Advanced Two-Dimensional Material-Based Heterostructures in Sustainable Energy Storage Devices Srikanth

Ponnada, Susmita Naskar, 2024-08-30 *Advanced Two Dimensional Material Based Heterostructures in Sustainable Energy Storage Devices* provides a detailed overview of advances and challenges in the development of 2D materials for use in

energy storage devices It offers deep insight into the synthesis characterization and application of different 2D materials and their heterostructures in a variety of energy storage devices focusing on new phenomena and enhanced electrochemistry This book Introduces 2D materials synthesis methods and characterization techniques Discusses application in a wide range of batteries and supercapacitors Offers perspectives on future investigations necessary to overcome existing challenges This comprehensive reference is written to guide researchers and engineers working to advance the technology of energy efficient energy storage devices

Gender and Climate Change Joane Nagel, 2025-08-05 Does gender matter in global climate change This timely and provocative book takes readers on a guided tour of basic climate science then holds up a gender lens to find out what has been overlooked in popular discussion research and policy debates We see that around the world more women than men die in climate related natural disasters the history of science and war are intimately interwoven masculine occupations and preoccupations and conservative men and their interests drive the climate change denial machine We also see that climate policymakers who embrace big science approaches and solutions to climate change are predominantly male with an ideology of perpetual economic growth and an agenda that marginalizes the interests of women and developing economies The book uses vivid case studies to highlight the often surprising gendered impacts of climate changes This new edition is a thorough update that includes revised and new chapters and new material that takes account of the significant advances in climate research environmental and social theory and the many political and social challenges posed in the wake of US elections Covid 19 pandemic and rapidly changing climate and environment The new edition also takes account of important social and cultural movements that resist challenges to women s rights and advocate for gender sexuality and racial justice This book will appeal to students researchers and academicians interested in environmental studies and gender studies It also will be of interest to policymakers activists and others involved with environmental policy and governance

Advances in Manufacturing Technology XXXVI Andrew Thomas, Lyndon Murphy, Wyn Morris, Vincenzo Dispenza, David Jones, 2023-12-15 Like many other fields the area of manufacturing has advanced massively since the onset of the technological revolution brought about by advances in computing and smart technologies and with the accelerating globalisation of manufacturing in the 21st century the urgent need to keep pace has produced further rapid advancements in technology research and innovation This book presents the proceedings of ICMR 2023 the 20th International Conference on Manufacturing Research held from 6-8 September 2023 in Aberystwyth Wales UK This annual conference is a friendly and inclusive platform for a broad community of researchers with the common goal of developing and managing the technologies and operations key to manufacturing As well as bringing together researchers academics and industrialists to share their knowledge and experience the conference also serves to promote manufacturing engineering education training and research Reflecting the context of Industry 4.0 and beyond the theme of the 2023 conference is sustainability in smart manufacturing environments More than 68 papers were submitted for the conference from which the 33 papers presented

here were selected and accepted after a rigorous peer review process an acceptance rate of 49% The papers are grouped into 8 sections operations and supply chain management manufacturing technology manufacturing and process modeling robotics and simulation systems supply chain systems process characterization and simulation operations and supply chain management and design and prototyping Providing a wide ranging overview of advances in the field the book will be of interest to all those working in manufacturing research *Chemical news and Journal of physical science* ,1870 **UPPSC**
