Biomass Chars: Elaboration, Characterization and Applications II Lionel Limousy, Mejdí Jeguirim, 2019-10-16

Biomass can be converted to energy biofuels and bioproducts via thermochemical conversion processes such as combustion pyrolysis and gasification. Combustion technology is most widely applied on an industrial scale. However, biomass gasification and pyrolysis processes are still in the research and development stage. The major products from these processes are syngas, bio oil and char, called also biochar for agronomic application. Among these products, biomass chars have received increasing attention for different applications such as gasification, co combustion catalysts or adsorbents, precursors, soil amendment, carbon fuel cells and supercapacitors. This Special Issue provides an overview of biomass char production methods, pyrolysis, hydrothermal carbonization, etc., characterization techniques, e.g., scanning electronic microscopy, X ray fluorescence, nitrogen adsorption, Raman spectroscopy, nuclear magnetic resonance spectroscopy, X ray photoelectron spectroscopy, and temperature programmed desorption and mass spectrometry, their properties and their suitable recovery processes.

Coins, Riches, and Lands

Fernando López Sánchez,Marisa Bueno,David Martínez Chico,2025-01-31 A study of how coins riches and lands were gained and distributed among the soldiers warriors and mercenaries in the Antiquity and Early Medieval times Land was the ideal store of wealth in the ancient Mediterranean world It brought social respectability and its possession allowed participation in the politics of the cities governed by landowning elites Crucial defense of the interests of a given polity through armed services often involved the distribution of lands to laborers still not integrated in these societies Mediterranean urban dynamics also involved paid labor and were always in need of short contract manpower including skilled soldiers and warriors For short time military services lands were not always available so soldiers and warriors were paid with coins and riches Because of their superior development urban economies in the Mediterranean were able to attract migrant paid labor When returning home the migrant warriors carried

coins and riches that would enable them to maximize the return that a homecoming entailed Although difficult to prove whether these men were paid in advance or when discharged it is an important issue as it shows the strength of one contractor over another and helps to better understand the construction of statehood in ancient and early medieval times This collection of papers sheds light on how coins riches and lands were gained and distributed among soldiers warriors and mercenaries Contributions cover a wide chronological span from Late Pharaonic to early medieval times linking a well defined core area the Mediterranean basin with its peripheries Central Europe and Scandinavia to the north and the margins of the Sahara Desert and the Fertile Crescent to the south and the east
