Running head: Educational Impact of Physical Science Education is a knowledgeable power that cannot be taken away from anyone. It influences everything in the world. Being an educator is planting seeds of knowledge into the future. Through different subjects, education informs people of their world today and how the world functions. Since kinetic energy and potential energy work together, teachers cannot help but to teach both types of energy. Kinetic and potential energy are constantly happening in the classroom and outside the classroom.

According to the Office of Energy Efficiency and Renewable Energy, "Incorporating energy concepts in the classroom plays a significant role in helping students and teachers make informed decisions about advancing energy efficiency efforts in homes and communities", (Building Our Energy Future: Teaching Students the Significance of Energy Efficiency, Emily Mallory, p.7). Most students wouldn't even r
