

8th Grade Argumentative Essay Example

Topic: Student/Youth Environmental Activism

The environment is under siege due to human activity. Issues like climate change, the loss of biodiversity, and deforestation are wreaking havoc on the world. According to a letter written for *The Guardian* by youth climate activists, humans are in the middle of the "sixth mass extinction of species" on this planet. Whenever there are issues that need solving, humans always seem to want to become activists in order to do or fix something. And, some students have decided to take action by skipping school to protest and strike for the climate and the environment. But, students should not be environmental activists, although environmental consciousness should be practiced.

School is important. And, if students are skipping school to protest, they could potentially miss out on essential information, including environmental education. According to the *Norfolk* article, "Young People Urged . . ." students from "more than 150 schools skipped school" to participate in "another series of worldwide protests." Even though protesting seems like a good way to bring awareness to the issues the world is experiencing with climate, students should not be giving up their time in school. Additionally, *University of the People* states that "[s]ocieties with higher . . . levels of education tend to be healthier, have higher rates of economic stability, lower crime, and greater equality" (*Benefits of Education Are Societal and Personal*). This shows that school is essential to a thriving society. When students are in school, they learn how to speak and write better and potentially learn more about ways to help the environment. Without the time in school to learn all of that adequately, youth protests will just be composed of a swarm of uneducated and uninformed students who will not be able to clearly explain or defend their cause. Rich Lowry, in his opinion piece for the *Boston Herald*, states that "kids have nothing interesting to say to [adults]." And, an uneducated and uninformed kid just creates even more dismissive reactions from adults when students are trying to speak about issues they care about on a world stage.

Also, at this point, it is too late to reverse the effects of climate change, so student activist efforts are pointless. The article, "...Top 5 Environmental Concerns . . ." states that a "recent United Nations report" said that if we do not make revolutionary changes in human behavior, the "planet will suffer dramatically from global warming in just 12 years." This proves that humans do not have enough time to change their fate. With most people being selfish and stuck in the ways of instant gratification and greed, it would take a lot longer than a decade to change the minds and behaviors of people on Earth. George Marshall, in his book *Don't Even Think About It*, "draws on a wide range of social science research to explain why we, as a species, would prefer not to think
