Proust Was A Neuroscientist:

Proust Was a Neuroscientist Jonah Lehrer, 2008-09-01 The New York Times bestselling author provides an entertaining look at how artists enlighten us about the workings of the brain New York magazine In this book the author of *How We Decide* and *Imagine How Creativity Works* writes skillfully and coherently about both art and science and about the connections between the two Entertainment Weekly In this technology driven age it s tempting to believe that science can solve every mystery After all it s cured countless diseases and sent humans into space But as Jonah Lehrer explains science is not the only path to knowledge In fact when it comes to understanding the brain art got there first Taking a group of artists a painter a poet a chef a composer and a handful of novelists Lehrer shows how each one discovered an essential truth about the mind that science is only now rediscovering We learn for example how Proust first revealed the fallibility of memory how George Eliot discovered the brain s malleability how the French chef Escoffier discovered umami the fifth taste how C zanne worked out the subtleties of vision and how Gertrude Stein exposed the deep structure of language a full half century before the work of Noam Chomsky and other linguists More broadly Lehrer shows that there s a cost to reducing everything to atoms and acronyms and genes Measurement is not the same as understanding and art knows this better than science does An ingenious blend of biography criticism and first rate science writing *Proust Was a Neuroscientist* urges science and art to listen more closely to each other for willing minds can combine the best of both to brilliant effect His book marks the arrival of an important new thinker Wise and fresh Los Angeles Times

Literature, Neurology, and Neuroscience: Historical and Literary Connections , 2013-11-25 This well established international series examines major areas of basic and clinical research within neuroscience as well as emerging and promising subfields This volume on the neurosciences neurology and literature vividly shows how science and the humanities can come together and have come together in the past Its sections provide a new broad look at these interactions which have received surprisingly little attention in the past Experts in the field cover literature as a window to neurological and scientific zeitgeists theories of brain and mind in literature famous authors and their suspected neurological disorders and how neurological disorders and treatments have been described in literature In addition a myriad of other topics are covered including some on famous authors whose important connections to the neurosciences have been overlooked e g Roget of Thesaurus fame famous neuroscientists who should also be associated with literature and some overlooked scientific and medical men who helped others produce great literary works e g Bram Stoker s *Dracula* There has not been a volume with this coverage in the past and the connections it provides should prove fascinating to individuals in science medicine history literature and various other disciplines This book looks at literature medicine and the brain sciences both historically and in the light of the newest scholarly discoveries and insights

Proust's In Search of Lost Time Katherine L. Elkins, 2023 With the story of a madeleine dipped in tea Marcel Proust makes famous moments that transport one to an earlier time thought lost forever His *In Search of Lost Time* announces a quest narrative with lost time as

its goal We follow the journey of a young man as he strives to become the writer he longs to be and his journey entails discovering a sense of self in which past and present intertwine The narrator is delayed in his goal by various digressions including journeys into the worlds of the salons and of art For this reason the novel offers far more avenues for philosophical reflection than simply a meditation on time and identity In Search of Lost Time includes reflections on love and jealousy joy and suffering the enchantments of art and the disillusionments of friendship This volume brings together prominent philosophers and critics to illuminate these many themes Eight essays treat a wide range of topics including fiction biography temporality music love jealousy weather and consciousness One of the longest and most complex novels ever written In Search of Lost Time has fascinated philosophers for decades The contributors in this volume build upon earlier approaches to offer new avenues and directions for philosophical thought

Marcel Proust in Context Adam Watt, 2013-12-05 This volume sets Marcel Proust's masterwork *la recherche du temps perdu* In Search of Lost Time 1913-27 in its cultural and socio-historical contexts Essays by the leading scholars in the field attend to Proust's biography his huge correspondence and the genesis and protracted evolution of his masterpiece Light is cast on Proust's relation to thinkers and artists of his time and to those of the great French and European traditions of which he is now so centrally a part There is vivid exploration of Proust's reading his attitudes towards contemporary social and political issues his relation to journalism religion sexuality science and travel and how these figure in the *Recherche* The volume closes with a comprehensive survey of Proust's critical reception from reviews during his lifetime to the present day including assessments of Proust in translation and the broader assimilation of his work into twentieth and twenty-first century culture

