University of Technology Sipiwe Maseepe Salome Xaba, 2015 All universities and colleges have physical or traditional admission and registration systems in place. In addition, some partially automated systems like course registration where current students have to login and electronically enroll in courses of interest are also in use. Some major admission processes, however, are still not fully automated. An online enrollment system was introduced at the Tshwane University of Technology (TUT) in 2006 with a view to enable students to apply and register online and acquire valuable information from databases that belong to the Registrar's Office at TUT. Since 2006, the online system of registration at TUT has been improved in phases. The online system of registration is designed in order to enable students to register for subjects prior to the commencement of their semesters. The aim of this study is to assess how effectively students utilize the online system of enrollment at TUT. The impact of an introduction of and transition to a self-service administration module will be discussed with regard to customer satisfaction.
