Manufacturing Competitiveness in Asia Jomo K. S., 2005-06-27 There are competing theories to explain the reasons behind the international competitiveness of manufacturing in Asia. Analysing these different theories will bring important lessons not just for Asia but for developing economies the world over. This lucid book studies industries and firms in East Asia and examines the major determinants of their economic performance. With contributions from such leading thinkers as Ha Joon Chang and Rajah Rasiah, the book covers such themes as industrial policy and East Asia Taiwan's information technology industry. The role of the government in technological capability building. *Manufacturing Competitiveness in Asia* touches on many important themes and issues and as such will be of great interest to students, academics and policy makers involved in industrial economics, international trade and Asian studies.

Fundamentals of Marketing Geraldine McKay, Paul Hopkinson, Lai Hong Ng, 2018-03-06 Introduces the key terms, concepts and practices to provide a firm foundation for undergraduate students. It discusses contemporary technologies used in marketing alongside established practices to develop an understanding of the positive effects of marketing balanced with critical discussion about its contribution to the wider aims of society.

Privatization in Malaysia Jeff Tan, 2007-10-02 This book explores privatization in Malaysia, focusing in particular on how political constraints resulted in the failure of four major privatizations: the national sewerage company IWK, Kuala Lumpur Light Rail Transit (LRT), national airline MAS and national car company Proton.

Shifting to a Higher Gear: The Saga of Malaysia's National Carmaker Proton Prithi Bhattacharya, Francis E Hutchinson, 2024-05-03 Proton has been a vital part of Malaysia's industrialization journey and a key pillar of its modernization drive. Launched in 1983 to fulfil then Prime Minister Mahathir Mohamad's vision of a pride-infused national car company, the state-owned Proton grew quickly and captured a dominant share of the country's domestic car market, aided in no small measure by generous protective measures and subsidies. However, in the subsequent decades, the car giant lost market share and power due to a variety of challenges, such as non-market performance requirements, less effective protection and growing competition from a second national car firm and from global car companies. The automaker has had a variety of ownership structures over time but was resolutely kept in domestic hands, public and private. This did increase control over the corporation but did so at the expense of exposure to and adoption of leading edge technology. This impasse was resolved in 2017 when Proton sold a 49.9 per cent share to the Chinese auto firm Geely. The joint venture has rejuvenated the carmaker, which has begun to reconquer market share through a number of popular SUVs. Despite this, the Malaysian auto market is becoming increasingly competitive. Going forward, Proton will need to begin to export significantly to expose its vehicles to new niche markets as well as global standards, obtain and retain skilled workers and continue to rationalize costs in its supply chains and distributorships.
