Proton Savvy Parts:

Technology Transfer and Economic Growth in Sub-Sahara African Countries Nathaniel O. Agola, 2016-03-21 This book provides a pragmatic analytical model grounded on the solid idea that technologies and the accompanying implementation efforts only make sense if they are successfully deployed in markets The analytical model also provides an exhaustive analysis of all critical variables at the global regional and national levels which contribute to failure or success of technology transfer efforts The model is validated by an incisive analysis of technology transfer experiences of Japan Korea Singapore Taiwan province of China and Malaysia While this book finds that these East Asian countries have had both diverging and converging models and experiences with technology transfer the enduring and fundamental aspects of technology transfer in specific industrial sectors and economic growth in these countries is then used to draw lessons for African countries This book therefore is a timely and compelling piece of research work that provides valuable answers to the increasingly urgent question of how African countries can industrialize through technology transfer to meet their economic development and growth ideals

How Asia Got Rich Edith Terry, 2015-05-20 Within a few short months in 1997 Asian economies that had been considered not only healthy but miraculous suddenly fell off a precipice as

investors withdrew massively first from Asian currencies and in rapid order from equity markets across the region On October 27 1997 the turmoil in Asian markets spooked Wall Street in the largest single day decline in history a drop of 550 points It was predicted that the Asian crash could drive the US trade deficit from 191 billion to 300 billion by 1998 creating huge new tensions in relations with some of the largest US trading partners These wrenching changes following a generation of success raise numerous questions about the steps that led to the crisis its likely outcome and the limits and constraints of Asian capitalism Edith Terry presents a blow by blow account of the crisis beginning with the 1996 collapse of the Bangkok Bank of Commerce In her overview she links the fall of the Asian miracle with the theme of globalization arguing that the crisis demonstrates the urgency of dismantling restraints to trade investment and financial services and that the United States should take leadership in pushing for new and sweeping reform through the World Trade Organization and in bilateral negotiations with its trading partners The final section of the book deals with the rise of the Asian miracle how the myth was created who created it why it succeeded for so long and is informed by analysis of the Japanese prototype
