contribute to solve the housing problem in developing countries The Invisible Houses takes us on a journey through the slums and informal settlements of South Africa India Colombia Honduras El Salvador Cuba Haiti and many other countries of the Global South revealing the challenges of and opportunities for improving the fate of millions of poor families Stressing the limitations of current approaches to housing development Gonzalo Lizarralde examines the short mid and long term consequences of housing intervention The book covers among others the issues of planning design infrastructure and project management It explains the different variables that need to be addressed and the causes of common failures and mistakes while outlining successful strategies based on embracing a sustained engagement with the complexity of processes that are generally invisible

Naked Cities - Struggle in the Global Slums Mute, 2006-09 According to UN research data by 2030 half of

the world's population will be living in slums Meanwhile in Durban residents of Forman and Kennedy Road settlements risk arrest and police violence to protest forced eviction and demand clean drinking water and sanitation The statistics are not supposed to talk back This issue of Mute largely sparked by Mike Davis claim that in the megaslums Muhammad and the Holy Ghost have superseded Marx considers another view of the world's burgeoning naked cities Where the populace are refugees without rights or basic amenities are new forms of political action emerging Texts by Amita Baviskar Iain Boal Anna Deuze Michael Edwards Melanie Gilligan Anthony Iles Demetra Kotouza Penny Koutrolikou Josaphat Robert Large Felix Morisseau Leroy Kevin Pina Richard Pithouse Benedict Seymour and Rachel Weber **Slum Tourism** Fabian Frenzel, Koens, Malte Steinbrink, 2012 This multidisciplinary collection is unique both in its conceptual and empirical breadth

Neoliberalism or Neocollective Rural China Xinyu Lu, 2024-12-01 This book presents a groundbreaking critique of neo liberal interpretations of global agricultural development challenging dominant narratives with nuanced analyses rooted in historical and theoretical frameworks It delves into diverse paths of agrarian transformation from the American Path to the Prussian Path examining the complexities of state intervention land ownership and socio political dynamics Furthermore it introduces an alternative vision for agricultural development the construction of Neo collective Rural China Through meticulous examination of case studies spanning China Russia and beyond it unveils the intricacies of rural economies migrant worker trends and grassroots innovations Emphasizing the need for inclusive policies and international collaboration this work reimagines strategies for sustainable growth in the Global South advocating for sovereignty equity and solidarity A compelling synthesis of scholarship it offers fresh insights into the multifaceted challenges facing contemporary agricultural development

Design Ethics beyond Duty and Virtue Philippe d'Anjou, 2017-06-20 Freedom is compelling in design it has to be acknowledged accepted and comprehended in all its existential complexity to better understand and engage the intricate ethical domain of design practice The book addresses that issue by thoroughly examining design ethics and design in general within an existentialist philosophical framework Its inquiry reveals a puzzling and unsettling reality of design ethics and hence what constitutes an ethical design practice where there is no exit for designers but complete acceptance of their freedom and responsibility This book makes a unique original and invaluable contribution to the design literature and design ethics scholarship Scholars professors students and professionals in all design disciplines as well as any person involved in arts humanities philosophy social sciences and engineering will find philosophical insights that will challenge design thinking and inspire them to rethink design ethics as an agency of human existence making instead of code compliance Making a case for existentialist design ethics this book lays the ground for a radical transformation of how we conceive design ethics in design practice and the role of designers in the world , **The Affective Negotiation of Slum Tourism** Tore Holst, 2018-01-29 Each year approximately a million tourists visit slum areas on guided tours as a part of their holiday to Asia Africa or Latin America This book analyses the cultural encounters that take place between slum

tourists and former street children who work as tour guides for a local NGO in Delhi India Slum tours are typically framed as both tourist performances bought as commodities for a price on the market and as appeals for aid that tourists encounter within an altruistic discourse of charity This book enriches the tourism debate by interpreting tourist performances as affective economies identifying tour guides as emotional labourers and raising questions on the long term impacts of economically unbalanced encounters with representatives of the Global North including the researcher This book studies the feeling rules governing a slum tour and how they shape interactions When do guides permit tourists to exoticise the slum and feel a thrilling sense of disgust towards the effects of abject poverty and when do they instead guide them towards a sense of solidarity with the slum s inhabitants What happens if the tourists rebel and transgress the boundaries delimiting the space of comfortable affective negotiation constituted by the guides This book will be essential reading for undergraduates postgraduates and researchers working within the fields of Human Geography Slum Tourism Research Subaltern Studies and Development Studies

