**Homegrown Sprouts** Rita Galchus,2013-11 How to grow sprouts at home effectively and safely Get incredibly fresh delicious sprouts to eat alone or add to a variety of recipes **The Wild Wisdom of Weeds** Katrina Blair,2014-10-07 The Wild Wisdom of Weeds is the only book on foraging and edible weeds to focus on the thirteen weeds found all over the world each of which represents a complete food source and extensive medical pharmacy and first aid kit More than just a field guide to wild edibles it is a global plan for human survival When Katrina Blair was eleven she had a life changing experience where wild plants spoke to her beckoning her to become a champion of their cause Since then she has spent months on end taking walkabouts in the wild eating nothing but what she forages and has become a wild foods advocate community activist

gardener and chef teaching and presenting internationally about foraging and the healthful lifestyle it promotes Katrina Blair's philosophy in *The Wild Wisdom of Weeds* is sobering realistic and ultimately optimistic If we can open our eyes to see the wisdom found in these weeds right under our noses instead of trying to eradicate an invasive we will achieve true food security *The Wild Wisdom of Weeds* is about healing ourselves both in body and in spirit in an age where technology commodity agriculture and processed foods dictate the terms of our intelligence But if we can become familiar with these thirteen edible survival weeds found all over the world we will never go hungry and we will become closer to our own wild human instincts all the while enjoying the freshest wildest and most nutritious food there is For free The thirteen plants found growing in every region across the world are dandelion mallow purslane plantain thistle amaranth dock mustard grass chickweed clover lambsquarter and knotweed These special plants contribute to the regeneration of the earth while supporting the survival of our human species they grow everywhere where human civilization exists from the hottest deserts to the Arctic Circle following the path of human disturbance Indeed the more humans disturb the earth and put our food supply at risk the more these thirteen plants proliferate It's a survival plan for the ages Including over one hundred unique recipes Katrina Blair's book teaches us how to prepare these wild plants from root to seed in soups salads slaws crackers pestos seed breads and seed butters cereals green powders sauerkrauts smoothies and milks first aid concoctions such as tinctures teas salves and soothers self care beauty products including shampoo mouthwash toothpaste and brush face masks and a lot more Whether readers are based at home or traveling this book aims to empower individuals to maintain a state of optimal health with minimal cost and effort Katrina Blair's charming and intelligent *The Wild Wisdom of Weeds* delivers just about the best argument I've read for the futility of figuring out what exactly qualifies as a native plant and why invasive can be a flawed concept New York Times *The Wild Wisdom of Weeds* is one of those rare and important books that has the capacity to radically alter your view of a world you thought you knew well You'll never look at weeds the same again Ben Hewitt author of *The Nourishing Homestead*      *Year-Round Indoor Salad Gardening* Peter Burke, 2015 The Low Tech No Grow Lights Approach to Abundant Harvest Year Round Indoor Salad Gardening offers good news with nothing more than a cupboard and a windowsill you can grow all the fresh salad greens you need for the winter months or throughout the entire year with no lights no pumps and no greenhouse Longtime gardener Peter Burke was tired of the growing season ending with the first frost but due to his busy work schedule and family life didn't have the time or interest in high input grow lights or greenhouses Most techniques for growing what are commonly referred to as microgreens left him feeling overwhelmed and uninterested There had to be a simpler way to grow greens for his family indoors After some research and diligent experimenting Burke discovered he was right there was a way And it was even easier than he ever could have hoped and the greens more nutrient packed He didn't even need a south facing window and he already had most of the needed supplies just sitting in his pantry The result healthy homegrown salad greens at a fraction of the cost of buying them at the market The

secret start them in the dark Growing Soil Sprouts Burke's own descriptive term for sprouted seeds grown in soil as opposed to in jars employs a method that encourages a long stem without expansive roots and provides delicious salad greens in just seven to ten days way earlier than any other method with much less work Indeed of all the ways to grow immature greens this is the easiest and most productive technique Forget about grow lights and heat lamps This book is a revolutionary and inviting guide for both first time and experienced gardeners in rural or urban environments All you need is a windowsill or two In fact Burke has grown up to six pounds of greens per day using just the windowsills in his kitchen Year Round Indoor Salad Gardening offers detailed step by step instructions to mastering this method hint it's impossible not to succeed it's so easy tools and accessories to have on hand seeds and greens varieties soil and compost trays and planters shelving harvest and storage recipes scaling up to serve local markets and much more *Grain Power* Patricia Green,Carolyn
