Applied Mathematics Susmita Sarkar, Uma Basu, Soumen De, 2015-10-13 The book is based on research presentations at the international conference Emerging Trends in Applied Mathematics In the Memory of Sir Asutosh Mookerjee S N Bose M N Saha and N R Sen held at the Department of Applied Mathematics University of Calcutta during 12-14 February 2014. It focuses on various emerging and challenging topics in the field of applied mathematics and theoretical physics. The book will be a valuable resource for postgraduate students at higher levels and researchers in applied mathematics and theoretical physics. Researchers presented a wide variety of themes in applied mathematics and theoretical physics such as emergent periodicity in a field of chaos, Ricci flow equation and Poincaré conjecture, Bose-Einstein condensation, geometry of local scale invariance and turbulence, statistical mechanics of human resource allocation, mathematical modelling of job matching in labour markets, contact problem in elasticity, the Saha equation, computational fluid dynamics with applications in aerospace problems, an introduction to data assimilation, stochastic analysis and bounds on noise for Holling type II model, graph theoretical invariants of chemical and biological systems, strongly correlated phases and quantum phase transitions of ultra-cold bosons and the mathematical modelling of breast cancer treatment.

High-Performance Bolting Technology for Offshore Oil and Natural Gas Operations National Academies of Sciences, Engineering, and Medicine, National Academy of Engineering, Division on Engineering and Physical Sciences, National Materials and Manufacturing Board, Committee on Connector Reliability for Offshore Oil and Natural Gas Operations, 2018-06-12 Commercially significant amounts of crude oil and natural gas lie under the continental shelf of the United States. Advances in locating deposits and improvements in drilling and recovery technology have made it technically and economically feasible to extract these resources under harsh conditions. But extracting these offshore petroleum resources involves the possibility, however remote, of oil spills with resulting damage to the ocean and the coastline ecosystems and risks to life and limb of those performing the extraction. The environmental consequences of an oil spill can be more severe underwater than on land because sea currents can quickly disperse the oil over a large area and thus cleanup can be problematic. Bolted connections are an integral feature of deep water well operations. High Performance Bolting Technology for Offshore Oil and Natural Gas Operations summarizes strategies for improving the reliability of fasteners used in offshore oil exploration equipment as well as best practices from other industrial sectors. It focuses on critical bolting bolts, studs, nuts, and fasteners used on critical connections.

Cognitive Linguistics - Foundations of Language Ewa Dąbrowska, Dagmar Divjak, 2019-07-08 Cognitive foundations of language introduces the reader to the abilities and processes in which research in Cognitive Linguistics is grounded The book looks at key concepts such as embodiment salience entrenchment construal categorization and collaborative communication and discusses their genesis and implications for cognitive linguistic research

Handbook of Cognitive Linguistics Ewa Dabrowska, Dagmar Divjak, 2015-05-19 Cognitive Linguistics is an approach to language study based on the assumptions that our linguistic abilities are firmly rooted in our cognitive abilities that meaning is essentially conceptualization and that grammar is shaped by usage The *Handbook of Cognitive Linguistics* provides state of the art overviews of the numerous subfields of cognitive linguistics written by leading international experts which will be useful for

established researchers and novices alike It is an interdisciplinary project with contributions from linguists psycholinguists psychologists and computer scientists which will emphasise the most recent developments in the field in particular the shift towards more empirically based research In this way it will we hope help to shape the field encouraging methodologically more rigorous research which incorporates insights from all the cognitive sciences Editor Ewa D browska was awarded the Alexander von Humboldt Professorship 2018

Social Robots from a Human Perspective Jane Vincent,Sakari Taipale,Bartolomeo Sapio,Giuseppe Lugano,Leopoldina Fortunati,2015-05-08 This book presents a comprehensive overview of the human dimension of social robots by discussing both transnational features and national peculiarities Addressing several issues that explore the human side of social robots this book investigates what a social robot is and how we might come to think about social robots in the different areas of everyday life Organized around three sections that deal with Perceptions and Attitudes to Social Robots Human Interaction with Social Robots and Social Robots in Everyday Life it explores the idea that even if the challenges of robot technologies can be overcome from a technological perspective the question remains as to what kind of machine we want to have and use in our daily lives Lessons learned from previous widely adopted technologies such as smartphones indicate that robot technologies could potentially be absorbed into the everyday lives of humans in such a way that it is the human that determines the human machine interaction In a similar way to how today s information and communication technologies were initially designed for professional industrial use but were soon commercialized for the mass market and then personalized by humans in the course of daily practice the use of social robots is now facing the same revolution of domestication In the context of this transformation which involves the profound embedding of robots in everyday life the human aspect of social robots will play a major part This book sheds new light on this highly topical issue one of the central subjects that will be taught and studied at universities worldwide and that will be discussed widely publicly and repeatedly in the near future

