We See It All Jon Fasman, 2021-01-26 This investigation into the legal political and moral issues surrounding how the police and justice system use surveillance technology asks the question what are citizens of a free country willing to tolerate in the name of public safety As we rethink the scope of police power Jon Fasman s chilling examination of how the police and the justice system use the unparalleled power of surveillance technology how it affects privacy liberty and civil rights becomes more urgent by the day Embedding himself within police departments on both coasts Fasman explores the moral legal and political questions posed by these techniques and tools By zeroing in on how facial recognition automatic license plate readers drones predictive algorithms and encryption affect us personally Fasman vividly illustrates what is at stake and explains how to think through issues of privacy rights civil liberties and public safety How do these technologies impact how police operate in our society How should archaic privacy laws written for an obsolete era that of the landline and postbox be updated Fasman looks closely at what can happen when surveillance technologies are combined and put in the hands of governments with scant regard for citizens civil liberties pushing us to ask Is our democratic culture strong enough to stop us from turning into

China with its architecture of control *POGIL* Shawn R. Simonson, 2023-07-03 Process Oriented Guided Inquiry Learning

POGIL is a pedagogy that is based on research on how people learn and has been shown to lead to better student outcomes in many contexts and in a variety of academic disciplines. Beyond facilitating students' mastery of a discipline, it promotes vital educational outcomes such as communication skills and critical thinking. Its active international community of practitioners provides accessible educational development and support for anyone developing related courses. Having started as a process developed by a group of chemistry professors focused on helping their students better grasp the concepts of general chemistry, The POGIL Project has grown into a dynamic organization of committed instructors who help each other transform classrooms and improve student success, develop curricular materials to assist this process, conduct research expanding what is known about learning and teaching, and provide professional development and collegiality from elementary teachers to college professors. As a pedagogy, it has been shown to be effective in a variety of content areas and at different educational levels. This is an introduction to the process and the community. Every POGIL classroom is different and is a reflection of the uniqueness of the particular context: the institution, department, physical space, student body, and instructor, but follows a common structure in which students work cooperatively in self-managed small groups of three or four. The group work is focused on activities that are carefully designed and scaffolded to enable students to develop important concepts or to deepen and refine their understanding of those ideas or concepts for themselves, based entirely on data provided in class, not on prior reading of the textbook or other introduction to the topic. The learning environment is structured to support the development of process skills such as teamwork, effective communication, information processing, problem solving, and critical thinking. The instructor's role is to facilitate the development of student concepts and process skills, not to simply deliver content to the students. The first part of this book introduces the theoretical and philosophical foundations of POGIL pedagogy and summarizes the literature demonstrating its efficacy. The second part of the book focusses on implementing POGIL, covering the formation and effective management of student teams, offering guidance on the selection and writing of POGIL activities as well as on facilitation, teaching large classes, and assessment. The book concludes with examples of implementation in STEM and non-STEM disciplines as well as guidance on how to get started. Appendices provide additional resources and information about The POGIL Project.

Major Sociocultural Trends Shaping the Contemporary World K.H. Yeganeh, 2017-12-15 The current volume offers a concise and analytical portrait of the contemporary world. The author encompasses concepts and theories from multiple disciplines, notably sociology, anthropology, international relations, and economics, to examine the major sociocultural transformations of the modern world, their underlying causes, and their consequences. The volume is organized in 10 chapters dealing with a variety of topics, including global demographic trends, globalization, culture, foreign affairs, emerging markets, environmental degradation, global security, global health, large corporations, and economic inequality. Each chapter is divided into separate sections examining the accompanying themes.
