A Legacy of Exploitation Susan Dianne Brophy, 2022-05-15 It is unlikely that buyers of the Hudson's Bay Company's iconic multistripe point blanket these days reflect on the historically exploitative relationship between the company and Indigenous producers. This critical re-evaluation of the company's first planned settlement at Red River uncovers that history. As a settler colonialist project par excellence, the Red River Colony was designed to undercut Indigenous peoples' troublesome autonomy and better control their labour. Susan Dianne Brophy upends standard historical portrayals by foregrounding Indigenous peoples' autonomy as a driving force of change. **A Legacy of Exploitation** offers a comprehensive account of legal, economic, and geopolitical relations to show how autonomy can become distorted as complicity in processes of dispossession. Ultimately, this book challenges enduring yet misleading national fantasies about Canada as a nation of bold adventurers.

A Cold Colonialism Tina Adcock, 2025-06-01 Exploration has long been pivotal to southern engagements with northern Canada, but it is most often associated with the nineteenth century or earlier. **A Cold Colonialism** offers the first extended examination of twentieth-century exploration in the Canadian North. Modern exploration helped southerners establish and maintain distinctive kinds of colonial and settler colonial power over northern Indigenous homelands. Who explored the North between 1918 and 1965? What forms did exploration take? What did it mean to explorers and others affected by it? Tina Adcock focuses on four representative explorers with richly documented careers: mining engineer George Douglas, surveyor Guy Blanchet, ethnologist Vilhjalmur Stefansson, and filmmaker Richard Finnie. Despite limited experience in and knowledge of the Canadian North, these explorers helped southern militaries, industries, and governments exert control over northern peoples and their lands. Each also claimed belonging in and authority over the North in ways that still resonate among southern settlers in Canada today.

Handbook on Green Infrastructure Danielle Sinnett, Nick Smith, Sarah Burgess, 2015-11-27 Green infrastructure encompasses many features in the built environment. It is widely recognised as a valuable resource in our towns and cities, and it is therefore crucial to understand, create, protect, and manage this resource. This Handbook sets the context for green infrastructure as a means to make urban environments more resilient, sustainable, liveable, and equitable. Including state-of-the-art reviews that summarise the existing knowledge, as well as research findings, this Handbook provides current evidence for the beneficial impact of green infrastructure on health, environmental quality, and the economy. It discusses the planning and design of green infrastructure as a strategic network, down to the individual features in a neighbourhood, and looks at the process of green infrastructure implementation, emphasising the importance of collaboration across multiple professions and sectors. This comprehensive volume operates at multiple spatial scales, from strategic networks at the regional level to individual features in neighbourhoods, with international case studies used throughout to illustrate key examples of good practice. This collection of expert contributions will be invaluable to students and academics in the fields of planning, urban studies, and geography. Practitioners and policy makers will also find the policy discussion and examples enlightening.