Psychoanalytical neuroscience: Exploring psychoanalytic concepts with neuroscientific methods Nikolai Axmacher, Henrik Kessler, Gerd Thomas Waldhauser, 2015-01-09 Sigmund Freud was a trained neuroanatomist and wrote his first psychoanalytical theory in neuroscientific terms Throughout his life he maintained the belief that at some distant day in the future all psychoanalytic processes could be tied to a neural basis We must recollect that all of our provisional ideas in psychology will presumably one day be based on an organic substructure Freud 1914 On Narcissism An Introduction Fundamental Freudian concepts reveal their foundation in the physiological science of his time most importantly among them the concept of libidinous energy and the homeostatic principle of constancy However the subsequent history of psychoanalysis and neuroscience was mainly characterized by mutual ignorance or even opposition many scientists accused psychoanalytic viewpoints not to be

scientifically testable and many psychoanalysts claimed that their theories did not need empirical support outside of the therapeutic situation. On this historical background it may appear surprising that the recent years have seen an increasing interest in re-connecting psychoanalysis and neuroscience in various ways. By studying psychodynamic consequences of brain lesions in neurological patients by investigating how psychoanalytic therapy affects brain structure and function or even by operationalizing psychoanalytic concepts in well-controlled experiments and exploring their neural correlates. These empirical studies are accompanied by theoretical work on the philosophical status of the neuropsychanalytic endeavour. In this volume we attempt to provide a state-of-the-art overview of this new exciting field. All types of submissions are welcome including research in patient populations, healthy human participants and animals, review articles on some empirical or theoretical aspect and of course also critical accounts of the new field. Despite this welcome variability we would like to suggest that all contributions attempt to address one or both of two main questions which should motivate the connection between psychoanalysis and neuroscience and that in our opinion still remain exigent. First from the neuroscientific side: why should researchers in the neurosciences address psychoanalytic ideas and what is or will be the impact of this connection on current neuroscientific theories? Second from the psychoanalytic side: why should psychoanalysts care about neuroscientific studies and how can current psychoanalytical theory and practice benefit from their results? Of course contributors are free to provide a critical viewpoint on these two questions as well.

Financial Determinants of High-Growth Companies Blaž Frešer, Karin Širec, Polona Tominc, 2020-11-13. This book explores the factors that contribute to high corporate growth, presenting a new conceptual model for research into this phenomenon. Building on existing research, the authors present a new conceptual research model that links multidimensional variables such as entrepreneurial orientation and human capital with the perceived availability of different forms of financing for high-growth companies and with the measures that these firms take to overcome financial constraints and thus influence their financial performance. With this model, the authors aim to enhance our understanding of the specifics of financing high-growth companies and demonstrate how the availability of financial resources is one of the most important determinants of promoting development and enterprise growth. Empirically tested on a random sample of high-growth companies from Slovenia, the book seeks to make a contribution to research and enhance our understanding of the various factors involved in high-growth firms.

Paradigm Changes Are Required in HIV Vaccine Research Marc H. V. Van Regenmortel, 2015-12-08. In his 1962 book *The Structure of Scientific Revolutions*, Thomas Kuhn famously argued that researchers in every field of scientific enquiry always operate under a set of presuppositions known as paradigms that are rarely explicitly stated. In the field of HIV vaccine research, several prevailing paradigms led scientists for many years to pursue unfruitful lines of

investigations that impeded significant progress The uncritical acceptance of reigning paradigms makes scientists reluctant to abandon their mistaken assumptions even when they obtain results that are not consistent with the paradigms The following five paradigms which disregard the degeneracy of the immune system were particularly harmful 1 There is a primary and intrinsic epitope specific for each B cell receptor and for the corresponding monoclonal antibody In reality there is no single intrinsic or real epitope for any antibody but only a diverse group of potential ligands 2 Reactions with monoclonal antibodies are more specific than the combined reactivity of polyclonal antibodies In reality a polyclonal antiserum has greater specificity for a multiepitopic protein because different antibodies in the antiserum recognize separate epitopes on the same protein giving rise to an additive specificity effect By focusing vaccine design on single epitope Mab pairs the beneficial neutralizing synergy that occurs with polyclonal antibody responses is overlooked 3 The HIV epitope identified by solving the crystallographic structure of a broadly neutralizing Mab HIV Env complex should be able when used as immunogen to elicit antibodies endowed with the same neutralizing capacity as the Mab Since every anti HIV bnMab is polyspecific the single epitope identified in the complex is not necessarily the one that elicited the bnMab Since hypermutated Mabs used in crystallographic studies differ from their germline like receptor version present before somatic hypermutation the identified epitope will not be an effective vaccine immunogen 4 Effective vaccine immunogenicity can be predicted from the antigenic binding capacity of viral epitopes Most fragments of a viral antigen can induce antibodies that react with the immunogen but this is irrelevant for vaccination since these antibodies rarely recognize the cognate intact antigen and even more rarely neutralize the infectivity of the viral pathogen that harbors the antigen 5 The rational design of vaccine immunogens using reverse vaccinology is superior to the trial and error screening of vaccine candidates able to induce protective immunity One epitope can be designed to increase its structural complementarity to one particular bnMab but such antigen design is only masquerading as immunogen design because it is assumed that antigenic reactivity necessarily entails the immunogenic capacity to elicit neutralizing antibodies When HIV Env epitopes engineered to react with a bnMab are used to select from human donors rare memory B cells secreting bnAbs this represents antigen design and not immunogen design The aim of this Research Topic is to replace previous misleading paradigms by novel ones that better fit our current understanding of immunological specificity and will help HIV vaccine development

