Klir,2013-11-21 This book has a rather strange history It began in Spring 1989 thirteen years after our Systems Science Department at SUNY Binghamton was established when I was asked by a group of students in our doctoral program to have a meeting with them The spokesman of the group Cliff Joslyn opened our meeting by stating its

purpose I can closely paraphrase what he said We called this meeting to discuss with you as Chairman of the Department a fundamental problem with our systems science curriculum In general we consider it a good curriculum we learn a lot of concepts principles and methodological tools mathematical computational heuristic which are fundamental to understanding and dealing with systems And yet we learn virtually nothing about systems science itself What is systems science What are its historical roots What are its aims Where does it stand and where is it likely to go These are pressing questions to us After all aren't we supposed to carry the systems science flag after we graduate from this program We feel that a broad introductory course to systems science is urgently needed in the curriculum Do you agree with this assessment The answer was obvious and yet not easy to give I agree of course but I do not see how the situation could be alleviated in the foreseeable future
