

Population Distributions

How does population distribution affect the outcome?

Why?

Alaska encompasses 377 million acres of unoccupied forest land, it is the largest state in the United States, yet with a population of nearly 700,000 people makes the most unpopulated state in America. Even when forests in one of the smallest states and forests in a population of nearly 7 million live within 100 miles of the 48 contiguous land states are considered unpopulated. What are the reasons for this high population density in one state and what effect does this unpopulatedness have on the outcome?
