Roman Wölfel

Physical Science Paper 1 June 2014:

Eco-Towers K. Al-Kodmany, 2015-05-05 Eco Towers introduces readers to groundbreaking designs most progressive projects and innovative ways of thinking about a new generation of green skyscrapers that could provide solutions to crises the world faces today including climate change depleting resources deteriorating ecology population increase decreasing food supply urban heat island effect pollution deforestation and more The book suggests that the eco tower culminates the cultural and technological evolutions of the 21st century by building and improving on the experiences of earlier designs of skyscrapers and philosophies particularly green sustainable and ecological It argues that the true green skyscraper is the one that engages successfully with its larger urban context by establishing symbiotic relationships with the social economic and environmental aspects Since tall buildings are becoming larger and taller serving greater number of people and exerting higher demand on the environment and existing infrastructure any improvements in their design and construction will significantly enhance urban conditions The book elucidates how green skyscrapers better serve tenants mitigate environmental impacts and improve integration with the city infrastructure It explains how skyscrapers long life cycle offers the greatest justifications for recycling precious resources and makes it a worthwhile to employ green features in constructing new skyscrapers and retrofitting existing ones Subsequently the book explores new designs that are employing cutting edge green technologies at a grand scale including water saving technologies solar panels helical wind turbines sunlight sensing LED lights rainwater catchment systems graywater and blackwater recycling systems seawater powered air conditioning and the like In the future new building materials and smart technologies will continue to offer innovative design approaches to sustainable tall buildings with new aesthetics referred to as eco iconic skyscrapers

Ethics and climate change, 2015-07-27 Climate change is the most significant moral and environmental issue of our time This project seeks to help deepen explicit ethical reflection around the world on national responses to climate change by developing a publicly available record on national compliance with ethical obligations for climate change similar to the reports that are now available on national compliance with human rights obligations

Adaptation To Climate Change: Asean And Comparative Experiences Kheng Lian Koh, Robert Kibugi, Ilan Kelman, Rose-liza Eisma Osorio, 2015-08-05 Adaptation to Climate Change ASEAN and Comparative Experiences presents a dynamic and comprehensive collection of works from legal scholars around the world that delves into a relatively new frontier on legal aspects of climate change adaptation with focus on the ASEAN region both at the regional level as well as at the national level in some ASEAN countries such as Malaysia Philippines and Thailand Other countries not within ASEAN are also represented such as Bangladesh People s Republic of China Sri Lanka and the Republic of Taiwan In doing so it surveys one of the most important issues confronting developing countries today and the challenges to building resilient societies It is an essential source of reference for policy makers administrators the private sector officials scientists academic scholars climatologists NGOs and CSOs in ASEAN and the

world **The Troubled Rhetoric and Communication of Climate Change** Philip Eubanks, 2015-05-15 Despite an overwhelming scientific consensus climate change remains one of the most controversial issues of our time Focusing on the rhetoric that surrounds the issue of climate change this groundbreaking book analyses why the debate continues to rage and examines how we should argue when winning the argument really matters Going beyond routine condemnations of the wildest statements made by religious fundamentalists or spokespeople for fossil fuel interests the book explains the mutually exacerbating problems that permit many of us greet catastrophic predictions with an equivocal shrug It argues that the argumentative situation around climate change makes a certain kind of skepticism fair minded skepticism not only possible but likely The book also strikes a hopeful note reminding us that people do change their minds in response to effective argumentation that appeals to deeply shared values Offering new insight into an ongoing academic discussion about the nature of argument and how it can be undertaken more effectively and ethically as well as a new perspective on the rhetoric of science and technology this book will be a valuable resource to students and scholars of climate change environmental humanities rhetoric environmental communication sociology and science and technology studies Information Geometry Geert Verdoolaege, 2019-04-04 This Special Issue of the journal Entropy titled Information Geometry I contains a collection of 17 papers concerning the foundations and applications of information geometry Based on a geometrical interpretation of probability information geometry has become a rich mathematical field employing the methods of differential geometry It has numerous applications to data science physics and neuroscience Presenting original research yet written in an accessible tutorial style this collection of papers will be useful for scientists who are new to the field while providing an excellent reference for the more experienced researcher Several papers are written by authorities in the field and topics cover the foundations of information geometry as well as applications to statistics Bayesian inference machine learning complex systems physics and neuroscience **Holocaust Archaeologies** Caroline Sturdy Colls, 2015-02-28 Holocaust Archaeologies Approaches and Future Directions aims to move archaeological research concerning the Holocaust forward through a discussion of the variety of the political social ethical and religious issues that surround investigations of this period and by considering how to address them It considers the various reasons why archaeological investigations may take place and what issues will be brought to bear when fieldwork is suggested It presents an interdisciplinary methodology in order to demonstrate how archaeology can uniquely contribute to the history of this period Case examples are used throughout the book in order to contextualise prevalent themes and a variety of geographically and typologically diverse sites throughout Europe are discussed This book challenges many of the widely held perceptions concerning the Holocaust including the idea that it was solely an Eastern European phenomena centred on Auschwitz and the belief that other sites connected to it were largely destroyed or are well known The typologically temporally and spatially diverse body of physical evidence pertaining to this period is presented and future possibilities for investigation of it are discussed Finally the volume concludes by

discussing issues relating to the re presentation of the Holocaust and the impact of this on commemoration heritage management and education This discussion is a timely one as we enter an age without survivors and questions are raised about how to educate future generations about these events in their absence **SOUVENIR of 3rd International Science Congress ISC-2013** Prof. Dipak Sharma, International Science Congress Association organized 3rd International Science Congress ISC 2013 with Innovation with Global Responsibility as its Focal Theme ISC 2013 is divided in 20 sections A total number of 900 Research Papers and 1000 registrations from 36 countries all over the world have been received They are mainly from India Iran Sudan Iraq South Africa Phillipines Pakistan Nighana Erode Czech Republic Bangladesh Swaziland Jordan USA Thailand Japan Malaysia Kazakhstan UK Colombia Nepal Italy Bulgariya Cameroun France Greece Kazakhstan Korea Lithuania Nigeria Poland Romania Slovakiya Ukraine Venezuela and Turkey **Jahangirnagar University Journal of Science** ,2014 *Digital Materialities* Sarah Pink,Elisenda Ardèvol,Dèbora Lanzeni,2016-02-25 As the distinction

between the digital and the material world becomes increasingly blurred the ways in which we think about design are also shifting and evolving How can the human digital and material be brought together to intervene in the world What constitutes our digital material environments How can we engage with digital technologies to make sustainable healthy and meaningful decisions both now and in the future *Digital Materialities* presents twelve chapters by scholars and practitioners working at the intersection between design and digital research in the UK Spain Australia and the USA By incorporating in depth understandings of the digital material world from both the social sciences and design the book considers how this combined knowledge might advance our capacity to design for the future Divided into three parts the focus of the book moves from the theoretical to the practical how different digital materialities are imagined and emerge through software emulation urban sensors and smart homes how new digital designs are sparked through collaborations between social scientists and designers and finally how digital design emerges from the insider work of everyday designers A fascinating ground breaking book for students and scholars of digital anthropology media and communication and anyone interested in the future of digital design
