Sustainable Utilization and Conservation of Africa's Biological Resources and Environment Sylvester Chibueze Izah, Matthew Chidozie Ogwu, 2023-04-17 This edited book highlights the potential and actual contributions of the sustainable management and utilization of indigenous biological resources and environment for the development of Africa. The book centers on documenting current trends and issues in the field of resource use and conservation with the view of emphasizing their benefits to the pursuit of development within the region. By documenting the array of natural resources and environment in Africa, this book addresses the topical knowledge and understanding gaps that characterize conservation rationale for sustainable resource exploration, utilization patterns and conservation challenges including policy status, environmental threats, impacts of tourism, reduction in food resources etc. and their effects on the sustainable development of Africa. Through an integrated approach, the book focuses on below and above ground biological resources and the diverse scales of environment that characterize Africa. This collection of works is very helpful for natural and social scientists, policymakers, strategists, researchers, government and non-government organizations, biodiversity and environmental managers, climate change scientists, practitioners, activists, conservationists, academics, ecologists, undergraduate and postgraduate students and others who want to learn about and understand the best way to use and protect Africa's resources and heritage sustainably.

Understanding Authenticity in Chinese Cultural Heritage Anke Hein, Christopher J. Foster, 2023-03-15 Understanding Authenticity in Chinese Cultural Heritage explores the construction of authenticity and its consequences in relation to Chinese cultural heritage: those objects, texts and intangible practices concerned with China's past. Including contributions from scholars around the world reflecting on a range of different materials and time periods, Understanding Authenticity emphasizes the situatedness and fluidity of authenticity concepts. Attitudes toward authenticity change over time and place and vary between communities and object types among stakeholders in China as they do elsewhere. The book examines how authenticity relates to four major aspects of cultural heritage in China: art and material culture, cultural heritage management and preservation, living and intangible heritage and texts and manuscripts, with individual contributions engaging in a critical and interdisciplinary conversation that weaves together heritage management, art history, archaeology, architecture, tourism, law, history and literature. Moving beyond conceptual issues, the book also considers the practical ramifications for work in cultural heritage management, museums and academic research. Understanding Authenticity in Chinese Cultural Heritage provides an opportunity for reflection on the contingencies of authenticity debates not only in relation to China but also anywhere around the world. The book will be of interest to scholars and students in a variety of fields including heritage studies, Asian studies, art history, museum studies, history and archaeology.
