Psychologie Des Foules Gustave Le Bon (John),2020 *The Crowd* Gustave Le Bon,1896 A work devoted to the study and characteristics of crowds An endeavor to examine the difficult problem presented by crowds in a purely scientific matter proceeding with method without being influenced by opinions theories and doctrines With sections devoted to the mind of crowds opinions and beliefs of crowds and the classification and description of the different kinds of crowds

The Crowd Gustave Le Bon,2019-03-14 Originally published in French under the title *Psychologie des Foules* Psychology of Crowds Gustav le Bon mapped out the effect of the masses the crowd upon societal behavior a factor which he said influenced not only the norms of that society but the direction of civilization itself Le Bon pointed out that any individual within a society eventually succumbs to the pressure of the crowd and as a result is influenced by the magnetic influence given out by the crowd The basis for this influence he argued is genetic and never changes Race and the slavery of our daily necessities are the mysterious master causes that rule our destiny All environments circumstances and events are the product of the social suggestions of the moment but this influence is always momentary if it be contrary to the suggestions of the race that is to those which are inherited by a nation from the entire series of its ancestors The biological sciences which have been transformed since embryology have shown the immense influence of the past on the evolution of living beings and the historical sciences will not undergo a less change when this conception has become more widespread Furthermore he argued a nation does not choose its institutions at will any more than it chooses the color of its hair or its eyes and all institutions and governments are the product of race People are not the creators of an epoch but are created by it and their innate character determines how they govern themselves This means that an environment cannot change a person and the individual as part of a crowd ultimately determines the environment