A World of Gangs John M. M. Hagedorn, 2008-05-13 Street gangs mirror the inhuman ambitions and greed of society s trendsetters and deities even as they fight to the death over scraps from the table of the international drug trade But John Hagedorn characteristically also finds hope in the contradictory values of outlaw youth selflessness solidarity and love amid cupidity and directionless rage and he maintains the hope that a culture of resistance will ultimately prevail over the forces of self destruction Whether one shares his optimism or not he makes a compelling case that the future of the world will be determined on the streets of our cities Mike Davis from the Foreword A World of Gangs is an illuminating journey around the cultures lives tragedies and dreams of millions of rebellious youth around the planet It is an indispensable work to understand the world we live in and essential reading for students of cities and communities Manuel Castells For the more than a billion people who now live in urban slums gangs are ubiquitous features of daily life Though still most closely associated with American cities gangs are an entrenched worldwide phenomenon that play a significant role in a wide range of activities from drug dealing to extortion to religious and political violence In A World of Gangs John Hagedorn explores this international proliferation of the urban gang as a consequence of the ravages of globalization Looking closely at gang formation in three world cities Chicago Rio de Janeiro and Capetown he discovers that some gangs have institutionalized as a strategy to confront a hopeless cycle of poverty racism and oppression In particular Hagedorn reveals the nihilistic appeal of gangsta rap and its street ethic of survival by any means necessary provides vital insights into the ideology and persistence of gangs around the world This groundbreaking work concludes on a hopeful note Proposing ways in which gangs might be encouraged to overcome their violent tendencies Hagedorn appeals to community leaders to use the urgency outrage and resistance common to both gang life and hip hop in order to bring gangs into broader movements for social justice John M Hagedorn is associate professor of criminal justice at the University of Illinois Chicago He is editor of Gangs in the Global City and author of the highly influential People and Folks Gangs Crime and the Underclass in a Rustbelt City MacArthur

fellow Mike Davis is the author of many books including *Planet of Slums* and most recently *Buda's Wagon: A Brief History of the Car Bomb*

The City of the Senses K. DeFazio, 2011-10-24 Offers an innovative interdisciplinary approach which opens up new ways of understanding urban culture and space. The author approaches the city as essentially a material place where people live, work, and participate in social practices within historical limits set not by sensory experience or cultural meanings but material social conditions

Global Poverty David Hulme, 2015-02-11 Around 1.4 billion people presently live in extreme poverty and yet despite this vast scale the issue of global poverty had a relatively low international profile until the end of the 20th century. In this important new work, Hulme charts the rise of global poverty as a priority global issue and its subsequent marginalisation as old themes edged it aside: trade policy and peace making in regions of geo-political importance and new issues were added: terrorism, global climate change, and access to natural resources. Key updates for the new edition: evaluation of the post 2015 Development Agenda and the Rio 20 exploration of how Colombia and Brazil are pushing a sustainability agenda as a Southern perspective to challenge the aid focus of OECD; post-MDGs interests; examination and discussion of the gradual shift of power and influence to the BRICs and emerging regional powers: Indonesia, Turkey, South Africa; but the lack of change in global institutions; exploration of Russia's lack of participation in the development agenda. The first book to tackle the issue of global poverty through the lens of global institutions, this fully updated volume provides an important resource for all students and scholars of international relations, development studies, and international political economy

