Market Manipulation and The Price of Eggs David Ress, 2025-08-01 This Palgrave Pivot presents a microhistory of an important but little known incident of futures trading. The case in question concerns an incident in the futures market operated by the Chicago Board of Trade (CBOT) in 1968 where an individual trader, David Henner, was able to set an unusually and ultimately unjustified high closing price for delivery of eggs in six months. By examining the legal and economic theoretical context of this incident, the book argues that the definition of market manipulation is not straightforward and has been complicated by a reluctance among regulators to accept the idea that ordinary market dynamics can produce a false price. Unlike most other cases of financial market manipulation, the finding here did not involve a market corner or some form of insider trading but instead suggested that the inherent dynamics of an open outcry market could produce an unreal price. As narrative history, it offers scholars and practitioners of financial market regulation and operation a valuable way of looking at why otherwise inexplicable breaks in prices occur. This book will be valuable reading for those interested in law and economics, financial regulation and the history of commodities and futures trading.

Energizing Neoliberalism Caleb Wellum, 2023-10-17 How the 1970s energy crisis facilitated a neoliberal shift in US political culture. In *Energizing Neoliberalism*, Caleb Wellum offers a provocative account of how the 1970s energy crisis helped to recreate postwar America. Rather than think of the crisis as the obvious outcome of the decade's oil shocks, Wellum unpacks the cultural construction of a crisis of energy across different sectors of society, from presidents, policy experts and environmentalists to filmmakers, economists and oil futures traders. He shows how the dominant meanings ascribed to the 1970s energy crisis helped to energize neoliberal visions of renewed abundance and power through free market values and approaches to energy. Deeply researched in federal archives, expert discourse and popular culture, *Energizing Neoliberalism* demonstrates the central role that energy crisis narratives played in America's neoliberal turn. Wellum traces the roots of the crisis to the consumption practices and cultural narratives spawned by the petrocultural politics of Cold War capitalism. In a series of illuminating case studies, including 1970s energy conservation debates, popular car films and the creation of oil futures trading, Wellum chronicles the consolidation of a neoliberal capitalist order in the United States through an energy politics marked by anxious futurity, petro-populist sentiment and financialized energy markets. He shows how experiences of energy shortages and fears of future energy crises unsettled American national

identity and power yet also informed Reagan era confidence in free markets and US global leadership In taking a cultural approach to the 1970s energy crisis Wellum offers a challenging meditation on the status of crisis in modern history contemporary life and critical thought and how we rely on crises to make sense of the world **Gaming the Market** Ronald B.