Thinking with Feeling
Douglas P. Newton, 2014-03-05 Are emotions good or bad for thinking and learning Have you ever wondered why a good lesson of one year falls flat in another Why do students behave the way they do Teachers are expected to foster productive thought yet the neglect of emotion in the classroom in favour of intellect means teaching and learning is often not as effective as it might be Thinking with Feeling explores what we mean by productive thought its interrelationship with mood and emotions how teachers can manage that interaction to improve teaching and learning and what teacher trainers could do about it Synthesising the most important international research in the field it offers a framework for productive purposeful

thought deduction understanding creative thinking wise thinking and critical thinking and explains how mood and emotion can support and also impede learning It considers the effect of the interplay of emotion and intellect on classroom behaviour on students public performance and performance in tests and how emotional labour can affect the teacher Illustrated with examples from practice this challenging thoughtful study offers education professionals a basis for understanding the interaction of emotions and cognition and making it a successful partnership in order to improve teaching and learning

Investing in Health and Wellbeing Christopher Dye,2024-09-17 The proverbial benefits of prevention over cure are self evident and yet we are reluctant to invest in protecting and improving our health Resolution of this age old dilemma begins with a timeless truth the benefits of good health come at a cost prevention is not better than cure at any price Protecting health should be appealing when a high risk high value hazard can be averted rapidly with certainty and at relatively low cost Similar reasoning applies when the goal is to make health gains not merely to avoid health losses Health choices are rational based on values that are personal Investing in Health and Wellbeing When Prevention Is Better than Cure Second Edition provides a framework to promote and protect health as an asset illustrating the principles with practical examples Application of these ideas helps to explain why prevention is a low priority for health services why the world was not ready for the COVID 19 pandemic why deadly infections like tuberculosis are neglected why cigarette smoking is still commonplace why billions still do not have access to safe sanitation and why the response to climate change has been so slow Much more money and effort are invested in health promotion and disease prevention today than is commonly thought but the enormous avoidable burden of illness is reason to look for ways of investing still more Previously published as The Great Health Dilemma ISBN 9780198853824 in 2021 this second updated edition makes prevention part of a broader vision for better health This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations

Is There Purpose in Biology? Denis Alexander,2018-06-22 Atheists assert that the natural world has no meaning or purpose Dr Denis Alexander Emeritus Director of The Faraday Institute for Science and Religion at St Edmunds College Cambridge draws a different conclusion Not only do recent evolutionary biological data appear inconsistent with the claim that the world is purposeless but the Christian doctrine of creation has provided and continues to provide both context and stimulus for the study of the natural world Christians started biology However is a belief in an omnipotent benign Creator consistent with a world of pain and suffering From a lifetime s study in the biological sciences Denis Alexander believes that whilst the cost of existence is extremely high it can nonetheless be squared with the idea of a God of love whose ultimate purposes for humankind render that cost more comprehensible Social Entrepreneurship and Corporate Social Responsibility Joan Marques,Satinder Dhiman,2020-07-05 This book provides professionals as well as students with the understanding that Social Entrepreneurship and Corporate Social Responsibility CSR are now core business principles for

sustainably It encourages social entrepreneurs in their role as forerunners in creating new business models that develop facilitate or implement constructive solutions to social cultural and environmental issues At the same time this book views corporate social responsibility as a means of challenging existing entities to realize and modify prior unsustainable and predatory business models and to increase social cultural and environmental accountability By linking these two concepts this book prompts a paradigmatic awakening whereby the foundational driver of business creation and management no longer rests on profit maximization but on improvement of the quality of life for society
