The Case against Education Bryan Caplan, 2018-01-30 Why we need to stop wasting public funds on education Despite being immensely popular and immensely lucrative education is grossly overrated In this explosive book Bryan Caplan argues that the primary function of education is not to enhance students skill but to certify their intelligence work ethic and conformity in other words to signal the qualities of a good employee Learn why students hunt for easy As and casually forget most of what they learn after the final exam why decades of growing access to education have not resulted in better jobs for the average worker but instead in runaway credential inflation how employers reward workers for costly schooling they rarely if ever use and why cutting education spending is the best remedy Caplan draws on the latest social science to show how the labor market values grades over knowledge and why the more education your rivals have the more you need to impress employers He explains why graduation is our society's top conformity signal and why even the most useless degrees can certify employability He advocates two major policy responses The first is educational austerity Government needs to sharply cut education funding to curb this wasteful rat race The second is more vocational education because practical skills are more socially valuable than teaching students how to outshine their peers Romantic notions about education being good for the soul must yield to careful research and common sense

The Case against Education points the way *Race, Liberalism, and Economics* David Colander, Robert E. Prasch, Falguni A. Sheth, 2009-12-14 Explores how economic reasoning relates to the broader concepts of liberalism and racism

Compendium of Neuropsychological Tests Otfried Spreen, Esther Strauss, 1998-02-19 In a survey of neuropsychologists published in The Clinical Neuropsychologist the first edition of the Compendium was named as one of the eleven essential books in their field This second edition has been thoroughly updated to cover new developments in neuroscience cognitive

psychology and psychological assessment It includes new chapters on test selection report writing and informing the client executive functions occupational interest and aptitude and the assessment of functional complaints In addition to updating research findings about the tests covered in the first edition the book now contains almost twice as many tests *Vital and Health Statistics* ,1963 **Strategic Staffing** Jean Phillips,2019-01-15 Formerly published by Chicago Business Press now published by Sage Strategic Staffing 4e prepares all current and future managers to take a strategic and modern approach to the identification attraction selection deployment and retention of talent Organizations increasingly realize that their employees are the key to executing their business strategies and the current competition for talent has made the identification and attraction of high performing employees essential for companies to succeed in their marketplaces The right employees give their organization a competitive advantage that sets it apart and drives its performance In today s business environment a company s ability to execute its strategy and maintain its competitive edge depends even more on the quality of its employees And the quality of a company s employees is directly affected by the quality of its recruiting and staffing systems Because hiring managers are involved in the staffing process hiring managers and human resources HR professionals need to be familiar with strategic staffing techniques Over the past 10 years advancing technology and the increased application of data analytics have changed the practices of sourcing recruiting and staffing Strategic Staffing 4e is grounded in research communicates practical and modern staffing concepts and the role of staffing in organizational performance and is engaging to read The new edition contains updates to many sections on the roles of technology and analytics and adds more focus to the discussion of ethics that was added to the fourth edition New research findings were also incorporated and many company examples were updated The fifth edition of Strategic Staffing continues to present up to date staffing theories and practices in an interesting engaging and easy to read format Individual Differences in Children and Adolescents Donald H. Saklofske,Sybil B. G. Eysenck, This uniquely authoritative collection of original papers with contributions from over twenty countries provides a rare insight into research and applied programs in the study of individual differences in children and adolescents worldwide While delinquency proves to be one of the most common areas of interest a wide range of cognitive personality and social characteristics are examined and the use of the Eysenck Personality Questionnaire in many studies allows uniform comparisons to be made between countries The editors have not only overcome the language barriers which hitherto have made such information virtually inaccessible to the English speaking world They have also succeeded in bringing together studies from developed and developing countries East and West to present a global picture of adolescent and child psychology In particular the book highlights the general and specific cultural influences on child development and adolescent psychology in different countries and reflects the social and research concerns of the countries and cultures represented The authors comprise a cross section of professionals in the social and behavioral sciences working in university and clinical settings While North America is well represented by six

chapters including Puerto Rico as is Europe particular efforts were made to obtain contributions from Eastern Europe Asia and Africa At the time this book was developed information exchange with eastern European countries was most difficult It is very exciting to present chapters from Hungary Lithuania Romania Russia and Yugoslavia The inclusion of articles from Japan Korea Singapore Sri Lanka and Uganda also add another dimension to studies of individual differences in children Contributions from Australia Israel and New Zealand also allow the book to take on much more of an international perspective on topics ranging from delinquency fears and motivation to intelligence personality and assessment issues This volume provides a plethora of international perspectives on the study of children It will be essential to sociologists
