| Cloudy        |    | For taking images under a cloudy and overcast sky.                                                                        |
| Fluorescent_H |    | For shooting under daylight fluorescent types of three-way fluorescent lighting.                                          |
| Fluorescent_L |  | Shooting under white fluorescent lighting.                                                                                |
| Tungsten      |  | For shooting under tungsten (standard light bulb) lighting.                                                               |
| Custom Set    |  | Allows the user to set the white balance according to the shooting condition.                                             |

\* Different lighting conditions may cause a colour cast on your images.

### ■ Using the Custom White Balance

White balance settings may vary slightly depending on the shooting environment. You can select the most appropriate white balance setting for a given shooting environment by setting up the custom white balance.

1. Select the CUSTOM (  ) menu of the White Balance and place a sheet of white paper in front of the camera so that the LCD monitor shows only white.

2. OK button : selects previous custom white balance.

Shutter button : saves new custom white balance.

- The custom white balance value will be applied, starting with the next picture you take.
- The user configured white balance will be remain effective until it is overwritten.