Extreme Cities Ashley Dawson, 2017-10-17 A cutting exploration of how cities drive climate change while being on the frontlines of the coming climate crisis. How will climate change affect our lives? Where will its impacts be most deeply felt? Are we doing enough to protect ourselves from the coming chaos? In *Extreme Cities*, Ashley Dawson argues that cities are ground zero for climate change, contributing the lion's share of carbon to the atmosphere while also lying on the frontlines of rising sea levels. Today the majority of the world's megacities are located in coastal zones, yet few of them are adequately prepared for the floods that will increasingly menace their shores. Instead, most continue to develop luxury waterfront condos for the elite and industrial facilities for corporations. These not only intensify carbon emissions but also place coastal residents at greater risk when water levels rise. In *Extreme Cities*, Dawson offers an alarming portrait of the future of our cities, describing the efforts of Staten Island, New York, and Shishmareff, Alaska, residents to relocate; Holland's models for defending against the seas; and the development of New York City before and after Hurricane Sandy. Our best hope lies not with fortified sea walls, he argues. Rather, it lies with urban movements already fighting to remake our cities in a more just and equitable way. As much a harrowing study as a call to arms, *Extreme Cities* is a necessary read for anyone concerned with the threat of global warming and of the cities of the world

War Without End Michael Schwartz, 2016-12-05 Michael Schwartz gets behind the headlines, revealing the real dynamics of the Iraq debacle and its legacy

Contemporary World Narrative Fiction and the Spaces of Neoliberalism Michael K. Walonen, 2016-04-26 This book is a transnational study of how

contemporary fiction writers from the United States and Canada to Nigeria to India to Dubai have conceptualized the emergent social spaces of the diverse corners of the neoliberal world system Over the span of the past three to four decades free market economic policies have been sold to or pushed upon every society on the globe in some way shape or form The upshot of this has been a world system structured in terms of a vast shift of power and resources from government to private enterprise dwindling civic life replaced by rising consumerism an emerging oligarchic rentier class large segments of population faced with meager material conditions of existence and few prospects of socio economic mobility and a looming sense of a near future dominated by further economic collapses and mounting social strife This book analyses a wide cultural array of some of the most poignant narrative engagements with neoliberalism in its various localized manifestations throughout the world

Crime, Violence, and Global Warming John Crank, Linda Jacoby, 2015-05-20 *Crime Violence and Global Warming* introduces the many connections between climate change and criminal activity Conflict over natural resources can escalate to state and non state actors resulting in wars asymmetrical warfare and terrorism Crank and Jacoby apply criminological theory to each aspect of this complicated web helping readers to evaluate conflicting claims about global warming and to analyze evidence of the current and potential impact of climate change on conflict and crime Beginning with an overview of the science of global warming the authors move on to the links between climate change scarce resources and crime Their approach takes in the full scope of causes and consequences present and future in the United States and throughout the world The book concludes by looking ahead at the problem of forecasting future security implications if global warming continues or accelerates This fresh approach to the criminology of climate change challenges readers to examine all sides of this controversial question and to formulate their own analysis of our planet s future

The Oxford Handbook of Land Politics Saturnino M. Borrás, Jennifer C. Franco, Researcher Jennifer C Franco, 2025 Access to land in all its multiple meanings is necessarily diverse complex and contentious and facilitating and maintaining such access constitutes a mosaic of social relations and institutional instruments rather than the minimalist and simplistic reduction of land to land property that in turn tends to be interpreted always as individual private property The Oxford Handbook of Land Politics offers heterodox analytical tools to help the reader make sense of the complexity of the politics of land

Global Cinematic Cities Johan Andersson, Lawrence Webb, 2016-09-13 Cinema and audiovisual media are integral to the culture economy and social experience of the contemporary global city But how has the relationship between cinema and the urban environment evolved in the era of digital technology new media and globalization And what are the critical tools and concepts with which we can grasp this vital interconnection between space and screen viewer and built environment Engaging with a rapidly transforming urban world the contributions to this collection rethink the cinematic city at a global scale By presenting a global constellation of screen cities within one volume the book encourages juxtapositions and comparisons across the North and South to capture the global city and its dynamics of exchange hybridity and circulation The contributions examine film
