Robert N Stavins

Provincial Paper For Economics Paper 1 November:

Economics Of Environment, Climate Change, And Wine: Selected Papers Of Robert N Stavins, Volume 3 (2011-2023) Robert N Stavins, 2025-04-29 Robert N Stavins has been one of the most influential voices in environmental economics and policy over the past three decades. Written by Stavins and his co-authors, the selected articles and essays in this book were originally published in a diverse set of leading scholarly periodicals. They are collected here for the first time. The book begins with an introductory essay where Stavins reflects on the professional path leading to his research and writing, identifying common themes that emerged from his research. This book discusses environmental policy in detail, unpacking policy instruments and scrutinizing both domestic and international policy. Policies are examined in relation to The Paris Agreement. It concludes with a section on wine production and consumption. This is the third volume of Stavins' selected papers, following Volume 1 (1988-1999) and Volume 2 (2000-2011). Students, scholars, practitioners, and policymakers will find this volume a very valuable and useful addition to their collection.

China Anjali Kumar, 1994-01-01 World Bank Discussion Paper No 251. This study investigates the conflicting viewpoints of small and medium size enterprises (SMEs) and banks. The SMEs contend that the supply of bank financing is largely unavailable to them, while banks maintain that lending to these enterprises remains low because of lack of demand. Surveys were conducted among enterprises to assess demand, and sources of finance, and financial institutions were interviewed to analyze the reasons for constraints on the supply side. Results show that credit is rarely granted for starting a new business. Thus, the smaller the enterprise, the greater the equity finance share of the initial investment. Evidence also suggests that exploitation of highly profitable opportunities could be accelerated by these enterprises if they had greater access to external financing. The study concludes that financial liberalization has had little effect on the access of SMEs to bank credit. It explains why banks have shown little interest in developing these enterprises as a market niche and suggests techniques that banks could adopt to overcome lending risks.

Products and Provinces Mr. Itai Agur, 2016-09-26. The waning of the commodity boom places renewed emphasis on manufacturing as an engine for Canadian growth. However, Canadian manufacturing exports have been relatively stagnant since 2000. While the exchange rate depreciation over the past two years has energized export growth, the response has not been as strong as would have been expected given the size of the depreciation. More fundamental issues appear to be impeding the growth of the Canadian manufacturing sector. This study analyzes the structural factors behind export competitiveness by using unique Canadian data on exports, which are disaggregated both by province and by product. Matching exports to similarly disaggregated data on R D, the capital stock, and other supply side variables, we find that these

variables significantly affect export growth beyond the impact of the exchange rate In particular investment in R D capital infrastructure and vocational training improves innovation and production capacity These results are robust to a factor augmented approach that controls for multicollinearity The Education Gazette of the Province of the Cape of Good Hope,1982

Foundations of International Macroeconomics Maurice Obstfeld,Kenneth Rogoff,1996-09-12 Foundations of International Macroeconomics is an innovative text that offers the first integrative modern treatment of the core issues in open economy macroeconomics and finance With its clear and accessible style it is suitable for first year graduate macroeconomics courses as well as graduate courses in international macroeconomics and finance Each chapter incorporates an extensive and eclectic array of empirical evidence For the beginning student these examples provide motivation and aid in understanding the practical value of the economic models developed For advanced researchers they highlight key insights and conundrums in the field Topic coverage includes intertemporal consumption and investment theory government spending and budget deficits finance theory and asset pricing the implications of and problems inherent in international capital market integration growth inflation and seignorage policy credibility real and nominal exchange rate determination and many interesting special topics such as speculative attacks target exchange rate zones and parallels between immigration and capital mobility Most main results are derived both for the small country and world economy cases The first seven chapters cover models of the real economy while the final three chapters incorporate the economy s monetary side including an innovative approach to bridging the usual chasm between real and monetary models

Vietnam in the Global Economy Thomas Jandl,2013-10-24 This book is in essence about incentives the incentives for competing societal interest groups to cooperate with each other to benefit from a growing economic pie rather than fighting over a bigger share of a smaller one This is the conundrum of economic development If elite interest groups have both incentive and ability to allocate resources toward themselves and if such rent seeking causes a decline in economic inefficiency how can economies ever grow The book illuminates the mechanisms by which in one of the world s recent economic success stories Vietnam s rapid industrialization and passage into the middle income category the interest in cooperating to grow the economy overrode the elites instinct to allocate resources through the use of political power The book shows how the need to provide positive conditions for international investment altered pay off structures and pushed the all powerful Communist Party of Vietnam to engage in bargaining with provincial officials provincial officials with international investors and finally all coercive elites even with the working classes It describes the emergence of a harmony of interest among societal groups in which each group benefits from a growing economy and no one group can monopolize the benefits of growth without hurting itself The Vietnam case validates Nobel Prize winning economist Mancur Olson s proposition that elite predation can only be kept in check when the elite itself suffers from the economic decline it causes at least as much as it gains from the rents it collects

Development In Modern Africa Martin S. Shanguhya,Toyin Falola,2019-10-08 Development in Modern Africa

Past and Present Perspectives contributes to our understanding of Africa's experiences with the development process. It does so by adopting a historical and contemporary analysis of this experience. The book is set within the context of critiques on development in Africa that have yielded two general categories of analysis: skepticism and pessimism. While not overlooking the shortcomings of development, the themes in the book express an optimistic view of Africa's development experiences, highlighting elements that can be tapped into to enhance the condition of African populations and their states. By using case studies from precolonial, colonial, and postcolonial Africa, contributors to the volume demonstrate that human instincts to improve material, social, and spiritual worlds are universal. They are not limited to the Western world, which the term and process of development are typically associated with. Before and after contact with the West, Africans have actively created institutions and values that they have actively employed to improve individual and community lives. This innovative spirit has motivated Africans to integrate or experiment with new values and structures, challenges, and solutions to human welfare that resulted from contact with colonialism and the postcolonial global community. The book will be of interest to academics in the fields of history, African studies, and regional studies.
