

Preparation and Dosage

The chopped, dried herbage can be used as an ingredient in **incense** and **smoking blends**, for brewing **beer**, to spice wine, and as a tea (infusion, decoction). The seeds are most appropriate for use in

incense recipes.

Dosages must be assessed carefully no matter what type of preparation is being considered. According to *Hagers Handbuch der pharmazeutischen Praxis*, the therapeutic individual dosage of prepared *Hyoscyamus* (with a standardized alkaloid content of 0.05%) is 0.5 g, and the daily dosage 1.5 g (maximum 3 g) (Lindequist 1993, 469). Apart from this, see the guidelines given for *Hyoscyamus muticus*.

Recipe for Henbane Beer

40 g dried, chopped henbane herbage (*herbae hyoscyamus niger conc.*)

5 g bayberry or another *Myrica* species (this aromatic ingredient is optional)

approx. 23 liters of water

1 liter (approx. 1.2 kg) brewing malt (barley malt)

900 g honey (e.g., spruce or pine honey) approx. 5 g dried top-fermenting yeast brown sugar

Boil the henbane and bayberry (if desired) in 1 liter of water (to ensure the necessary sterility). Leave the henbane in the water until it has cooled.

Sterilize the brewing vessel (plastic bucket) with boiling water. Then add the liquid malt to the bucket along with 2 liters of hot water and the honey. Stir until the ingredients are thoroughly dissolved. Add the henbane water together with the herbage and the bayberry. Stir thoroughly. Add cold water to make a total of approx. 25 liters of liquid. Pitch the yeast into the mixture and cover.

In order for the top-fermenting yeast to be effective, the wort should be allowed to stand in a warm location (20° to 25°C.). Fermentation will begin slowly because the tropane alkaloids will initially inhibit the yeast. The main fermentation will be over in four to five days, and the after-fermentation will then begin. The yeast will slowly settle and form a layer at the bottom of the bucket.

The beer can now be poured into bottles. A heaping teaspoon of brown sugar can be added to each (0.7 liter) bottle to promote an additional after-fermentation. Henbane beer tastes best when stored before use in a cool place for two to three months.