The Poetry of Raymond Carver Sandra Lee Kleppe, 2016-02-24 Best known as one of the great short story writers of the twentieth century Raymond Carver also published several volumes of poetry and considered himself as much a poet as a fiction writer Sandra Lee Kleppe combines comparative analysis with an in-depth examination of Carver's poems making a case for the quality of Carver's poetic output and showing the central role Carver's pursuit of poetry played in his career as a writer Carver constructed his own organic literary system of autopoetics a concept connected to a paradigm shift in our understanding of the inter-relatedness of biological and cultural systems This idea is seen as informing Carver's entire production and a distinguishing feature of Kleppe's book is its contextualization of Carver's poetry within the complex literary and scientific systems that influenced his development as a writer Kleppe addresses the common themes and intertextual links between Carver's poetry and short story careers situates Carver's poetry within the love poem tradition explores the connections between neurology and poetic memories and examines Carver's use of the elegy genre within the context of his terminal illness Tellingly Carver's poetry which has aroused slight interest among literary scholars is frequently taught to medical students This testimony to the interdisciplinary implications of Carver's work suggests the appropriateness of Kleppe's culminating discussion of Carver's work as a bridge between the fields of literature and medicine

The Palgrave Handbook of Literature and

Mathematics Robert Tubbs, Alice Jenkins, Nina Engelhardt, 2020-12-30 This handbook features essays written by both literary scholars and mathematicians that examine multiple facets of the connections between literature and mathematics. These connections range from mathematics and poetic meter to mathematics and modernism to mathematics as literature. Some chapters focus on a single author such as mathematics and Ezra Pound, Gertrude Stein or Charles Dickens while others consider a mathematical topic common to two or more authors such as squaring the circle, chaos theory, Newton's calculus or stochastic processes. With appeal for scholars and students in literature, mathematics, cultural history and history of mathematics, this important volume aims to introduce the range, fertility and complexity of the connections between mathematics, literature and literary theory. The Windows of Saint Joseph Claudia Mazzucco, 2009-04 Autism is a house without doors but sometimes a window is opened. For me that window was religion. Too early in my life I was blessed to perceive religion as it really is and though in the very depth of my self I knew that child abuse didn't apply in this case the images that Islam and the Inquisition evoke in me were almost too horrible to bear. In a word I was terrified of religion. How little we know what a religious experience really is even our own. Certainly after two years of meetings and daily masses there was no sense of reality that my mind could provide for the content of Catholic doctrines thereby invalidating them. I had never really noticed what the rules of Catholicism were and what typical Catholics experienced. However far I fall short of their understanding I think my real trouble was I didn't have a theory of mind thus I concluded that everybody including the priest who had to celebrate mass experienced what I did. The theory of the mind runs very deep. It underscores the big words, the kinds of words that make consciousness possible: self, community, freedom itself. I have indeed become conscious of my freedom. How far down would I need to dig to discover the Risen Christ? Claudia Mazzucco has published a number of articles on the history of golf in magazines, periodical publications and online magazines. She has also researched various subjects including the historical background for Roberto De Vincenzo's Biography published in Buenos Aires in 2005 and *The Guide of Golf Courses in Argentina* Santillana 2003. She has edited more than twenty books on data and statistics about golf and taught history of this game in the PGA of Argentina for several years before deciding to devote full time to writing.

[The Musician's Mind](#) Lynn Holding, 2020-02-05 Where does learning begin and how is it sustained and stored in the brain? For musicians these questions are at the very core of their creative lives. Cognitive and neuroscience have flung wide the doors of our understanding but bridging the gap between research data and music making requires a unique immersion in both worlds. Lynn Holding presents a symphony of discoveries that illuminate how musicians can optimize their mental wellbeing and cognitive abilities. She addresses common brain myths, motor learning research and the concept of deliberate practice, the values of instructional feedback, technology's role in attention disorders, the challenges of parenting young musicians, performance anxiety and its solutions and the emerging importance of music as a social justice

issue More than an exploration of the brain The Musician s Mind is an inspiring call for artists to promote the cultivation of emotion and empathy as cornerstones of a civilized society No matter your instrument or level of musical ability this book will reveal to you a new dynamic appreciation for the mind s creative power **A Reader's Guide to Proust's 'In Search of Lost Time'** David Ellison,2010-02-18 A detailed analysis of Proust s masterpiece aimed at students coming to the work for the first time *The Time of the City* Michael Shapiro,2010-06-17 The Time of the City is a trans disciplinary work with a focus on genre city relationships as they articulate the micropolitics of urban life in diverse cities Shifting the territorial emphasis of political studies from the mosaic of states to the global network of cities the book draws on urban theory rather than traditional forms of official city politics Deriving their methodological approaches from aspects of urban theory and philosophies of aesthetics the chapters deploy concepts from philosophy political theory literary studies cinema studies poetics and aesthetic theory on diverse cities among which are Berlin Hong Kong London Los Angeles New York Philadelphia and Washington DC Investigating a wide variety of urban formations and developing a geophilosophy appropriate to urban space this multi genre approach to urban life provides stunning insights into the micropolitics of ethnicity identity security subjectivity and sovereignty
